CHAPTER 16.32. STORMWATER POLLUTION PREVENTION

- Sec. 16.32.010. General provisions.
- Sec. 16.32.020. General prohibition.
- Sec. 16.32.030. Specific prohibitions and requirements.
- Sec. 16.32.040. Release reporting and cleanup.
- Sec. 16.32.050. Stormwater discharges from construction activities.
- Sec. 16.32.060. Stormwater discharges associated with industrial activity.
- Sec. 16.32.070. Ditches and ponds.
- Sec. 16.32.080. Compliance monitoring.
- Sec. 16.32.090. Subdivision development.
- Sec. 16.32.100. Enforcement actions.
- Sec. 16.32.110. Applicability of enforcement actions.
- Sec. 16.32.120. Hearing and appeal.
- Sec. 16.32.130. Enforcement personnel authorized.
- Sec. 16.32.140. Other legal actions.
- Sec. 16.32.150. Falsifying information.
- Sec. 16.32.160. Supplemental enforcement actions.
- Sec. 16.32.170. Severability.

Sec. 16.32.010. General provisions.

A. *Purposes.* The purpose and objective of this chapter are as follows:

1. To maintain and improve the quality of surface water and groundwater within the city;
2. To attenuate the discharge of contaminated storm water runoff from industrial, commercial, residential, and construction sites into the municipal separate storm sewer system (MS4) and natural waters within the city;
3. To promote public awareness of the hazards involved in the improper discharge of hazardous substances, petroleum products, household hazardous waste, industrial waste, sediment from construction sites, pesticides, herbicides, fertilizers, and other contaminants into the storm sewers of the city;
4. To encourage recycling of used motor oil and safe disposal of other hazardous consumer products;
5. To facilitate compliance with state and federal standards and permits by owners of industrial and construction sites within the city;
6. To enable the city to comply with all federal and state laws and regulations applicable to its NPDES permit for storm water discharges.
7. To regulate the management of storm water for purposes of public safety, welfare and quality of life;
8. To manage and maintain local floodplains; and,
9. To facilitate compliance with city standards and permits by owners of developed, redeveloped and undeveloped properties within the city.

B. *Administration.* Except as otherwise provided herein, the director, or his appointed representative, shall administer, implement, and enforce the provisions of this chapter.

C. *Authority.* The Director may develop additional policies, criteria, specifications and standards in a Storm Water Manual and/or in other policy, master plans, watershed plans or guidance documents as necessary to effectively implement the requirements of this chapter. The policies, criteria and requirements of the Storm Water Manual and/or other policy, plans or guidance documents may be implemented and amended by the Director, are referenced in this

chapter when required, and shall be enforceable, consistent with the provisions contained in this chapter. A public meeting shall be held bi-annually to allow public comment on this chapter and the Storm Water Manual.

In the event that a violation of any provision of this chapter has occurred, or that work does not have a required plan or permit, or that work does not comply with an approved plan or permit, the city may issue a Notice of Violation to the permittee, plan holder or property owner and/or any other person or entity having responsibility for the property or properties where the violation occurred under the provisions of subsection .100 B. of this chapter.

In the spirit of the purposes defined above for this chapter and in the administration of these requirements, the Director may consider the cost-effectiveness of storm water management controls provided that such controls meet the water quality, channel erosion protection and flood protection requirements of this chapter or are waived or exempted in accordance with the criteria defined in this chapter.

D. *Regulatory or legal conflicts.* This chapter is not intended to repeal, abrogate, or impair any existing easements, covenants, deed restrictions, or existing ordinances and regulations, except as specifically noted in this chapter. However, where the provisions of this ordinance and another regulation conflict or overlap, that provision which is more restrictive or imposes higher standards or requirements shall prevail.

E. *Abbreviations.* The following abbreviations when used in this chapter shall have the designated meanings:

TABLE INSET:

BMP	Best Management Practices
CFR	Code of Federal Regulations
CLOMR	Conditional Letter of Map Revision
EPA	U.S. Environmental Protection Agency
FEMA	Federal Emergency Management Agency
HHW	Hazardous Household Waste
KAR	Kansas Administrative Regulations
KSA	Kansas Statutes Annotated
LOMR	Letter of Map Revision
mg/l	Milligrams per liter
MS4	Municipal Separate Storm Sewer System
NOI	Notice of Intent
NOT	Notice of Termination
NPDES	National Pollutant Discharge Elimination System
OCI	Office of Central Inspection
PST	Petroleum Storage Tank
SWP3	Storm Water Pollution Prevention Plan
TMDL	Total Maximum Daily Load
USC	United States Code

F. *Definitions.* Unless a provision explicitly states otherwise, the following terms and phrases, as used in this chapter, shall have the meanings hereinafter designated.

1. "As-built plan" means a drawing showing the actual state of permanent storm water facilities as installed.

2. *"Best management practices (BMP)"* means schedule of activities, prohibitions of practices, maintenance procedures, and other management practices to prevent or reduce the pollution of waters of the United States or the city's MS4 and includes both temporary measures used during construction and permanent measures that are constructed in accordance with the provisions of this ordinance. Best management practices also include treatment requirements, operating procedures, and practices to control plant site runoff, spillage or leaks, sludge or waste disposal, or drainage from raw material storage areas. The BMPs required in this chapter will be sufficient to prevent or reduce the likelihood of pollutants entering storm sewers, ditches, or ponds.
3. *"City"* means the City of Wichita.
4. *"Commencement of construction"* means the disturbance of soils associated with clearing, grading, or excavating activities or other construction activities.
5. *"Commercial"* means pertaining to any business, trade, industry or other activity engaged in for profit.
6. *"Construction general permit"* refers to the Kansas General Permit for Storm water Discharges from Construction Sites.
7. *"Contractor"* means any person or firm performing construction work at a construction site, including any general contractor and subcontractors. Also includes, but is not limited to, earthwork, paving, building, plumbing, mechanical, electrical, landscaping contractors, and material suppliers delivering materials to the site.
8. *"Development"* or *"new development"* means undisturbed property where improvements are planned or intended that will result in land disturbance activities or impervious areas either during or after construction.
9. *"Director"* means the person appointed to the position of Public Works and Utilities Director by the City Manager of the City, or his/her duly authorized representative. Authorized representatives can include, but are not limited to, the City Engineer, the Storm Water Engineer, and others, as so authorized.
10. *"Discharge"* means any addition or introduction of any pollutant, storm water, or any other substance whatsoever into the municipal separate storm sewer system (MS4) or into waters of the United States.
11. *"Discharger"* means any person who causes, allows, permits, or is otherwise responsible for a discharge, including without limitation any owner of a construction site or industrial facility.
12. *"Domestic sewage"* means human excrement, gray water (From home clothes washing, bathing, showers, dishwashing, and food preparation), other wastewater from household drains, and waterborne waste normally discharged from the sanitary conveyances of dwellings (including apartment houses and hotels), office buildings, factories, and institutions, that is free from industrial waste.
13. *"Drainage plan"* refers to the detailed water quantity and quality calculations and plan that are required for final plat approval or for issuance of a building permit.
14. *"Earthwork"* means the disturbance of soils on a site associated with clearing, grading, or excavation activities.
15. *"Environmental Protection Agency (EPA)"* means the United States Environmental Protection Agency, the regional office thereof, any federal department, agency or commission that may succeed to the authority of the EPA, and any duly authorized official of EPA or such successor agency.
16. *"Extremely hazardous substance"* means any substance listed in the appendices

to 40 CFR Part 355, Emergency Planning and Notification.

17. "*Facility*" means any building, structure, installation, process, or activity from which there is or may be discharge of a pollutant.

18. "*Fertilizer*" means a substance or compound that contains an essential plant nutrient element in a form available to plants and is used primarily for its essential plant nutrient element content in promoting or stimulating growth of a plant or improving the quality of a crop, or a mixture of two or more fertilizers.

19. "*Final stabilization*" means the status when all soil disturbing activities at a site have been completed. This would establish a uniform perennial vegetative cover with a density of seventy percent coverage for unpaved areas and those not covered by permanent structures or equivalent permanent stabilization measures (by employing riprap, gabions, or geotextiles).

20. "*Fire protection water*" means any water, and any substances or materials contained therein, used by any person to control or extinguish a fire, or to inspect or test fire equipment.

21. "*Garbage*" means putrescible animal and vegetable waste materials from the handling, preparation, cooking, or consumption of food, including waste materials from markets, storage facilities, and the handling and sale of produce and other food products.

22. "*Harmful quantity*" means the amount of any substance that will cause a violation of a State Water Quality Standard or any adverse impact to the city's drainage system.

23. "*Hazardous household waste (HHW)*" means any material generated in a household (including single and multiple residences) by a consumer which, except for the exclusion provided in 40 CFR Section 261.4(b)(1), would be classified as a hazardous waste under 40 CFR Part 261.

24. "*Hazardous substance*" means any substance listed in Table 302.4 of 40 CFR Part 302.

25. "*Hazardous waste*" means any substance identified or listed as a hazardous waste by the EPA pursuant to 40 CFR Part 261.

26. "*Hazardous waste treatment, disposal, and recovery facility*" means all contiguous land, and structures, other appurtenances and improvements on the land used for the treatment, disposal, or recovery of hazardous waste.

27. "*Impervious area*" or "*impervious cover*" means the number of square feet of hard surface areas which either prevent or retard the entry of water into soil mantle, as it entered under natural conditions as undisturbed property, and/or causes water to run off the surface in greater quantities or at an increased rate of flow from that present under natural conditions as undisturbed property, including, but not limited to, roofs, roof extensions, patios, porches, driveways, sidewalks, pavement, athletic courts, and compacted dirt or graveled areas.

28. "*Individual building sites*" means and includes sites of building construction or earthwork activities that are not a part of a new subdivision development and any individual lot within a newly developing subdivision.

29. *Industrial general permit*. See "Kansas General Permit for Storm water Discharges Associated with Industrial Activity."

30. "*Industrial waste*" means any waterborne liquid or solid substance that results from any process of industry, manufacturing, mining, production, trade or business.

31. "*Industry*" means and includes: (a) municipal landfills; (b) hazardous waste

treatment, disposal, and recovery facilities; (c) industrial facilities that are subject to Section 313 of Title III of the Superfund Amendments and Reauthorization Act of 1986 (SARA) 42, U.S.C. Section 11023; industrial facilities required to obtain NPDES storm water discharge permits due to their Standard Industrial Classification or narrative description; and (d) industrial facilities that the director determines are contributing a substantial pollutant loading to the MS4, which are sources of storm water discharges associated with industrial activity.

32. "*Kansas General Permit for Storm Water Discharges Associated with Industrial Activity (or industrial general permit)*" means the industrial general permit issued by KDHE and any subsequent modifications or amendments thereto, including group permits.

33. "*Kansas General Permit for Storm Water Discharges from Construction Sites (or construction general permit)*" means the construction general permit issued by KDHE and any subsequent modifications or amendments thereto, including group permits.

34. "*Land disturbance*" means the disturbance of soils on a site associated with clearing, grading, excavation, new development or redevelopment activities.

35. "*Landfill*" means an area of land or an excavation in which municipal solid waste is placed for permanent disposal, and which is not a land treatment facility, a surface impoundment, or an injection well.

36. "*Municipal separate storm sewer system (MS4)*" means the system of conveyances, (including roads with drainage systems, municipal streets, catch basins, curbs, gutters, ditches, man-made channels, or storm drains) owned and operated by the city and designed or used for collecting or conveying storm water, and which is not used for collecting or conveying sewage.

37. "*Municipal solid waste*" means solid waste resulting from or incidental to municipal, community, commercial, institutional, or recreational activities, and includes garbage, rubbish, ashes, street cleanings, dead animals, abandoned automobiles, and other solid waste other than industrial waste.

38. "*NPDES permit*" means for the purpose of this chapter, this is a permit issued by EPA or the state of Kansas that authorizes the discharge of storm water pollutants to waters of the United States, whether the permit is applicable on an individual, group, or general area-wide basis

39. "*Nonpoint source*" means the source of any discharge of a pollutant that is not a point source.

40. "*Notice of intent (NOI)*" means the notice of intent that is required by either the industrial general permit or the construction general permit.

41. "*Notice of termination (NOT)*" means the notice of termination that is required by either the industrial general permit or the construction general permit.

42. "*Notice of violation*" means a written notice provided to the owner or contractor detailing any violations of this chapter and any clean-up action expected of the violators.

43. "*OCI*" means office of central inspection and includes its superintendent and his or her authorized representatives.

44. "*Oil*" means any kind of oil in any form, including, but not limited to: petroleum, fuel oil, crude oil or any fraction thereof which is liquid at standard conditions of temperature and pressure, sludge, oil refuse, and oil mixed with waste.

45. "*Outfall*" or "*storm water outfall*" means the terminus of the storm water system for a development or redevelopment where the storm water runoff is released into a larger

public or private storm water management system, or into a stream, waters of the United States or other water body.

46. "*Owner*" means the person who owns a facility, part of a facility, or land.

47. "*Person*" means any individual, partnership, copartnership, firm, company, corporation, association, joint stock company, trust, estate, government entity, or any other legal entity; or their legal representatives, agents, or assigns, including all federal, state, and local government entities.

48. "*Pesticide*" means a substance or mixture of substances intended to prevent, destroy, repel, or migrate any pest, or substances intended for use as a plant regulator, defoliant, or desiccant.

49. "*Petroleum product*" means a petroleum product that is obtained from distilling and processing crude oil and that is capable of being used as a fuel for the propulsion of a motor vehicle, or aircraft, including motor gasoline, gasohol, other alcohol blended fuels, aviation gasoline, kerosene, distillate fuel oil, and #1 and #2 diesel.

50. "*Petroleum storage tank (PST)*" means any one or combination of aboveground or underground storage tanks that contain petroleum product and any connecting underground pipes.

51. "*Point source*" means any discernable, confined, and discrete conveyance including, but not limited to: any pipe, ditch, channel, tunnel, conduit, well, discrete fissure, container, rolling stock, concentrated animal feeding operation, landfill leachate collection system, vessel or other floating craft from which pollutants are or may be discharged. This term does not include return flows from irrigated agriculture or agricultural storm water runoff.

