

Interpretive Trail Guide

Completed 2008

Eagle Scout - Nathan Fisher

The WATER Center was awarded a \$10,000 Recreational Trails grant by the Federal Highway Administration and the Kansas Department of Wildlife, Parks & Tourism.

The WATER Center partnered with Eagle Scout, Nathan Fisher, to design and install an interpretive nature trail and corresponding trail guide. Have you ever walked down a nature trail and wondered what that certain wooden box is on that pole, or why would such a large rock stick out in the stream like that? Certain points along the WATER Center's

trail arouse that kind of curiosity. The main purpose of this eagle project was to educate the public about the local ecology of the WATER Center area.

Fisher stated, "My part of the WATER Center exhibit will be enjoyed by visitors to the park who can stroll along the sidewalk and take their time reading and observing the ecology of this area. Visitors of all ages will benefit from the illustrated trail guide. Currently, the public can attend programs inside the WATER Center. My trail guide will provide the needed information describing wildlife attracted by the WATER Center."
