

# **Tree Identification Project**

Completed 2007

***Eagle Scout - Caleb Nielson***

Caleb Nielson reviewed the 1984 tree inventory for Herman Hill Park and created a meticulous inventory of all of the parks trees. The project had two phases. During the first phase, Caleb trained volunteers to identify and perform an inventory of the park's trees. During the second phase, Caleb compiled information from the tree count (photos, samples, mapped tree locations) with additional educational materials suitable for use in a park booklet or guide.