52. "*Pollutant*" means dredged spoil, spoil waste, incinerator residue, sewage, garbage, sewage sludge, munitions, chemical waste, biological materials, radioactive materials, heat, wrecked or discarded equipment, rock, sand, soil, yard waste, hazardous household wastes, used motor oil, anti-freeze, litter, and industrial, municipal, and agricultural waste discharged into water and/or any substance, debris, matter that may be carried downstream by storm water runoff, and/or any substance or matter that may be dissolved in storm water runoff.

53. "*Pollution*" means the alteration of the physical, thermal, chemical, or biological quality of, or the contamination of, any water in the state that renders the water harmful, detrimental, or injurious to humans, animal life, vegetation, or property, or public health, safety, or welfare, or impairs the usefulness or the public enjoyment of the water for any lawful or reasonable purpose.

54. "*Qualified personnel*" means persons who possess the required certification, license, or appropriate competence, skills, and ability as demonstrated by sufficient education, training, and/or experience to perform a specific activity in a timely and complete manner consistent with the regulatory requirements and generally accepted industry standards for such activity.

55. "*Redevelopment*" or "*redevelopment site*" means a change to previously existing improved property, including but not limited to the demolition or building structures, filling, grading, paving, or excavating.

56. "*Release*" means any spilling, leaking, pumping, pouring, emitting, emptying, discharging, injecting, escaping, leaching, dumping, or disposing into the municipal separate storm sewer system (MS4) or the waters of the United States.

57. "*Reportable quantity (RQ)*" means, for any hazardous substance, the quantity established and listed in Table 302.4 of 40 CFR Part 302; for any extremely hazardous substance, the quantity established in 40 CFR Part 355.

58. "*Rubbish*" means nonputrescible solid waste, excluding ashes, that consist of: (a) combustible waste materials, including paper, rags, cartons, wood, excelsior, furniture, rubber, plastics, yard trimmings, leaves, and similar materials; and (b) noncombustible waste materials, including grass, crockery, tin cans, aluminum cans, metal furniture, and similar materials that do not burn at ordinary incinerator temperatures (one thousand six hundred to one thousand eight hundred degrees Fahrenheit).
59. "*Sanitary sewer*" means the system of pipes, conduits, and other conveyances which carry industrial waste and domestic sewage from residential dwellings, commercial buildings, industrial and manufacturing facilities, and institutions, whether treated or untreated, to the city sewage treatment plant (and to which storm water, surface water, and groundwater are not intentionally admitted).
60. "*Septic tank waste*" means any domestic sewage from holding tanks such as vessels, chemical toilets, campers, trailers, and septic tanks.
61. "*Service station*" means any retail establishment engaged in the business of selling fuel for motor vehicles that is dispensed from pumps.
62. "*Sewage*" means the domestic sewage and/or industrial waste that is discharged into the city sanitary sewer system and passes through the sanitary sewer system to the city sewage treatment plant for treatment.
63. "*Site*" means the land or water area where development or redevelopment is physically located or being conducted, including lands adjacent to the development that is not subject to land disturbing activities but that is used as a staging area or for other uses in connection with the new development or redevelopment.
64. "*Solid waste*" means any garbage, rubbish, refuse, sludge from a waste treatment plant, water supply treatment plant, or air pollution control facility, and other discarded material including: solid, liquid, semi-solid, or contained gaseous material resulting from industrial, municipal, commercial, mining, agricultural operations, and community and institutional activities.
65. "*State*" means the state of Kansas.
66. "*Storm water*" means storm water runoff, snow melt runoff, and surface runoff and drainage.
67. "*Storm water discharge associated with industrial activity*" means the discharge from any conveyance which is used for collecting and conveying storm water and which is directly related to manufacturing, processing, or raw materials storage areas at an industrial plant which is listed as one of the categories of facilities in 40 CFR Section 122.26(b)(14), and which is not excluded from EPA's definition of the same term.
68. "*Storm water management facility*" or "*storm water control*" means any structure or installation used to manage storm water quality, flow rate, or volume.
69. "*Storm Water Manual*" refers to the latest version, as amended, of the document on file with the Director of Public Works entitled City of Wichita/Sedgwick County Storm Water Manual.
70. "*Storm water pollution prevention plan (SWP3)*." Means a plan required by an NPDES storm water permit and which describes and ensures the implementation of practices that are to be used to reduce the pollutants in storm water discharges associated with construction or other industrial activity.
71. "*Subdivision development*" means and includes activities associated with the platting of any parcel of land into two or more lots and includes all construction taking place thereon.

72. "*Undisturbed property*" means real property which has not been altered from its natural condition so that the entrance of water into the soil mantle is prevented or retarded through changes to the topography or soils.
73. "*Used oil (or used motor oil)*" means any oil that has been refined from crude oil a synthetic oil that, as a result of use, storage, or handling; has become unsuitable for its original purpose because of impurities or the loss of original properties.
74. "*Water of the state (or water)*" means any groundwater, percolating or otherwise, lakes, bays, ponds, impounding reservoirs, springs, rivers, streams, creeks, estuaries, marshes, inlets, canals, inside the territorial limits of the state, and all other bodies of surface water, natural or artificial, navigable or non-navigable, and including the beds and banks of all water courses and bodies of surface water, that are wholly or partially inside or bordering the state or inside the jurisdiction of the state.
75. "*Water quality standard*" means the designation of a body or segment of surface water in the state for desirable uses and the narrative and numerical criteria deemed by the state to be necessary to protect those uses.
76. "*Waters of the United States*" means all waters which are currently used, were used in the past, or may be susceptible to use in interstate or foreign commerce, including all waters which are subject to the ebb and the flow of the tide; all interstate waters, including interstate wetlands; all other waters the use, degradation, or destruction of which would affect or could affect interstate or foreign commerce; all impoundments of waters otherwise defined as waters of the United States under this definition; all tributaries of waters identified in this definition; all wetlands adjacent to waters identified in this definition; and any water within the federal definition of "waters of the United States" at 40 CFR Section 122.2; but not including any waste treatment systems, treatment ponds, or lagoons designed to meet the requirements of the Federal Clean Water Act.
77. "*Watershed*" means the cumulative area that drains to a common point.
78. "*Watershed plan*" means an engineering and planning study for the drainage system and/or land areas of a watershed that may include a plan for storm water management in the watershed. Watershed plans can include, but are not limited to, the analysis of flooding problems, water quality problems, potential storm water capital improvements, land use patterns, and regulatory issues for existing and potential future land use conditions and address solutions to these problems.
79. "*Wetland*" means any area that is inundated or saturated by surface or groundwater at a frequency and duration sufficient to support, and that under normal circumstances does support, a prevalence of vegetation typically adapted for life in saturated soil conditions. Wetlands generally include swamps, marshes, bogs, and similar areas.
80. "*Yard waste*" means leaves, grass clippings, yard and garden debris, and brush that results from landscaping maintenance and land-clearing operations.

(Ord. No. 44-123 § 1; Ord. No. 48-904, § 1, 11-16-2010)

Sec. 16.32.020. General prohibition.

- A. No person shall introduce or cause to be introduced into the municipal separate storm sewer system (MS4) any discharge that is not composed entirely of stormwater, except as allowed in subsection B.
- B. The following nonstormwater discharges are deemed acceptable and not a violation of this

section:

1. A discharge authorized by, and in full compliance with, an NPDES permit (other than the NPDES permit for discharges from the MS4);
2. A discharge or flow resulting from emergency fire fighting;
3. A discharge or flow of fire protection water that does not contain oil or hazardous substances or materials;
4. A discharge from water line flushing;
5. A discharge or flow from lawn watering, landscape irrigation, or other irrigation water;
6. A discharge or flow from a diverted stream flow or natural spring;
7. A discharge or flow from uncontaminated pumped groundwater or rising groundwater;
8. Uncontaminated groundwater infiltration;
9. Uncontaminated discharge or flow from a foundation drain, crawl space pump, footing drain, or sump pump;
10. A discharge or flow from a potable water source not containing any harmful substance or material from the cleaning or draining of a storage tank or other container;
11. A discharge or flow from air conditioning condensation that is unmixed with water from a cooling tower, emissions scrubber, emissions filter, or any other source of pollutant;
12. A discharge or flow from individual residential car washing;
13. A discharge or flow from a riparian habitat or wetland or natural spring;
14. A discharge or flow from water used in street washing that is not contaminated with any soap, detergent, degreaser, solvent, emulsifier, dispersant, or any other harmful cleaning substance;
15. Stormwater runoff from a roof that is not contaminated by any runoff or discharge from an emissions scrubber or filter or any other source of pollutant;
16. Swimming pool water, excluding filter backwash; that has been dechlorinated so that it contains no harmful quantity of chlorine, muriatic acid or other chemical used in the treatment or disinfection of the swimming pool water or in pool cleaning;
17. Heat pump discharge waters (residential only).

C. Notwithstanding the provisions of subsection B of this section, any discharge shall be prohibited by this section if the discharge in question has been determined by the director to be a source of a pollutants to the waters of the United States or to the MS4, written notice of such determination has been provided to the discharger, and the discharge has occurred more than ten days beyond such notice.

(Ord. No. 44-123 § 2)

Sec. 16.32.030. Specific prohibitions and requirements.

- A. The specific prohibitions and requirements in this section are not necessarily inclusive of all the discharges prohibited by the general prohibition in Section 16.32.020.
- B. No person shall introduce or cause to be introduced into the MS4 any discharge that causes or contributes to causing the city to violate a KDHE water quality standard, the city's NPDES

stormwater permit, or any state-issued discharge permit for discharges from its MS4.

C. No person shall dump, spill, leak, pump, pour, emit, empty, discharge, leach, dispose, or otherwise introduce or cause, allow, or permit to be introduced the following substances into the MS4:

1. Any used motor oil, antifreeze or any other petroleum product or waste;
2. A harmful quantity of industrial waste;
3. Any hazardous waste, including household hazardous waste;
4. Any domestic sewage or septic tank waste, grease trap waste, or grit trap waste;
5. Any garbage, rubbish, or yard waste;
6. Wastewater that contains a harmful quantity of soap, detergent, degreaser, solvent, or surfactant based cleaner from a commercial carwash facility; from any vehicle washing, cleaning, or maintenance at any new or used automobile or other vehicle dealership, rental agency, body shop, repair shop, or maintenance facility; or from any washing, cleaning, or maintenance of any business or commercial or public service vehicle, including a truck, bus or heavy equipment, by a business or public entity that operates more than five such vehicles;
7. Wastewater from the washing, cleaning, de-icing, or other maintenance of aircraft;
8. Wastewater from a commercial mobile power washer or from the washing or other cleaning of a building exterior that contains any harmful quantity of soap, detergent, degreaser, solvent, or any surfactant based cleaner;
9. Any wastewater from commercial floor, rug, or carpet cleaning;
10. Any wastewater from the washdown or other cleaning of pavement that contains any harmful quantity of soap, detergent solvent, degreaser, emulsifier, dispersant, or any other harmful cleaning substance; or any wastewater from the wash-down or other cleaning of any pavement where any spill, leak, or other release of oil, motor fuel, or other petroleum or hazardous substance has occurred, unless all harmful quantities of such released material have been previously removed;
11. Any effluent from a cooling tower, condenser, compressor, emissions scrubber, emission filter, or the blowdown from a boiler;
12. Any ready-mixed concrete, mortar, ceramic, asphalt base material or hydromulch material, or discharge resulting from the cleaning of vehicles or equipment containing or used in transporting or applying such material;
13. Any runoff, washdown water or waste from any animal pen, kennel, fowl or livestock containment area;
14. Any filter backwash from a swimming pool or fountain;
15. Any swimming pool water containing a harmful level of chlorine, muriatic acid or other chemical used in the treatment or disinfection of the swimming pool water or in pool cleaning;
16. Any discharge from water line disinfection by super chlorination if it contains a harmful level of chlorine at the point of entry into the MS4 or waters of the United States;
17. Any water from a water curtain in a spray room used for painting vehicles or equipment;
18. Any contaminated runoff from a vehicle wrecking yard;
19. Any substance or material that will damage, block, or clog the MS4;

20. Any release from a petroleum storage tank (PST), or any leachate or runoff from soil contaminated by leaking PST; or any discharge of pumped, confined, or treated wastewater from the remediation of any such PST release, unless the discharge has received an NPDES permit from the state.

D. No person shall introduce or cause to be introduced into the MS4 any harmful quantity of sediment, silt, earth, soil, or other material associated with clearing, grading, excavation or other construction activities in excess of what could be retained on site or captured by employing sediment and erosion control measures to the maximum extent practicable under prevailing circumstances.

E. No person shall connect a line conveying sanitary sewage, domestic or industrial, to the MS4, or allow such a connection to continue.

F. Regulation of Pesticides and Fertilizers.

1. No person shall use or cause to be used any pesticide or fertilizer in any manner that the person knows, or reasonably should know, is likely to cause, or does cause, a harmful quantity of the pesticide or fertilizer to enter the MS4 or waters of the United States.

2. No person shall dispose of, discard, store, or transport a pesticide or fertilizer, or its container, in a manner that the person knows, or reasonably should know, is likely to cause, or does cause, a harmful quantity of the pesticide or fertilizer to enter the MS4 or waters of the United States.

G. Used Oil Regulation.

1. No person shall discharge used oil into the MS4 or a sewer, drainage system, septic tank, surface water, groundwater, or water course.

H. Cleanup. Should it be determined by the director that any person or business has allowed any pollutant into the MS4 or waters of the United States, immediate measures will be taken by the responsible party to remove the pollutants. If the pollutants are not removed within the time period specified by the director, the city may remove the pollutants and assess the cost thereof to the responsible party. The city may use any legal means to collect said cost, should the responsible party fail to pay said cost within forty-five days.

(Ord. No. 44-123 § 3)

Sec. 16.32.040. Release reporting and cleanup.

A. Any person responsible for any release of any hazardous material that may flow, leach, enter, or otherwise be introduced into the MS4 or waters of the United States shall comply with all state, federal, and any other local law requiring reporting, clean-up, containment, and any other appropriate remedial action in response to the release.

