

# Under Water

Recommended for Ages 6 and Up

**A mysterious world exists under the surface of the WATER Center's creek. Can you find it?**

The **Under Water Family Adventure Pack's** activities begin at the outdoor aquarium. Look closely. Is a catfish the same shape as a bass? Youth will investigate and examine the aquarium species and sketch their favorite critter.

Although the **Under Water** adventure begins with art, it ends with science as you and your group explore the watery habitats in the park. Wear clothes that can get wet - you are allowed to get in the creek and scoop out the creatures that live in the underwater world. You will read stories about the changes many creatures go through during their underwater lives.

Youth will use these skills:

- animal investigation
- using tools
- shape recognition
- art
- reading
- following directions
- listening
- cause and effect
- compare and contrast