B. Within thirty days following such release, the Wichita fire department shall submit a written report to the public works department detailing spill information and the methods used to remedy the problem.

(Ord. No. 44-123 § 4)

Sec. 16.32.050. Stormwater discharges from construction activities.

A. *General requirements (all sites).*

1. The owners of construction sites shall ensure that best management practices are

used to control and reduce the discharge of pollutants into the MS4 and waters of the United States to the maximum extent possible under the circumstances.

2. Qualified personnel (provided by the owner of the construction site) shall inspect disturbed areas that have not been finally stabilized, areas used for storage of materials that are exposed to precipitation, structural control measures, and locations where vehicles enter or exit the site, at least once every seven calendar days and within twenty-four hours of the end of a storm that is one-half inch or greater. All erosion and sediment control measures and other identified best management practices shall be observed in order to ensure that they are operating correctly and are effective in preventing significant impacts to receiving waters and the MS4. Based on the results of the inspection, the best management practices shall be revised as appropriate as soon as practicable. These inspections, along with a description of revisions, will be documented in writing and available for inspection by the director and OCI upon request.

3. Should it be found that soil or pollutants have already or may be carried into the MS4 or waters of the United States, immediate measures will be taken by the owner to remedy the violation and/or remove the pollutants. If the owner fails to remove pollutants within the time period prescribed in the notice of violation from the city, the city may remove the pollutants and assess the cost thereof to the responsible owner. Failure of the owner to pay said costs will be grounds for the denial of further approvals or the withholding of occupancy certificates.

4. When determined to be necessary for the effective implementation of this section, the director may require any plans and specifications that are prepared for the construction of site improvements to illustrate and describe the best management practices required by subsection A.1 of this section above that will be implemented at the construction site. Should the proper BMP's not be installed or if the BMP's are ineffective, upon reasonable notice to the owner, the city may deny approval of any building permit, grading permit, subdivision plat, site development plan, or any other city approval necessary to commence or continue construction, or to assume occupancy.

5. The owner of a site of construction activity is responsible for compliance with the requirements in this subsection. In the case of new subdivisions, builders on individual lots can operate under the developers NPDES permit if the developer's SWP3 deals with individual lots and the contractors certification has been signed.

6. Any contractor on a construction site will also be required to use best management practices so as to minimize pollutants that enter into the MS4.

7. All persons shall avoid damaging BMP devices once in place. Any person damaging a BMP device shall be responsible for the repair of the damaged BMP device. Malicious destruction of a BMP device or failure of such responsible person to repair BMP device will be deemed a violation of this chapter.

B. Sites Requiring Federal and/or State NPDES Stormwater Discharge Permits. All owners of and contractors on sites of construction activity, that require a federal or state NPDES stormwater discharge permit, or that are part of a common plan of development or sale requiring said permit(s), shall comply with the following requirements (in addition to those in subsection A):

1. Any owner who intends to obtain coverage for stormwater discharges from a construction site under the Kansas General Permit for Stormwater Discharges From Construction Sites ("the construction general permit") shall submit a signed copy of its notice of intent (NOI) to OCI when a building permit application is made. If the construction activity is already underway upon the effective date of this chapter, [January 1, 1999] the NOI shall be submitted within thirty days. When ownership of the construction site changes, a revised NOI shall be submitted within fifteen days of the change in ownership.

2. A stormwater pollution prevention plan (SWP3) shall be prepared and implemented in accordance with the requirements of the construction general permit or any individual or group NPDES permit issued for stormwater discharges from the construction site, and with any additional requirement imposed by or under this chapter and any other city ordinance.
3. The SWP3 shall be prepared by a qualified person and shall comply with State NPDES requirements. The signature of the preparer shall constitute his/her attestation that the SWP3 fully complies with the requirements of the permit issued.
4. The SWP3 shall be completed prior to the submittal of the NOI to OCI and for new construction, prior to the commencement of construction activities. The SWP3 shall be updated and modified as appropriate and as required by the NPDES permit.
5. The director and/or OCI may require any owner who is required by subsection B.2 of this section to prepare a SWP3, to submit the SWP3, and any modifications thereto, to the Director and/or OCI for review at any time.
6. Upon the director's review of the SWP3 and any site inspection that he/she may conduct, if the SWP3 is not being fully implemented, the director may upon reasonable notice to the owner, deny approval of any building permit, grading permit, site development plan, final occupancy certificate, or any other city approval necessary to commence or continue construction. A stop work order may also be issued.
7. All contractors working on a site subject to an NPDES permit shall sign a copy of the following certification statement before beginning work on the site:

I certify under penalty of law that I understand the terms and conditions of the National Pollutant Discharge Elimination System (NPDES) permit that authorizes the stormwater discharges associated with construction activity from the construction site identified as part of this certification and with the Stormwater Pollution Prevention Plan Chapter of the city, and I agree to implement and follow the provisions of the Stormwater Pollution Prevention Plan (SWP3) for the construction site;

The certification must include the name and title of the person providing the signature; the name, address, and telephone number of the contracting firm; the address (or other identifying description) of the site; and the date the certification is made.

All contractors will be responsible for their own activities to ensure that they comply with the owners' SWP3. Failure to comply with the SWP3 or malicious destruction of BMP devices is hereby deemed to be a violation of this chapter.
8. The SWP3 and the certifications of contractors required by subsection B.7 of this section, and with any modifications attached, shall be retained at the construction site or at a local office in Wichita from the date of construction commencement through the date of final stabilization.
9. The director may notify the owner at any time that the SWP3 does not meet the requirements of the NPDES permit issued or any additional requirement imposed by or under this chapter. Such notification shall identify those provisions of the permit or chapter which are not being met by the SWP3, and identify which provisions of the SWP3 require modification in order to meet such requirements. Within thirty days of such notification from the director, the owner shall make the required changes to the SWP3 and shall submit to the director a written certification from the owner that the requested changes have been made.
10. The owner shall amend the SWP3 whenever there is a change in design, construction, operation, or maintenance, which has a significant effect on the potential for the discharge of pollutants to the MS4 or to the waters of the United States, and which has not otherwise been addressed in the SWP3, or if the SWP3 proves to be

ineffective in eliminating or significantly minimizing pollutants, or in otherwise achieving the general objective of controlling pollutants in stormwater discharges.

11. Qualified personnel (provided by the owner of the construction site) shall inspect disturbed areas that have not been finally stabilized, areas used for storage of materials that are exposed to precipitation, structural control measures, and locations where vehicles enter or exit the site, at least once every seven calendar days and within twenty-four hours of the end of the storm that is one-half inch or greater. Disturbed areas and areas used for storage of materials that are exposed to precipitation shall be inspected for evidence of, or the potential for, pollutants entering the drainage system. Erosion and sediment control measures identified in the SWP3 shall be observed to ensure that they are operating correctly. Where discharge locations or points are accessible, they shall be inspected to ascertain whether erosion control measures are effective in preventing significant impacts to receiving waters or the MS4. Locations where vehicles enter or exit the site shall be inspected for evidence of off-site sediment tracking.

12. Based on the results of the inspections required by subsection B.11 of this section, the pollution prevention measures identified in the SWP3 shall be revised as appropriate. Such modifications shall provide for timely implementation of any changes to the SWP3 within ten calendar days following the inspection.

13. A report summarizing the scope of any inspection required by subsection B.11 of this section, and the names(s) and qualifications of personnel making the inspection, the date(s) of the inspection, major observations relating to the implementation of the SWP3, and actions taken in accordance with subsection B.12 of this section above shall be made and refined on site or at a local office in Wichita as part of the SWP3. Such report shall identify any incidence of noncompliance. Where a report does not identify any incidence of noncompliance, the report shall contain a certification that the facility is in compliance with the SWP3, the facility's NPDES permit, and this chapter. The report shall be certified and signed by the person responsible for making it.

14. The owner shall retain copies of any SWP3 and all reports required by this chapter or by the NPDES permit for the site, and records of all data used to complete the NOI for a period of at least three years from the date that the site is finally stabilized.

15. Upon final stabilization of the construction site, the owner shall submit written certification to the director and OCI that the site has been finally stabilized. The city may withhold the final occupancy or use permit for any premises constructed on the site until such certification of final stabilization has been filed and the director has determined, following any appropriate inspection, that final stabilization has occurred and that any required permanent structural controls have been completed.

(Ord. No. 44-123 § 5)

Sec. 16.32.060. Stormwater discharges associated with industrial activity.

A. All operators of: (1) municipal landfills; (2) hazardous waste treatment, disposal, and recovery facilities; (3) industrial facilities that are subject to Section 313 of Title III of the Superfund Amendments and Reauthorization Act of 1986 (SARA) 42, U.S.C. Section 11023; industrial facilities required to obtain NPDES stormwater discharge permits due to their Standard Industrial Classification or narrative description; and (4) industrial facilities that the director determines are contributing a substantial pollutant loading to the MS4, which are sources of stormwater discharges associated with industrial activity, shall comply with the following requirements:

1. Any owner who intends, after the effective date of this chapter,* to obtain coverage

for a stormwater discharge associated with industrial activity under the Kansas General Permit for Stormwater Discharges Associated With Industrial Activity ("the industrial general permit") shall submit a signed copy of its notice of intent (NOI) to the director.

*Editor's note: Ordinance 44-123, which enacted Chapter 16.32, is effective on January 1, 1999.

2. When required by their NPDES permit, all industries listed in this section shall prepare a stormwater pollution prevention plan (SWP3) and implement said plan in accordance with the requirements of their state or federal NPDES permit.
3. The SWP3, when required, shall be prepared and signed by a qualified individual and will comply with all state NPDES requirements. The signature of the preparer shall constitute his/her attestation that the SWP3 fully complies with the requirements of the NPDES permit.
4. The SWP3, when required, shall be updated and modified as appropriate and as required by the NPDES permit and this chapter.
5. A copy of any NOI that is required by subsection A.1 of this section shall be submitted to the city in conjunction with any application for a permit or any other city approval necessary to commence or continue operation of the industrial facility.
6. The Director may require any operator who is required by subsection A.2 of this section to prepare a SWP3, to submit the SWP3, and any modifications thereto, to the director for review.
7. Upon the director's review of the SWP3 and any site inspection that he/she may conduct, the director may upon reasonable notice to the owner deny approval necessary to commence or continue operation of the facility, on the grounds that the SWP3 does not comply with the requirements of the NPDES permit, or any additional requirement imposed by or under this chapter. Also, if at any time the director determines that the SWP3 is not being fully implemented, upon reasonable notice to the owner, he/she may deny approval of any application for a permit or other city approval necessary to commence or continue operation of the facility.
8. The SWP3, if required, with any modifications attached, shall be retained at the industrial facility from the date of commencement of operations until all stormwater discharges associated with industrial activity at the facility are eliminated and the required notice of termination (NOT) has been submitted.
9. The director may notify the owner at any time that the SWP3 does not meet the requirements of the NPDES permit, or any additional requirement imposed by or under this chapter. Such notification shall identify those provisions of the permit or chapter which are not being met by the SWP3, and identify which provisions require modification in order to meet such requirements. Upon thirty days of such notification from the director, the owner shall submit to the director a written certification that the requested changes have been made.
10. The owner shall amend the SWP3, if required, whenever there is a change in design, construction, operation, or maintenance, which has a significant effect on the potential for the discharge of pollutants to the MS4 or to the waters of the United States, or if the SWP3 proves to be ineffective in eliminating or significantly minimizing pollutants, or in otherwise achieving the general objective of controlling pollutants in stormwater discharges.
11. As may be required by the facilities NPDES permit, qualified personnel (provided by

the owner) shall inspect equipment and areas of the facility specified in the SWP3 at appropriate intervals or as may be specified in their NPDES permit. A set of tracking or follow up procedures shall be used to ensure that appropriate actions are taken in response to the inspections. Records of inspection shall be maintained.

12. Industrial facilities will implement a sampling and testing program as required by their individual NPDES permits. The director may require written reports of any such monitoring and testing to be submitted to him/her.

13. The owner shall retain the SWP3 and all sampling and testing reports until at least one year after stormwater discharges associated with industrial activity at the facility are eliminated, or the operator is no longer operating the facility, and a notice of termination (NOT) has been submitted.

14. For discharges subject to the semi-annual or annual monitoring requirements of the industrial general permit, in addition to the records-retention requirements of the paragraph above, owners are required to retain for a six year period from the date of sample collection, records of all sampling and testing information collected. Owners must submit such monitoring results, and/or a summary thereof, to the director upon his/her request.

15. After the effective date of this chapter,* no stormwater discharge shall contain any hazardous metals in a concentration that would result in the violation of any Kansas Surface Water Quality Standard.

(Ord. No. 44-123 § 6)

*Editor's note: Ordinance 44-123, which enacted Chapter 16.32, is effective on January 1, 1999.

Sec. 16.32.070. Ditches and ponds.

A. *Duty to Maintain.* The owner of any private drainage ditch or pond that empties into the city's MS4 or the waters of the United States has a duty to use BMP's on the ditches or pond to minimize the pollutant levels downstream. Such BMP's include, but are not limited to, removing excessive build-up of silt, repairing bank erosion, maintaining vegetative cover, the cleaning of inlet and outlet works, and the like.

B. *Inspection and Notice by City.* The city will periodically inspect these privately owned ditches and ponds. Should conditions be found that cause the pollution of downstream receiving waters, the director shall so notify the owners, and state what actions are expected by the owners to remedy the problem.

C. *Failure to Repair.* Should the owners fail to make the necessary repair within one hundred twenty days after notice, the city is authorized to do the repairs at the expense of the owner. Should the owner fail to reimburse the city for the cost of the repairs upon demand, the city may assess the cost thereof to the owner and initiate any collection proceedings authorized by law.

(Ord. No. 44-123 § 7)

Sec. 16.32.080. Compliance monitoring.

A. *Right of entry.* The Director, the Superintendent of OCI and the City Health Officer, or their authorized representatives, shall have the right to enter the premises of any person discharging

storm water to the municipal separate storm sewer system (MS4) or to waters of the United States at any reasonable time to determine if the discharger is complying with all requirements of this chapter, and with any state or federal discharge permit, limitation, or requirement. Dischargers shall allow the inspectors ready access to all parts of the premises for the purposes of inspection, sampling, records examination and copying, and for the performance of any additional duties.

B. *Records.* Subject to the requirements of subsection A, dischargers shall make available, upon request, any SWP3's, modifications thereto, self-inspection reports, monitoring records, compliance evaluations, notice of intent, and any other records, reports, and other documents related to compliance with this chapter and with any state or federal discharge permit.

C. *Sampling.* The Director shall have the right to set up on the discharger's property such devices that are necessary to conduct sampling of storm water discharges.

(Ord. No. 44-123 § 8; Ord. No. 48-904, § 2, 11-16-2010)

Sec. 16.32.090. Subdivision development.

A. The developer of any subdivision requiring a federal or state NPDES stormwater discharge permit will be responsible for obtaining the required permit and developing and implementing an overall SWP3 for the subdivision. Said SWP3 shall include BMP's to be used on individual lot building sites.

B. City contractors installing public streets; water, sanitary sewer, storm sewer lines; and/or sidewalks will be required to comply with the developers SWP3's and sign the appropriate contractor certification statement. For work in public right-of-way or easements requiring a federal or state NPDES stormwater discharge permit, the city shall be responsible for obtaining the required permit and preparing and implementing the required SWP3's.

C. Any utility company installing utilities within a new subdivision will also be required to comply with the developers SWP3's and sign the appropriate contractor certification statement. For work in public rights-of-way or easements requiring a federal or state NPDES stormwater discharge permit, the utility company shall be responsible for obtaining the required permit and preparing and implementing the required SWP3's.

D. The purchasers or individual lots within the subdivision for construction purposes shall comply with the developers SWP3 and shall sign a certification statement agreeing to do so.

(Ord. No. 44-123 § 9)

Sec. 16.32.091. Storm water quality management standards

A. Applicability.

1. Water quality treatment and downstream channel protection shall be required of owners of new developments and redevelopments that cause a land disturbance greater than or equal to one acre, including projects that cause a land disturbance less than one acre that are part of a larger common plan of development or sale.

2. The requirements of 16.32.091 shall not apply to:

i. new developments or redevelopments that have a construction plan approved by January 1, 2011 and will have completed construction of all storm water management facilities within 90 days of January 1, 2011. This does not exempt such new developments from water quality management regulations that may be required in the future by EPA or KDHE; or,

- ii. redevelopment projects that consist solely of ordinary maintenance activities, remodeling of buildings on the existing foundation, resurfacing (milling and overlay) of existing paved areas, and exterior changes or improvements.

B. *Water quality treatment standard for new developments.* Storm water runoff from applicable new developments must be treated for water quality prior to discharge from the development site in accordance with the storm water treatment standards and criteria provided in the Storm Water Manual.

C. *Water quality treatment standard for redevelopments.* Owners of applicable redevelopments must adhere to one of the following requirements.

1. The total impervious cover of the property after redevelopment shall be reduced by at least 20% from the total impervious cover of the property prior to the proposed redevelopment.
2. Storm water runoff from at least 30% of the site's existing impervious cover and for 100% of any new land disturbance that will result from the proposed redevelopment shall be treated for water quality prior to discharge from the redevelopment site in accordance with the storm water treatment standards and criteria provided in the Storm Water Manual.
3. The owner shall provide storm water controls at an alternative location in the same watershed as the proposed redevelopment. The level of storm water control provided shall be equivalent to what would have been provided at the proposed redevelopment for either requirement 1 or 2 above, at a minimum.
4. In agreement and partnership with the City of Wichita, the owner shall provide engineering design and/or construction activities to address one or more known downstream water quality or channel erosion issues located within the same watershed as the proposed redevelopment, through stream restoration and/or other off-site remedies approved by the Director.
5. The owner shall pay a fee in-lieu-of water quality control and channel protection control, in an amount to be determined by the city in accordance with the in-lieu-of fee schedule as adopted by the City Council of the City of Wichita per the watershed plan which covers the redevelopment.
6. Any combination of (1) through (5) above may be acceptable to the City of Wichita or other solution(s) approved by the Director that meets the intent of this chapter.

D. *Downstream stabilization standard.* Downstream long-term channel protection shall be provided for applicable new developments and redevelopments prior to discharge from the new/redevelopment site in accordance with the downstream stabilization standards and criteria provided in the Storm Water Manual.

(Ord. No. 48-904, § 3, 11-16-2010)

Sec. 16.32.092. Storm water quantity management standards

A. *Applicability.* Storm water runoff peak discharge analysis and control shall be required for new developments and redevelopments that will create or add one acre or greater of impervious cover, including projects that have less than one acre in impervious cover that are part of a larger common plan of development or sale that will result in one acre or greater of impervious cover.

B. *Water quantity management standard.* Storm water runoff peak discharge analysis and control shall be required for applicable new developments or redevelopments in accordance

with the storm water quantity standards and criteria provided in the Storm Water Manual.

(Ord. No. 48-904, § 4, 11-16-2010)

Sec. 16.32.093. Other storm water management requirements

A. *Applicability.* Section 16.32.093 is applicable to new developments and redevelopments that are required to comply with section 16.32.091 and/or section 16.32.092.

B. *Alternative standards for individual watersheds.* Alternative storm water management standards, either lesser or greater than those specified in this chapter, may be required by the Director in those areas or watersheds where water quality, flooding or erosion problems are known to exist, or in individual watersheds where a watershed plan or storm water master plan, approved by the City Council of the City of Wichita, specifies such alternative standards.

C. *Other requirements for storm water discharges.*

1. Storm water discharges shall be managed in consideration of the erosion control measures detailed in the Storm Water Manual.

2. Any discharge of storm water runoff to groundwater must meet all applicable local, State and Federal requirements, permits, plans and programs. The owner is responsible for complying with all local State and Federal permits that are applicable to the site.

D. *Requirement to stabilize banks.* Banks of all streams, channels, ditches and other earthen storm water conveyances shall be left in a stabilized condition upon completion of the new development or redevelopment. No actively eroding, bare or unstable vertical banks shall remain after completion of construction.

E. *Requirement to use the Storm Water Manual.* All storm water facilities and systems, including those designed and constructed for water quality treatment, downstream channel stabilization, and peak discharge control shall be designed, constructed and maintained in accordance with the criteria, standards, and specifications presented in this chapter and in the Storm Water Manual. The standards for water quality treatment, downstream channel stabilization and peak discharge analysis and control shall be achieved through the use of one or more storm water quality management facilities that are designed and constructed in accordance with the design criteria, guidance, and specifications provided in the Storm Water Manual. Methods, designs or technologies for storm water quality management facilities that are not provided in the Storm Water Manual may be submitted for approval by the city if it is proven that such methods, designs or technologies will meet or exceed the storm water treatment standards set forth in the Storm Water Manual and this ordinance. Proof of such methods, designs, or technologies must meet the minimum testing criteria set forth in the Storm Water Manual.

F. *Storm water facilities on public property.* Storm water management facilities shall not be installed within public rights-of-way or on public property unless a permit has been issued by the city engineer.

(Ord. No. 48-904, § 5, 11-16-2010)

Sec. 16.32.094. Waivers and exemptions from storm water management standards for new developments

A. *Exemptions.* Owners of properties where the following activities are undertaken are exempt from the requirements of sections 16.32.091, 16.32.092, 16.32.093 and 16.32.094 of this chapter.

1. Minor land disturbing activities at individual locations, such as gardening, building or grounds maintenance and landscaping, provided that the activity does not result in equal to or greater than one (1) acre of land disturbance;
2. Individual utility service connections, unless such activity is carried-out in conjunction with the clearing, grading, excavating, transporting, or filling of a lot or lots for which a grading permit would otherwise be required by regulation;
3. Installation, maintenance or repair of individual septic tank lines or drainage fields, unless such activity is carried out in conjunction with the clearing, grading, excavating, transporting, or filling of a lot or lots for which a grading permit would otherwise be required by the regulation;
4. Installation of posts or poles;
5. Farming activities;
6. Unplanned emergency work and emergency repairs necessary to protect life or property.

B. *Waivers.* All or some of the storm water management standards required in section 16.32.091 and/or 16.32.092 of this chapter may be waived by the Director under the following circumstances.

1. *Existing Downstream Facilities.* A waiver may be provided for one or more storm water management standards if the waived standard(s) are met by discharging the storm water runoff to an existing storm water management facility, whether public or private, that is:
 - i. provided in accordance with an existing watershed plan that is approved by the city; and,
 - ii. already in existence, or will be in existence at the time of construction of the new development or redevelopment; and,
 - iii. designed, constructed and maintained to provide a level of storm water control that is equal or greater than that which would be afforded by on-site storm water management facilities.
 - iv. If a waiver is provided for this reason, the owner of the new development or redevelopment will be required to pay a fee in-lieu-of water quality control, downstream channel stabilization and peak discharge control, in an amount to be determined by the city in accordance with an adopted in-lieu-of fee schedule as adopted by the City Council of the City of Wichita per the watershed plan which covers the new development or redevelopment.
2. *Adverse Impact.* A waiver may be provided if engineering studies determine that installing a storm water management facility in order to meet the storm water management standard being considered for waiver will cause adverse impact to water quality, or cause increased channel erosion, or downstream flooding.
3. *Technical Criterion.* A waiver may be provided if the technical criterion required to waive the storm water management standard, as presented in the Storm Water Manual, is met. In any case, a waiver is subject to satisfaction of the following requirements, which shall be shown in drainage plans submitted for the new development or redevelopment:
 - i. the waiver applicant shall provide an engineering study, as defined in 16.32.094.C that proves the adequacy of downstream or shared off-site storm water management facilities to offer equivalent or greater protection than the standard(s) for which a waiver is requested; and,

- ii. the waiver applicant obtains any necessary CLOMR prior to construction, and a LOMR upon completion of construction; and,
- iii. the waiver applicant obtains all State and Federal permits that may be applicable to the site.

C. *Engineering study required.* In the event that a waiver from storm water management control requirements is requested, the adequacy of downstream or shared off-site storm water management facilities to control storm water runoff shall be determined, reviewed and approved by an engineering study that is performed in accordance with the calculation methods presented in the Storm Water Manual. The engineering studies shall be performed at the expense of the owner(s) of the proposed new development or redevelopment, unless a study has already been or is being performed by the city as part of a watershed plan or other land use plan.

(Ord. No. 48-904, § 6, 11-16-2010)

Sec. 16.32.095. General requirements for storm water design plans

- A. *[Design information.]* Storm water design information shall be submitted as part of the preliminary plat, final plat and construction plans, in accordance with the site development process established by the city.
- B. *[Building permit.]* A building permit shall not be issued for the land development activity until the required storm water design information and corresponding plans are approved by the city.
- C. *[Submission.]* At a minimum, the storm water design information submitted at each stage of the city development process shall include the specific required elements that are listed and/or described in the Storm Water Manual, and shall be prepared in accordance with the policies, guidance and calculation methods (unless equivalent methods are pre-approved by the city) presented in the Storm Water Manual. Additional storm water design information may be required as necessary to allow an adequate review of the existing or proposed site conditions.
- D. The submittal of storm water design information shall be subject to the requirements set forth in the minimum subdivision regulations, zoning ordinance, or other city regulations.
- E. *[Supervision.]* Storm water design information shall be prepared under the supervision of and stamped by a professional engineer licensed to practice in the State of Kansas.
- F. *[Viability.]* The portions of the new development or redevelopment on which storm water management facilities and systems are located shall be shown on the preliminary and final plats for all residential subdivisions and recorded with the plat as permanent reserves or easements consistent with the policies stated in the Storm Water Manual. Non-residential plats and/or subdivisions having a total area less than or equal to 15 acres shall be required to demonstrate the viability of proposed storm water management facilities and systems. In such cases, the Director is authorized to allow contingent dedications for storm water facilities providing that the owner/developer enters into an agreement with the City guaranteeing the construction of the said facilities in accordance with a schedule approved in the said agreement.
- G. *Conformity to the approved plans.*
 - 1. Grading designs shown on approved master grading plans and the design of storm water facilities and controls shown on approved design plans shall be adhered to during grading and construction activities. Under no circumstance is the owner or operator of land development activities allowed to deviate from the approved plans without prior approval of a plan amendment by the city.
 - 2. Grading and storm water design plans shall be amended to meet all local ordinances and standards if the proposed site conditions change after plan approval is obtained, or

if it is determined by the city during the course of grading or construction that the approved plan is inadequate.

H. *Duty to provide an operations and maintenance plan.*

1. An Operations and Maintenance Plan shall be included with the storm water design information submitted with the construction plan. The Operations and Maintenance Plan shall include the required operation and maintenance provisions for each storm water management facility and water quality volume reduction area that is serving, or will serve, the development or redevelopment. The Operations and Maintenance Plan shall include all of the required elements that are listed and/or described in the Storm Water Manual, and shall be prepared in accordance with the policies and guidance provided in the Storm Water Manual.

2. The Operations and Maintenance Plan shall include an executed legal document entitled "Restrictive Covenants for Storm Water Facilities" (Covenants). The property owner shall record the Covenants with the deed for the property. The location of the storm water management facility(s) and water quality volume reduction areas, the recorded location of the Covenants document, and inspection and maintenance guidance outlining the property owner's responsibility shall be shown on a plat that is recorded for the property

I. *Duty to provide storm water construction information on as-built drawings.*

1. Prior to the release of the performance bond, complete As-Built Drawings shall be provided to the Director, and shall include sufficient design information to show that the storm water facilities will operate as designed under the approved drainage plan.

2. The As-Built Drawings shall include the required elements that are listed and/or described in the Storm Water Manual, and shall be prepared in accordance with the policies and guidance provided in the Storm Water Manual.

3. The As-Built Drawings shall be prepared and stamped by a professional engineer licensed to practice in the State of Kansas.

(Ord. No. 48-904, § 7, 11-16-2010)

Sec. 16.32.096. Maintenance and inspection of storm water drainage paths and controls.

A. *Duty to inspect and maintain storm water systems and controls.* Property owners shall at all times properly maintain and shall at intervals in accordance with the Operations and Maintenance Plan inspect all storm water facilities, systems, conveyances, pipes, channels, ditches, swales, inlets, catchbasins, water quality volume credit areas, and other facilities and systems of storm water treatment and control (and related appurtenances) so that they operate at their full function. Maintenance and inspection of privately-owned storm water management facilities, systems, conveyances, pipes, channels, ditches, swales, inlets, catchbasins, water quality volume credit areas, and other facilities and systems of storm water treatment and control (and related appurtenances) shall be performed at the expense of the owner(s) of such facilities.

B. *Duty to provide inspection reports.* After construction of each storm water management facility on the property is complete, property owners shall provide to the Director on a bi-annual basis a completed and signed copy of the inspection report for each storm water management facility that is included with the Operations and Maintenance Plan for the property. The inspection report is due every two years no later than the date (month and day) of approval of the as-built plan for the property.

C. *Duty to preserve approved grading designs.* Re-grading an individual lot or lots, or portions of a lot or lots, in a manner that is in not accordance the approved master grading plan, such that the direction(s) of storm water runoff is altered from the direction that would occur under the approved master grading plan, shall be considered a violation of this chapter.

D. *Duty to preserve existing drainage paths.* Blockage of a channel, ditch, stream or any other drainage path or storm water system appurtenance that is located in a storm water easement or drainage easement shall be considered a violation of this chapter.

E. *Pollutant removal for maintenance.* The removal of pollutants, sediment and/or other debris for the purpose of maintenance of storm water management facilities shall be performed in accordance with all city, State, and Federal laws.

F. *Inspection during grading or construction.*

1. During grading or construction, the property owner or his/her appointed designee shall conduct site inspections in accordance with the requirements stated in the Kansas General Permit for Storm Water Discharges from Construction Sites. The property owner will also ensure construction conformance with the approved drainage and construction plans. More stringent inspection requirements may be imposed as necessary for purposes of water quality protection and public safety and to pursue total conformance of the site with the approved plans.

2. The following areas and items must be inspected throughout grading and construction to ensure that land disturbance activities do not cause adverse impacts to the performance of storm water management facilities and/or water quality volume reduction areas:

- i. all unstabilized areas that drain to a permanent storm water facility or water quality volume reduction area;
- ii. temporary and permanent storm water management facilities; and,
- iii. all erosion prevention and sediment control measures.

G. *Inspection after construction.* Once the site has been stabilized and construction has ceased, the property owner or his/her appointed designee shall conduct routine inspections for the storm water management facilities and water quality reduction areas, based on the guidance provided in the Operations and Maintenance Plan and the requirements of the "Restrictive Covenants for Storm Water Facilities" for the property, as set forth in section 16.32.095.H.2. of this ordinance.

H. *Inspection records.* Property owners shall make available upon request any self-inspection reports, monitoring/maintenance records, compliance evaluations, notices of intent, and any other records, reports, receipts, and other documents related to compliance with this chapter and with any related local, State or Federal permit.

I. *Right-of-entry.* The Director or his/her designee shall have the right to enter the premises of any person discharging storm water to the MS4 or to waters of the United States at any reasonable time to determine if the discharger is complying with all requirements of this chapter, and with any State or Federal discharge permit, limitation, or requirement. Dischargers shall allow the Director or his/her designee ready access to all parts of the premises for the purposes of inspection, sampling, records examination and copying, and for the performance of any additional duties. Failure of a property owner to allow entry onto a property for the purposes set forth in this section shall be cause for the issuance of a stop work order, withholding of a certificate of occupancy, and/or civil penalties and/or damage assessments in accordance with the enforcement provisions of this chapter.

J. *Inspection and notice by City.* The city may periodically inspect these privately owned storm water controls. If the facility is not operating as shown in the approved As-Built Drawing, or

should conditions be found that cause or may cause the pollution of downstream receiving waters or the erosion of downstream channels or the flooding of adjacent or downstream properties, the Director may issue a notice of violation in accordance with the enforcement provisions stated in this chapter and shall notify the property owner(s) of the potential violation (s). The Director may order the property owner(s) to perform corrective actions as are necessary to facilitate the proper operation of these facilities for the purposes of flood prevention, downstream channel stabilization, water quality treatment and/or public safety, and/or to ensure compliance with jurisdictional regulatory conditions.

K. *Failure to perform corrective actions.* If property owner(s) fail to make the necessary corrective actions in the timeframe specified in the enforcement provisions of this chapter, the city is authorized to perform the corrective actions at the expense of the owner(s). If the owner (s) fail to reimburse the city for the corrective actions upon demand, the city may assess the cost of the corrective actions to the owner and initiate any collection proceedings authorized by law.

L. *Access to adjacent properties.* This ordinance does not authorize access by a property owner or site operator to private property adjacent to or downstream of the owner's property. Arrangements concerning removal of sediment or pollutants on adjoining property must be settled by the owner or operator with the adjoining landowner.

(Ord. No. 48-904, § 8, 11-16-2010)

Sec. 16.32.097. Special provisions for open channels.

A. No structure or land shall hereafter be developed, redeveloped, located, extended, converted, or structurally altered without full compliance with the terms of this section, the City of Wichita Floodplain Management Ordinance (Chapter 27.06) and other applicable local, state or federal regulations.

B. Requirements for vegetative buffer zones or maintenance access areas that have been established in approved and adopted watershed plans have priority over the provisions of this section.

C. Closure of open channels. Existing or proposed open channels may be enclosed if a maintenance plan approved by the City is provided; if the closed conduit conforms to the design criteria set in the Storm Water Manual.

D. Access easement required. All open channels must have a minimum twenty (20) foot wide maintenance access on each side of the stream as measured from the top-of-bank on each side of the stream, except as required by KSA 24-126 as amended, and KAR 5-45-12 as amended for "streams" defined in KAR 5-45-1 as amended.

(Ord. No. 48-904, § 9, 11-16-2010)

Sec. 16.32.100. Enforcement actions.

A. The discharge of, or potential discharge of, any pollutant to the MS4 or waters of the United States and/or the failure to comply with the provisions of this chapter and/or the failure to comply with and directive, citation, or order issued under this chapter; are violations of this chapter for which enforcement action may be taken.

B. Prior to taking any enforcement action as specified in this section, a violator will be issued a notice of violation except when, in the opinion of the Director, an owner or contractor has repeatedly ignored the requirements of this chapter and has not made any reasonable intent to comply with these provisions. When issued, the notice of violation will detail the nature of the

violation, actions to be taken to remedy the violation, actions to be taken to clean-up any pollutants, and any specific time periods within which to accomplish said actions. Failure to successfully comply with the notice of violation may result in enforcement action.

C. The enforcement actions to be taken under this chapter, as provided in Section 16.32.110 are as follows:

1. *Criminal penalty.* Any person violating any provision of this chapter is guilty of a misdemeanor and upon conviction thereof shall be punished by a fine of not more than one thousand dollars. Each and every day during which any violation of any provision of this chapter is committed, continue, or permitted is a separate violation.

2. *Stop work order.* Notwithstanding other penalties provided by this chapter, whenever the Director or OCI, or their designees, finds that any owner or contractor on a construction site has violated, or continues to violate, any provision of this chapter or any order issued thereunder, the Director or OCI may after reasonable notice to the owner or contractor issue a stop work order to the owner and contractors by posting such order at the construction site. Said order shall also be distributed to all city departments and divisions whose decisions may affect any activity at the site. Unless express written exception is made, the stop work order shall prohibit any further construction activity at building permit, grading permit, site development plan approval, or any other approval necessary to commence or to continue construction or to assume occupancy at the site. Issuance of a stop work order shall not be a bar against, or a prerequisite for, taking any other action against the violator. Failure to comply with the requirements of any stop work order is a violation of this chapter.

3. *Administrative penalty process.*

a. When the Director finds that any person has violated or continues to violate the provisions set forth in this chapter, or the person's NPDES permit or any order issued thereunder, the Director may issue an order for compliance to the person. Such orders may contain any requirements as might be reasonably necessary and appropriate to address noncompliance including, but not limited to, the installation of best management practices, additional self-monitoring, and/or disconnection from the MS4.

b. The Director is empowered to enter into consent orders, assurances of voluntary compliance, or other similar documents establishing an agreement with any person responsible for noncompliance. Such orders shall include specific action to be taken by the person to correct the noncompliance within a time period specified by the order.

c. Notwithstanding any other remedies or procedures available to the city, any person who is found to have violated any provision of this chapter, or any NPDES permit or any order issued under this chapter, may be assessed an administrative penalty as follows:

1. The minimum administrative penalty for any violation shall be no less than \$500.00 per day the violation is maintained and not more than \$2,500.00 per day for each day the violation is maintained;

2. Failure to obtain required NPDES permit: up to \$2,500.00 per violation;

3. Failure to prepare stormwater pollution prevention plan: up to \$2,500.00 per violation;

4. Failure to install best management practices: up to \$2,500.00 per violation;

5. Failure to maintain best management practices: up to \$2,500.00 per

violation;

6. Failure to perform required sampling and testing or provide testing reports: up to \$1,000.00 per violation.

7. Commencement of construction without an approved drainage plan: up to \$2,500.00 per day of noncompliance;

8. Failure to comply with approved drainage plan: up to \$2,500.00 per day of noncompliance;

9. Failure to maintain storm water management facilities: up to \$2,500.00 per day of noncompliance.

d. Each day on which noncompliance shall occur or continue shall be deemed a separate and distinct violation.

e. Separate but multiple violations (except for violations under subsection C.3.d) by the same person(s) on one or more sites within any period of twelve consecutive months shall be cause to double the amount of penalty assessed under section C.3.c above for each violation after the first.

f. Upon assessment of any administrative penalty, the city will bill the violator for said charge and the Director shall have such collection remedies as are available at law.

(Ord. No. 44-123 § 10; Ord. No. 48-904, § 10, 11-16-2010)

Sec. 16.32.110. Applicability of enforcement actions.

A. Illegal dumping will be subject to criminal penalties process.

B. Illegal connections will be subject to either the criminal or administrative penalty processes.

C. Industrial violations will be subject to the administrative penalty process.

D. Individual building sites not requiring a federal or state NPDES permit will be subject to the criminal penalty and the stop work order processes; however, any owner or contractor of such site found with multiple violations of this chapter will also be subject to the administrative penalty process.

E. Individual building sites requiring a federal or state NPDES permit will be subject to the administrative penalty process.

F. Subdivision developers in subdivisions not requiring a federal or state NPDES permit will be subject to the criminal penalty and stop work order processes; however, any such developer found with multiple violations of this chapter will also be subject to the administrative penalty process.

G. Subdivision developers of subdivisions requiring a federal or state NPDES permit will be subject to the administrative penalty process.

H. City contractors and utility companies working on projects not requiring a federal or State NPDES permit will be subject to the criminal penalty process.

I. City contractors and utility companies working on projects requiring federal or state NPDES permit will be subject to the administrative penalty process.

J. Property owners, subdivision developers, commercial and industrial developers, and city contractors working on new developments and redevelopments requiring compliance with the City of Wichita storm water quality or quantity management standards will be subject to the criminal penalty, stop work order and administrative penalty processes.

K. Owners of storm water management facilities and systems that are required to be maintained in accordance with an approved Operations and Maintenance Plan will be subject to the criminal penalty and administrative penalty processes.

(Ord. No. 44-123 § 11; Ord. No. 48-904, § 11, 11-16-2010)

Sec. 16.32.120. Hearing and appeal.

A. Persons who desire to appeal an administrative requirement, violation or penalty invoked under this chapter may request a hearing and appeal as follows:

1. Any party affected by a penalty, order, directive or determination issued or made, pursuant to this chapter may, within fourteen days of the issuance of such penalty, order, directive, or determination request a hearing before the Director to show cause why such should be modified or made to not apply to such person. Such request shall be in writing and addressed to the Director of Public Works and Utilities at 455 North Main Street, Wichita, Kansas, 67202. The Director or his designee shall hold the requested hearing as soon as practical after receiving the request, at which time the person affected shall have an opportunity to be heard. At the conclusion of the hearing, the Director shall issue a written response to the person requesting the hearing affirming, modifying, or rescinding the penalty, order, directive, or determination issued or made.

2. Any party aggrieved by the decision of the Director may appeal such decision to the City Council within fourteen days of receipt of the decision by filing notice of appeal with the city clerk. Upon hearing, the City Council may affirm, modify, or reverse the decision of the Director.

(Ord. No. 44-123 § 12; Ord. No. 48-904, § 12, 11-16-2010)

Sec. 16.32.130. Enforcement personnel authorized.

A. The following personnel employed by the city shall have the power to issue notices of violations, criminal citations and implement other enforcement actions under this chapter:

1. All deputies under the supervision of the Superintendent of the Office of Central Inspections;
2. All authorized personnel under the supervision of the Director of Public Works and Utilities;
3. All authorized personnel under the supervision of the City Health Officer.

(Ord. No. 44-123 § 13; Ord. No. 48-904, § 13, 11-16-2010)

Sec. 16.32.140. Other legal actions.

Notwithstanding any other remedies or procedures available to the city, if any person discharges into the MS4 in a manner that is contrary to the provisions of this chapter, or any NPDES permit or order issued hereunder, the city attorney may commence an action for appropriate legal and equitable relief including damages and costs in the district court of Sedgwick County. The city attorney may seek a preliminary or permanent injunction or both which restrains or compels the activities on the part of the discharger.

(Ord. No. 44-123 § 14)

Sec. 16.32.150. Falsifying information.

Falsifying information is a separate offense and deemed a misdemeanor. Any person who knowingly makes false statements, representation or certification in any application, record, report, plan or other document filed or required to be maintained pursuant to this chapter or any NPDES permit, or who falsifies, or tampers with any monitoring device or method required under this chapter shall, upon conviction, be punished by a fine of not more than one thousand dollars or by imprisonment for not more than six months, or by both.

(Ord. No. 44-123 § 15)

Sec. 16.32.160. Supplemental enforcement actions.

A. Performance Bonds. Where necessary for the reasonable implementation of this chapter, the director may, by written notice, order any owner of a source of stormwater discharge associated with construction or industrial activity effected by this chapter to file a satisfactory bond, payable to the city, in a sum not to exceed a value determined by the director to be necessary to achieve consistent compliance with this chapter. The city may deny approval of any building permit, grading permit, subdivision plat, site development plan, or any other city permit or approval necessary to commence or continue construction or industrial activity at the site, or to assume occupancy, until such a performance bond has been filed.

B. Liability Insurance. Where necessary for the reasonable implementation of this chapter, the director may, by written notice, order any owner of a source of stormwater discharge associated with construction or industrial activity effected by this chapter to submit proof that it has obtained liability insurance, or other financial assurance, in an amount not to exceed a value reasonably determined by the director, that is sufficient to remediate, restore, and abate any damage to the MS4, the waters of the United States, or any other aspect of the environment that is caused by the discharge.

(Ord. No. 44-123 § 16)

Sec. 16.32.170. Severability.

If any provision of this chapter is invalidated by any court of competent jurisdiction, the remaining provisions shall not be affected and shall remain in full force and effect.

(Ord. No. 44-123 § 17)

City of Wichita, Kansas

Stormwater Management Program 2007-2012

Kansas Permit No. M-AR94-S001

Federal Permit No. KS0091049

September 2008

Stormwater Management Program 2007-2012

City of Wichita, Kansas

September 2008

The City of Wichita (City or Permittee), Kansas has prepared this Stormwater Management Program (SWMP, SMP or Program) to outline the measures it will take to reduce the discharge of pollutants from the Municipal Separate Storm Sewer System (MS4) to the maximum extent practicable (MEP), to protect water quality, and to satisfy the appropriate water quality requirements and goals of the Clean Water Act, and the City's National Pollutant Discharge Elimination System (NPDES) Permit.

This Program has been submitted in compliance with the requirements of both the Kansas Water Pollution Control MS4 Permit No. M-AR94-S001 and Federal Permit No. KS0091049 that is required for the term beginning October 1, 2007, and expiring September 30, 2012. This Program also operates using the legal authority as set forth in City Ordinance Chapter 16.32, and subsequent revisions.

Changes to this plan may be made as allowed by the Permit and approved by the Kansas Department of Health and Environment (KDHE). This Program is implemented within areas of the City's legal jurisdiction, boundaries and on its properties.

This Program provides a list of stormwater Best Management Practices (BMPs) that the City of Wichita agrees to implement as required by the KDHE NPDES Permit. Each BMP will have goals and measurements to demonstrate compliance with the goals. There are three sections of this Program as follows:

- Section I - BMPs for Six Minimum Control Measures as required by KDHE NPDES Permit Part V;
- Section II – BMPs for Principal Pollutants of Concern (PPoC) as required by KDHE NPDES Permit Part IV that lists identified principal pollutants of concern; and
- Section III – BMPs for Total Maximum Daily Load (TMDL) Parameters as required by KDHE NPDES Permit Part III for specifically listed associated streams.

Section I and II will be implemented within all legal boundaries of the City and Section III will be implemented to comply with requirements for associated streams as specified in the current KDHE NPDES Permit and as identified in this Program.

Other agencies and organizations may contribute to the implementation of these measures. Also, actions and measures utilized but not documented in the SMP may be implanted throughout the permit years. Each of the contributions made by others as well as additional City actions will be documented in the Annual Report and will be counted towards goal attainment. All education programs and actions taken throughout 2008 shall count as activities towards compliance with this Program. Each year thereafter will follow the Program as identified in this document.

Section I - BMPs for Six Minimum Control Measures (MCM)

Minimum Control Measure No. 1: Public Education and Outreach

The City will implement a public education program which includes distribution of materials to the community or conducting equivalent outreach activities which address the impacts of stormwater discharges on water bodies and the steps the public can take to reduce pollutants in stormwater runoff. Each BMP listed below will describe a part of the City's public education program and will list how its completion will be measured.

- A. Video messages and graphics will be developed by the City for use on the City's Cable Channel 7 or other video outlets for community distribution. This activity will take the form of periodic repeating video presentations or graphics informing citizens of the importance of preventing stormwater pollution and individual actions citizens can take to reduce their impact on stormwater.

Measurable Goal: A repeating video or graphic designed to inform the public on stormwater pollution prevention will be run at least twice per year on the City's Cable Channel 7, beginning in October 2008, and continue each year thereafter. Presentations/messages and graphics will be documented along with the media used and its duration.

- B. An informational brochure on stormwater quality for residents will be developed by the City. This brochure will be used as a Wichita Water Utility bill insert.

Measurable Goal: A brochure will be developed and approximately 130,000 will be distributed beginning in October 2008. Each year thereafter the City will develop an annual brochure and distribute these via Wichita Water Utility bill inserts.

- C. The City will distribute stormwater education materials through the City of Wichita website ("www.wichita.gov"). Materials will be distributed through City web pages and/or appropriate links to local, regional, and national websites.

Measurable Goal: Website will be developed and in operation after October 1, 2008, and continue throughout the permit term. At least one informational document or website link will be added to the website for stormwater education and will be reported and documented in the Annual Report.

- D. Stormwater pollution prevention, water conservation and water quality education programs have been and will continue to be developed and provided to public and private schools. These may be provided at the City's W.A.T.E.R. Center as well as at public school facilities or other locations. Such programs and assistance may be provided in cooperation with educational, non-profit, or other governmental groups.

Measurable Goal: City will continue contact with interested teachers and appropriate school officials. Programs and assistance will continue to be provided through several ongoing programs and will reach a minimum of 500 students or participants each permit year and will be documented.

- E. Stormwater pollution prevention, water conservation and water quality education programs have been and will continue to be developed and provided to neighborhood groups, homeowner's associations, business and trade associations, community organizations, youth groups, and other groups and organizations. These may be provided at the City's

W.A.T.E.R. Center as well as at other locations. Such programs and assistance may be provided in cooperation with educational, non-profit, or other governmental groups.

Measurable Goal: There will be at least 20 programs presented annually of each permit year. The programs will be documented and a summary of the programs provided will be identified in the annual report.

- F. Annually each BMP and corresponding measurable goal provided in this SMP will be evaluated and progress or actions will be reported in the Annual Report as required by the KDHE NPDES permit.

Measurable Goal: As required by the KDHE NPDES permit, an Annual Report will be submitted to KDHE by April 1 of each year for the previous calendar year. The Annual Report will be provided to the City Manager and posted on the City's stormwater website.

Minimum Control Measure #2: Public Involvement and Participation

The City will implement a public involvement and participation program to solicit public comment and recommendations regarding the BMPs and measurable goals utilized in this Program to comply with this permit.

- A. Public comments and recommendations for this plan and recommended changes to this plan will be solicited by the City regarding the BMPs and measurable goals that will be utilized to achieve the goals of this permit. Public input will be considered and utilized, if applicable, in the annual evaluation of this SMP.

Measurable Goal: Public comment periods will be established and announced via press releases and posted on the City website. Public comments will be documented and considered in finalizing all documents. Comments made via any method, (i.e., web site, phone, mail, etc.,) will be evaluated and, if appropriate, incorporated into this SMP. This will begin in October 2008.

- B. The City will conduct at least one volunteer river clean up day with citizen and group volunteers and participants will be surveyed for their suggestions for stormwater pollution prevention measures.

Measurable Goal: An Arkansas River (and/or tributaries) Cleanup will be held at least once each year of the permit. Stream miles cleaned, number of volunteers, tons of trash collected and survey responses will be documented. Results will be contained in the annual evaluation of this SMP.

- C. The City will convene a Task Force for the purpose of reviewing stormwater best management practices and making recommendations to the City for implementation.

Measurable Goal: The City has already initiated this Task Force (August 2008) and will seek its input regarding this Program and individual best management practices as determined by the City. Comments will be evaluated and, if appropriate, incorporated into this SMP. This will begin in September 2008.

Minimum Control Measure #3: Illicit Discharge Detection and Elimination

The City agrees to:

- Develop, implement, and enforce a program to detect and eliminate illicit discharges into the MS4;
- Develop a storm sewer system map of the Permittee's MS4, showing the location of all outfalls, either pipes or open channel drainage, showing the names and location of all streams or lakes that receive discharges from those outfalls;
- Enact an ordinance to prohibit non-stormwater discharges into the storm sewer system as required by the current KDHE permit and implement appropriate enforcement procedures and actions (a copy of the most recently adopted ordinance shall be submitted to KDHE with the subsequent Annual Report);
- Inform public employees, businesses, and the general public of hazards associated with illegal discharges and improper disposal of waste; and
- Develop and implement a plan to detect and address prohibited non-stormwater discharges as required by the current KDHE NPDES permit.

- A. The City has already passed an ordinance to prohibit non-stormwater discharges into the storm sewer system as required by the current KDHE permit and has implemented appropriate enforcement procedures and actions.

Measurable Goal: An ordinance prohibiting non-stormwater discharges is currently in place, Chapter 16.32, and will be maintained and updated as necessary throughout the effective dates of this permit. A copy of the implemented ordinance will be provided in the next Annual Report.

- B. The City will continue to televise storm sewer pipe to identify illicit connections or discharges.

Measurable Goal: Each permit year the City will televise 45,000 linear feet of storm sewer pipe in an effort to find illicit connections or discharges. Any illicit discharges found will be investigated with actions documented. The amount of storm sewer televised will be reported in the Annual Report with a summary of results included.

- C. Permittee will continue the program of televising sanitary sewer lines.

Measurable Goal: A minimum of 400,000 linear feet of sanitary sewer line will be televised in each of the remaining years of the permit and reported in the Annual Report.

- D. A City program of systematic inlet inspections and cleaning, including visual observations for illicit discharges will be continued.

Measurable Goals: Permittee will perform at least 30,000 catch basin cleanings each year. This effort is currently underway and inspection frequency will be reviewed each permit year for planning of the next year's cleaning schedule. In the third quarter of the 3rd year of permit coverage a new plan will be established for years 4 and 5 to take any new factors including new equipment into consideration.

- E. The City has already prepared a current and complete storm sewer collection system map in accordance with the KDHE NPDES permit requirements. An updated GIS storm sewer

system map is currently being prepared.

Measurable Goal: Permittee has contracted for the development of an electronic geo-database of the storm sewer collection system. Due to the City's large system, this program will need to be implemented in phases. The system will include specifications identified by the current KDHE NPDES Permit. Phase 1 of this program is planned to be completed in the fall of 2008. Public Works plans to contract for the remaining program in-2008, with the entire geo-database stormwater system planned to be completed by 2011.

- F. A restaurant inspection program will continue to be utilized to verify that grease is not being discharged to the municipal storm drains. These inspections are incorporated into the Water Utilities regular inspection program and accomplished by City inspectors.

Measurable Goal: Inspections of restaurant grease handling is an existing program within the Wichita Water Utility Department. There will be a minimum of 160 inspections performed each permit year and the results will be reported in the Annual Report. If changes are necessary with this program, KDHE will be informed.

- G. Regulate septic system installation and usage, via the existing Ordinance, and respond to complaints regarding improper discharges related to septic systems. Septic system regulation is an ongoing program of the City. The City will seek City Council approval to "order in" municipal services as a result of failed septic systems.

Measurable Goal: Continue regulation of septic systems in accordance with City Code Chapter 16.12 during the entire permit term. Records will be maintained to document the number of complaints received and disposition of problems found will be reported in the Annual Report. Activities associated with "order in" requests to Council will be documented in the Annual Report. The number of "order in" requests is demand driven.

- H. The City will either provide training for or work in conjunction with organizations to ensure businesses and industries are trained in stormwater pollution prevention best management practices and local, state and federal stormwater regulations and ordinances.

Measurable Goal: In the past, the City has provided periodic training and BMP discussions to area businesses regarding stormwater pollution prevention and BMPs. Beginning in January 2009, the city will conduct one annual training program for area businesses to ensure compliance with this Program. Results will be reported in the Annual Report.

Minimum Control Measure #4: Construction Site Runoff Control

The City has developed and agrees to continue implementation and enforcement of a program to reduce pollutants in stormwater runoff to the MS4 from construction activities that result in a land disturbance of greater than or equal to one acre. Reduction of stormwater discharges from construction activities disturbing less than one acre must be included in the program if that construction activity is part of a larger common plan of development or sale that would disturb one acre or more. The City will ensure that the program for construction site runoff control continues to include at a minimum the following:

- An ordinance to govern sediment and erosion control along with sanctions for compliance;
- Requirements for construction site owners or operators to implement BMPs for erosion

and sediment control;

- Requirements for owners or operators to control waste materials during construction that may cause adverse impacts to water quality;
- Procedures for site plan review which incorporates consideration of potential water quality impacts;
- Procedures for receipt and consideration of information submitted by the public; and
- Procedures for site inspection and enforcement of control measures.

- A. The City has implemented an ordinance requiring erosion and sediment control measures at construction sites.

Measurable Goal: An ordinance is currently in place, Chapter 16.32.050, and will be maintained and updated as necessary throughout the effective dates of this permit.

- B. The City has developed and implemented a program to reduce pollutants in stormwater runoff to the MS4 from construction activities as required by the City's permit.

Measurable Goal: This is an existing program, which will continue regulation of construction activities in accordance with City Code, Chapter 16.32.050. Permittee will perform at least 600 inspections in each year of the permit, and violations/citations will be written as necessary. A copy of program instructions will be included in the next Annual Report.

Minimum Control Measure #5: Post-Construction Stormwater Management in New Development and Redevelopment

The City agrees to develop a post-construction stormwater management program to address post-construction stormwater runoff from new develop and redevelopment projects that disturb greater than or equal to one acre, including projects less than one acre that are part of a larger common plan of development or sale, that discharge into the MS4. This program will include at a minimum the following:

- BMPs to prevent or minimize adverse water quality impacts;
- Strategies which include a combination of structural and/or non-structural BMPs appropriate for the municipality;
- Enact an ordinance to address post-construction runoff from new development and redevelopment projects to the extend allowable under State and local law; and
- Ensure adequate long-term operation and maintenance of BMPs.

- A. The City will develop, implement, and enforce a program to address post-construction stormwater runoff from new development and redevelopment projects as required by the permit. To obtain the best information and technical input from national and area resources, the City has implemented a Task Force to develop the BMPs required for post-construction operations and maintenance.

Measurable Goal: Structural and/or non-structural BMPs will be selected and identified as determined by the City Task Force by October 2009 and implemented by January 2010.

- B. The City will enact an ordinance to address post-construction runoff from new development and redevelopment projects.

Measurable Goal: The City currently has provisions in its stormwater ordinance to address protection of MS4 and waters of the U.S. from development as provided in Chapter 16.32. Updates to the current ordinances will be provided by October 2009 and shall be reviewed, and updated as needed, each year of the permit.

Minimum Control Measure #6: Pollution Prevention/Good Housekeeping for Municipal Operations

The City agrees to develop and implement an operation and maintenance program for its municipal operations as required by the permit.

- A. The City will develop and implement an operation and maintenance program that includes employee training, BMP's, and Stormwater Pollution Prevention Plans (SWP3's), to reduce or prevent stormwater pollution from municipal industrial operations including park and open space maintenance, fleet and building maintenance, new construction and land disturbances, and stormwater system maintenance.

Measurable Goal: Many programs are currently in place for stormwater pollution prevention at municipal facilities although not necessarily documented for this program. Current programs will be documented beginning in the fall of 2008. All municipal facilities will be evaluated and will have programs designed, implemented and completed by September 2009. A summary of these efforts will be provided in the Annual Report.

- B. Stormwater pollution inspections of all municipal industrial facilities, noting potential sources of exposures and opportunities for improvements, will be conducted in coordination with identifying needed stormwater pollution prevention programs and training at municipal facilities.

Measurable Goals: All municipal industrial facilities with a Stormwater NPDES Permit will be inspected on a calendar year basis beginning in October 2009.

- C. City will continue the existing street sweeping program to reduce pollutant loadings to the storm sewer.

Measurable Goals: Two rounds of residential street sweeping, eight rounds of arterial street sweeping, and two rounds per week of downtown street sweeping will be completed annually by the City. This effort is currently underway, and will continue throughout the permit term.

- D. The City has a program to ensure proper application of pesticides and herbicides are applied at municipal parks and properties. Some parks will be designated as a "Pesticide Free" property.

Measurable Goals: The City will continue the existing program that requires all City employed applicators of pesticides and/or herbicides to be licensed or directly supervised by licensed personnel. Records shall be maintained as required by local, state and federal laws for pesticide/herbicide application events and licensed personnel shall be trained periodically to ensure proper management and application of the pesticides and/or herbicides. A "Pesticide Free" Parks program shall be maintained for some parks and

identified to the public through the City's website.

- E. Stormwater control structures will continue to be adequately identified, operated and maintained through a coordinated operations and maintenance program.

Measurable Goal: Control structures are already maintained in an ongoing maintenance program although not necessarily documented for this SMP. Current programs will be documented beginning in the fall of 2008. A summary of the annual maintenance efforts will be provided in the Annual Report.

- F. The City will respond to spills of hazardous materials and solid wastes on to public roadways and private and public properties. City staff will ensure that discharged materials are cleaned up by the responsible parties and reported to local, state and federal officials as required by law and regulations.

Measurable Goal: All roadway and property spills of hazardous materials or solid wastes will be monitored and cleaned up by responsible parties. Spill notifications, cleanup actions and environmental impacts will be documented and provided in each Annual Report throughout the permit period.

Section II - BMPs for Primary Pollutants of Concern (PPoC)

The City agrees to implement BMPs for Principal Pollutants of Concern (PPoC) as identified by the City's NPDES permit. The listed PPoC parameters are biochemical oxygen demand, E. coli, total recoverable cadmium, total recoverable copper, and total recoverable zinc. At a minimum, one BMP as required in Part IV of the permit shall be implemented for each of the PPoC, and these BMP's shall generally be implemented throughout the City's jurisdiction. Also, high concentrations of PPoC are often caused by similar sources. Therefore, each of the following BMPs listed below will help to address each of the PPoC.

BMPs for Five Principal Pollutants of Concern: Supplemental Control Measures

- A. The City will implement a public education program for the Principal Pollutants of Concern (PPoC) that will include development of a message and distribution in the community. This message will be disseminated by use of the City's Cable Channel 7. This activity may take the form of a periodic repeating video presentation or graphic informing citizens of the importance of their activities regarding pollution prevention measures. Such information will highlight the PPoC.

Measurable Goals: A repeating video or graphic designed to inform the public on the PPoC and stormwater pollution prevention will be once each year on the City's Cable Channel 7, beginning in October 2009.

Affected Parameters: Biochemical oxygen demand, E. coli, total recoverable cadmium, total recoverable copper, and total recoverable zinc.

- B. An informational brochure will be developed focusing on the five PPoC and stormwater quality for residents. This brochure will be used as a Water Utility bill insert.

Measurable Goal: A PPoC-focused brochure will be developed and provided to Water Utility users to reflect the increased priority of PPoC and actions to prevent PPoC into stormwater.

Brochure will be mailed annually, beginning summer 2009.

Affected Parameters: Biochemical oxygen demand, E. coli, total recoverable cadmium, total recoverable copper, and total recoverable zinc.

- C. Permittee will distribute stormwater education materials that will highlight PPOC through the City of Wichita website ("www.wichita.gov"). Such distribution may include direct distribution on the City web pages and/or may direct user to appropriate links to local, regional, and national websites.

Measurable Goal: Web pages will be designed and available highlighting the PPOC during the second year of the permit (2009) and continuing throughout the permit term. Web pages will be updated at least annually and will be copied and provided as attachments in the Annual Report. At least one informational document or website link will be added to the website for stormwater education and will be reported and documented in the Annual Report.

Affected Parameters: Biochemical oxygen demand, E. coli, total recoverable cadmium, total recoverable copper, and total recoverable zinc.

- D. The City will continue the existing street sweeping program to reduce pollutant loadings to the storm sewer.

Measurable Goals: Two rounds of residential street sweeping, eight rounds of arterial street sweeping, and two rounds per week of downtown street sweeping will be completed annually by the City. This effort is currently underway, and will continue throughout the permit term.

Affected Parameters: Biochemical oxygen demand, E. coli, total recoverable cadmium, total recoverable copper, and total recoverable zinc.

- E. An informational brochure for businesses and industries that have stormwater NPDES Permits will be developed focusing on the five PPOC and stormwater quality. This brochure will be provided as mailer to the identified businesses and industries.

Measurable Goal: A PPOC-focused brochure will be developed and provided to local businesses and industries to reflect the increased priority of PPOC and actions to prevent PPOC into stormwater. Brochures will be mailed annually, beginning spring 2009.

Affected Parameters: Biochemical oxygen demand, E. coli, total recoverable cadmium, total recoverable copper, and total recoverable zinc.

- F. In an effort to ameliorate discharges of Primary Pollutants of Concern, the City will continue its industrial inspection program. Industries will be formally inspected each year to determine if NPDES permitted industrial activities are contributing to, or causing, illicit connections or pollutant discharges of PPOC or other contaminants to be discharged into the stormwater.

Measurable Goal: Ten industrial facilities will be inspected each year and a summary of the results will be included in the Annual Report.

Affected Parameters: Biochemical oxygen demand, E. coli, total recoverable cadmium, total recoverable copper, and total recoverable zinc.

Section III - BMPs for Total Maximum Daily Load (TMDL)

The listed TMDL regulated parameters are total phosphorus, total nitrogen, biochemical oxygen demand pollutants, suspended solids (sediment), and bacteria (E. coli). There are two listed associated streams for all of the City's TMDL regulated parameters, the Little Arkansas River and the Cowskin Creek. One TMDL is also required for the Big Arkansas River and the Whitewater River. Each BMP has a Measurable Goal, and the affected regulated parameters, as applied to the impacted watersheds. At a minimum there will be at least one BMP for each TMDL regulated parameter. These BMPs will be implemented at a minimum within the Permit area wherever stormwater drains to the associated impaired stream.

BMPs for Five Listed TMDL Parameters: Minimum Control Measures

- A. A pet waste brochure will be developed for public education and dissemination. This brochure will encourage pet owners to pick up the waste as well as other pollution prevention tips for pet owners.

Measurable Goal: The brochure will be posted on the City Stormwater Website and printed and placed in various buildings and City Hall for citizen use. This brochure will be provided to neighborhood associations for printing in their newsletters and for distribution at neighborhood meetings. This brochure will address the TMDL regulated parameters and actions that citizens and particularly pet owners can do to ameliorate the discharge. The brochure will be developed prior to May 1, 2009. Each subsequent year, pet waste will be addressed in an education program or printed informational handout.

Affected Parameters: Total nitrogen, biochemical oxygen demand pollutants, suspended solids, and bacteria.

- B. A "Don't discharge grass clippings or leaves into the street" brochure was developed and is disseminated to individuals when a complaint about grass clippings or leaves in the street has been observed.

Measurable Goal: Brochures and citations presented to those that violate the ordinance requiring grass clippings and leaves to be kept out of the street and associated storm drains will be documented and reported in the City's Annual Report.

Affected Parameters: Total phosphorus, total nitrogen, biochemical oxygen demand pollutants, suspended solids, and bacteria.

- C. A display for the five regulated TMDL parameters will be designed and installed at the City's W.A.T.E.R. Center addressing each of the regulated parameters and their associated river or creek. This will be a static self-explanatory informational display available for all visitors to view.

Measurable Goals: The display will be designed and installed prior to August 1, 2009. The annual number of W.A.T.E.R. Center visitors will be reported in the Annual Report.

Affected Parameters: Total phosphorus, total nitrogen, biochemical oxygen demand pollutants, suspended solids, and bacteria.

- D. The Little Arkansas and the Cowskin Creek watersheds contain several operations involved in the caring, feeding, and raising of livestock and other animals. These operations are not

large enough to require adherence to Confined Animal Feeding Operations (CAFO) regulations. The City or other organization on the City's behalf will seek and contact these operations to discuss types of assistance to reduce the listed pollutants in their discharge. Assistance could take the form of education, or, advising the operation of availability of grants/loans, or, obtaining/installing BMP's, such as grass buffers, silt fence, hay bales, etc,

Measurable Goal: Because this BMP is outside of the jurisdiction of the MS4 program, and at the request of EPA, this BMP has been removed from this document starting with 2012 NPDES Annual Report.

Affected Parameters: Total phosphorus, total nitrogen, biochemical oxygen demand pollutants, suspended solids, and bacteria.

- E. In all four of the targeted watersheds, priority attention is currently given to regulated septic system installation and usage. Response to complaints received regarding improper discharges or surfacing sewage related to septic systems failures will be given top priority for complaint investigation and response.

Measurable Goal: Continue regulation of septic systems in accordance with City Code during the entire permit term. Records will be maintained of complaints, and their disposition, and reported in the Annual Report.

Affected Parameters: Total phosphorus, total nitrogen, biochemical oxygen demand pollutants, and bacteria.

- F. The City will use the current program of construction site inspections to target construction activities within the four listed watersheds.

Measurable Goal: Beginning October 2008, the City will identify and target those construction or redevelopment projects having BMPs that are within close proximity to one of the four associated designated streams or rivers. The City will initially inspect within 30 days of the project start date. This effort will continue throughout the permit term.

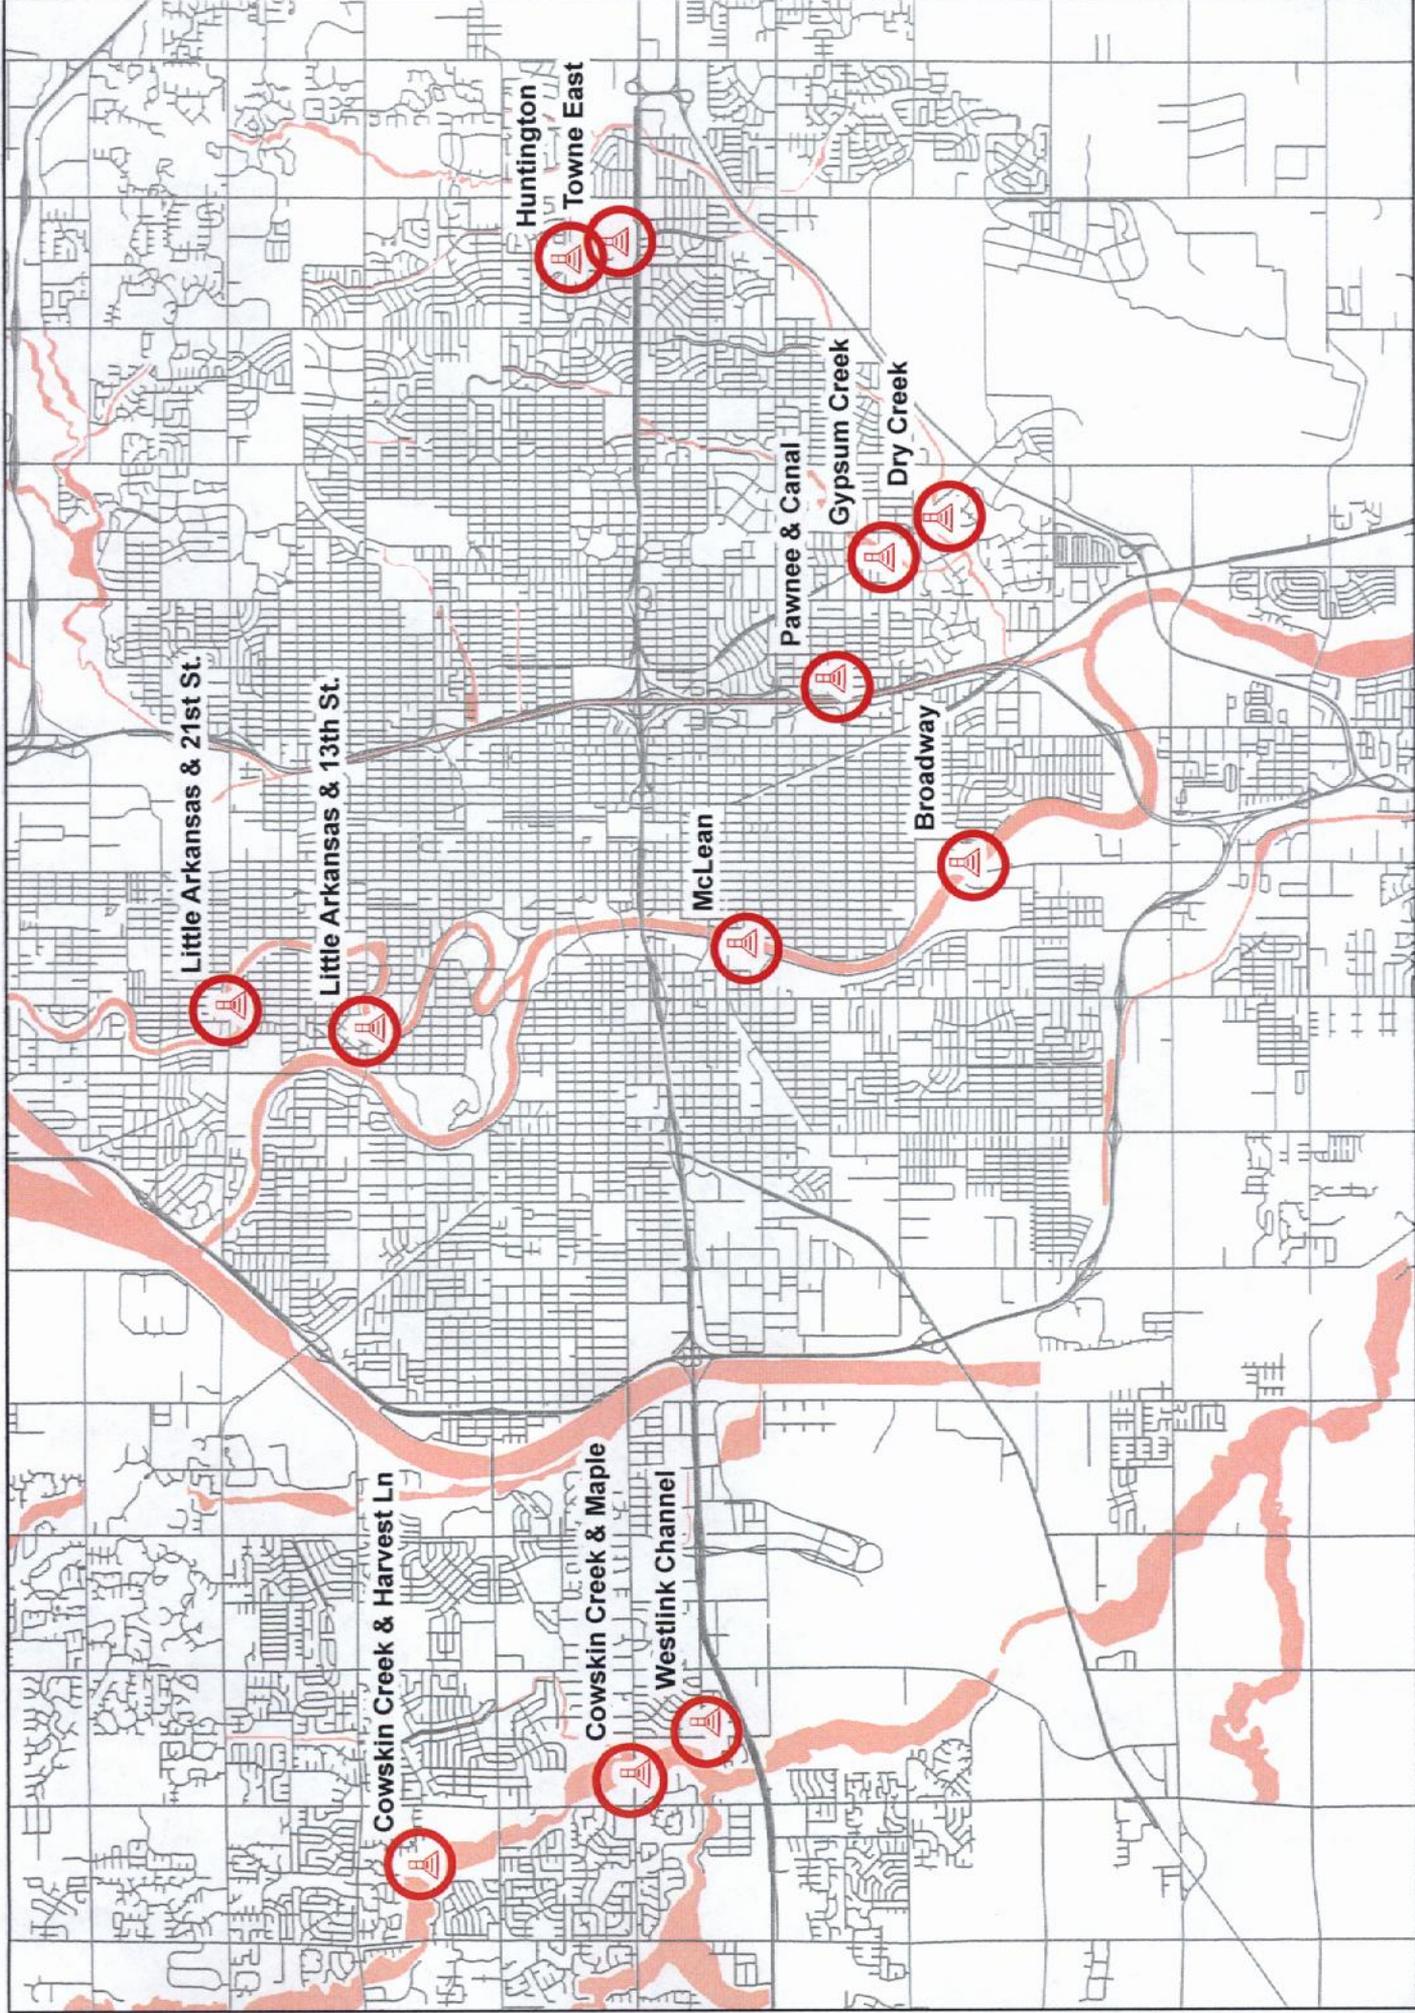

Affected Parameters: Total phosphorus, total nitrogen, biochemical oxygen demand pollutants, suspended solids, and bacteria.

- G. Stormwater demonstration projects will be implemented in each permit year as funding sources are made available. Each project will be publicized for the community to view, evaluate and discuss. The City will evaluate each project for effectiveness and will report its findings to the general public through its website or other communication avenue and in the Annual Report.

Measurable Goal: Beginning October 2008, the City will identify at least one demonstration project for design, construction and implementation. The demonstration project will be in close proximity to one of the four associated designated streams or rivers. The City will periodically inspect, evaluate and maintain each project and report on its effectiveness in the Annual Report.

Affected Parameters: Total phosphorus, total nitrogen, biochemical oxygen demand pollutants, suspended solids, and bacteria.

Summary of Results

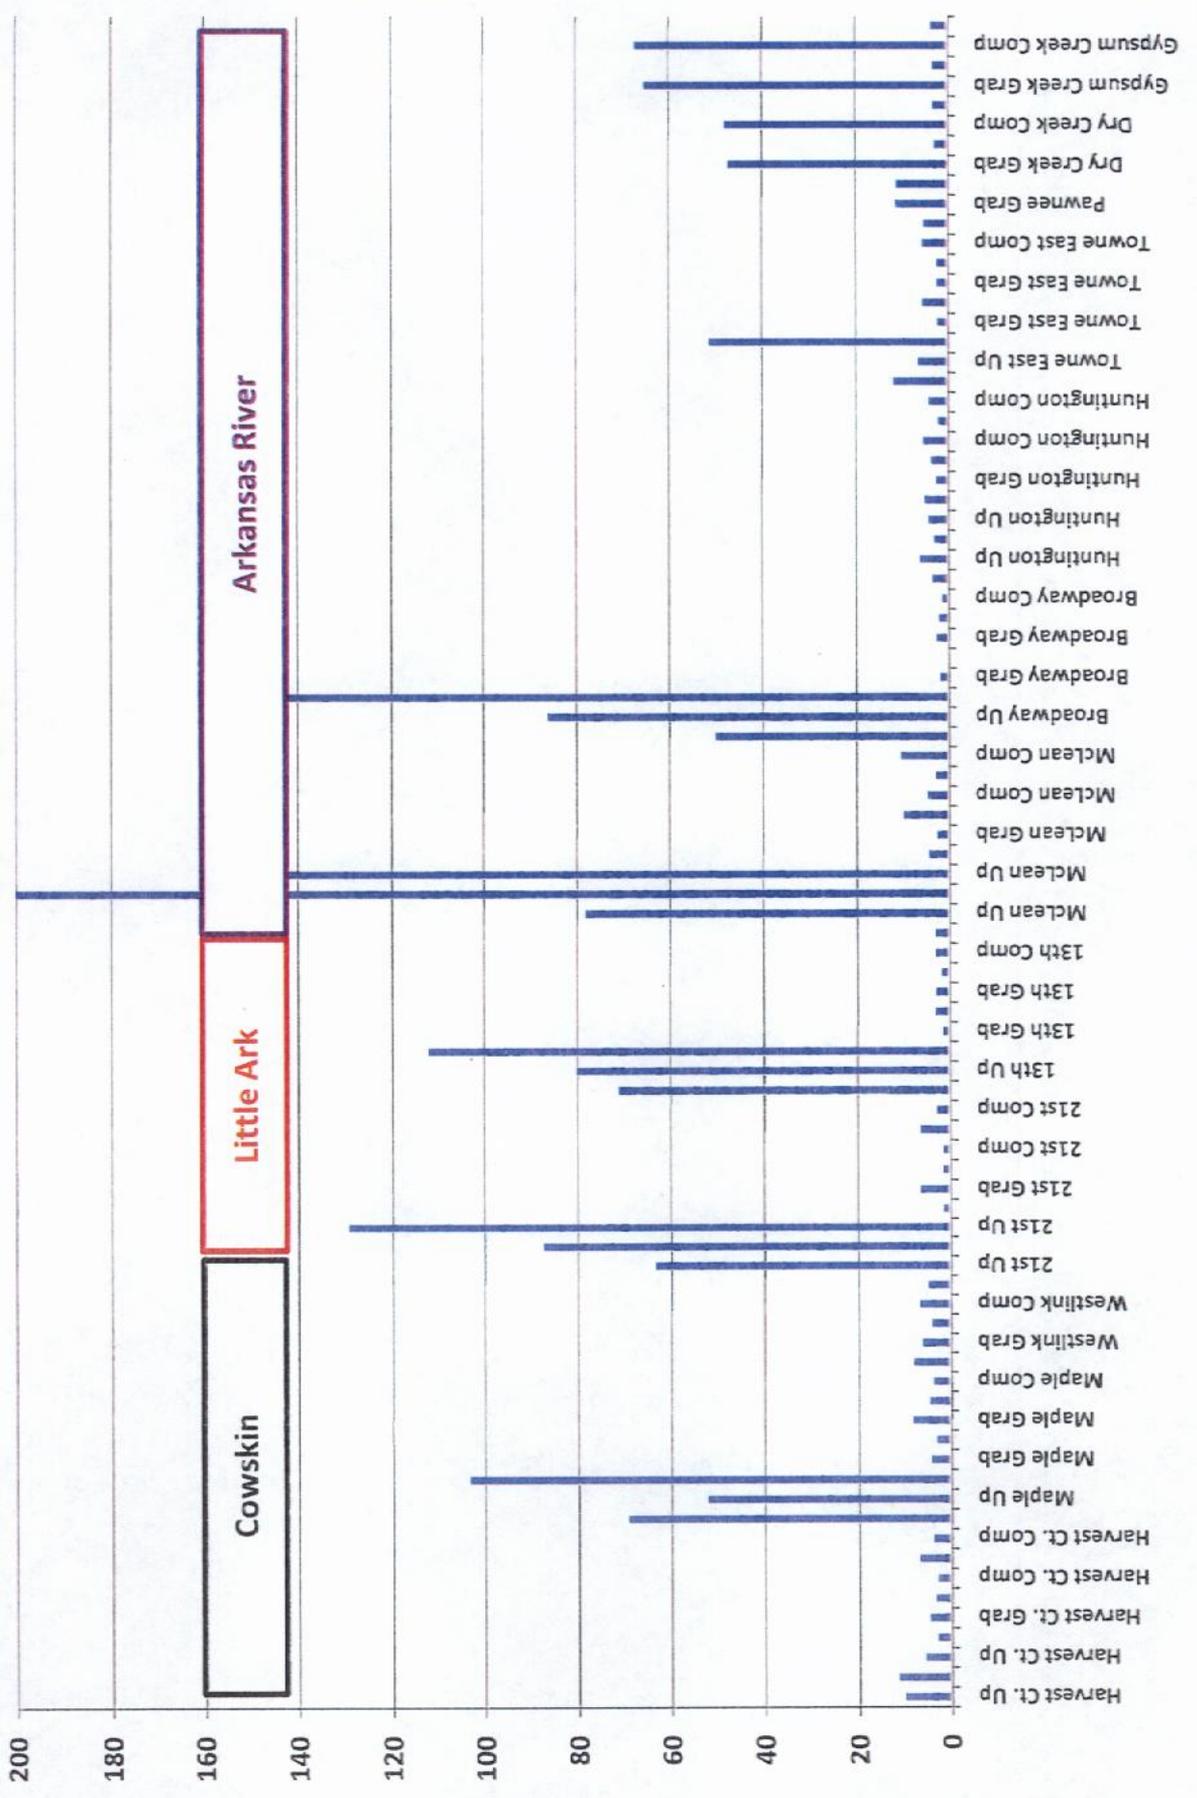

2012 Storm Events

City of Wichita

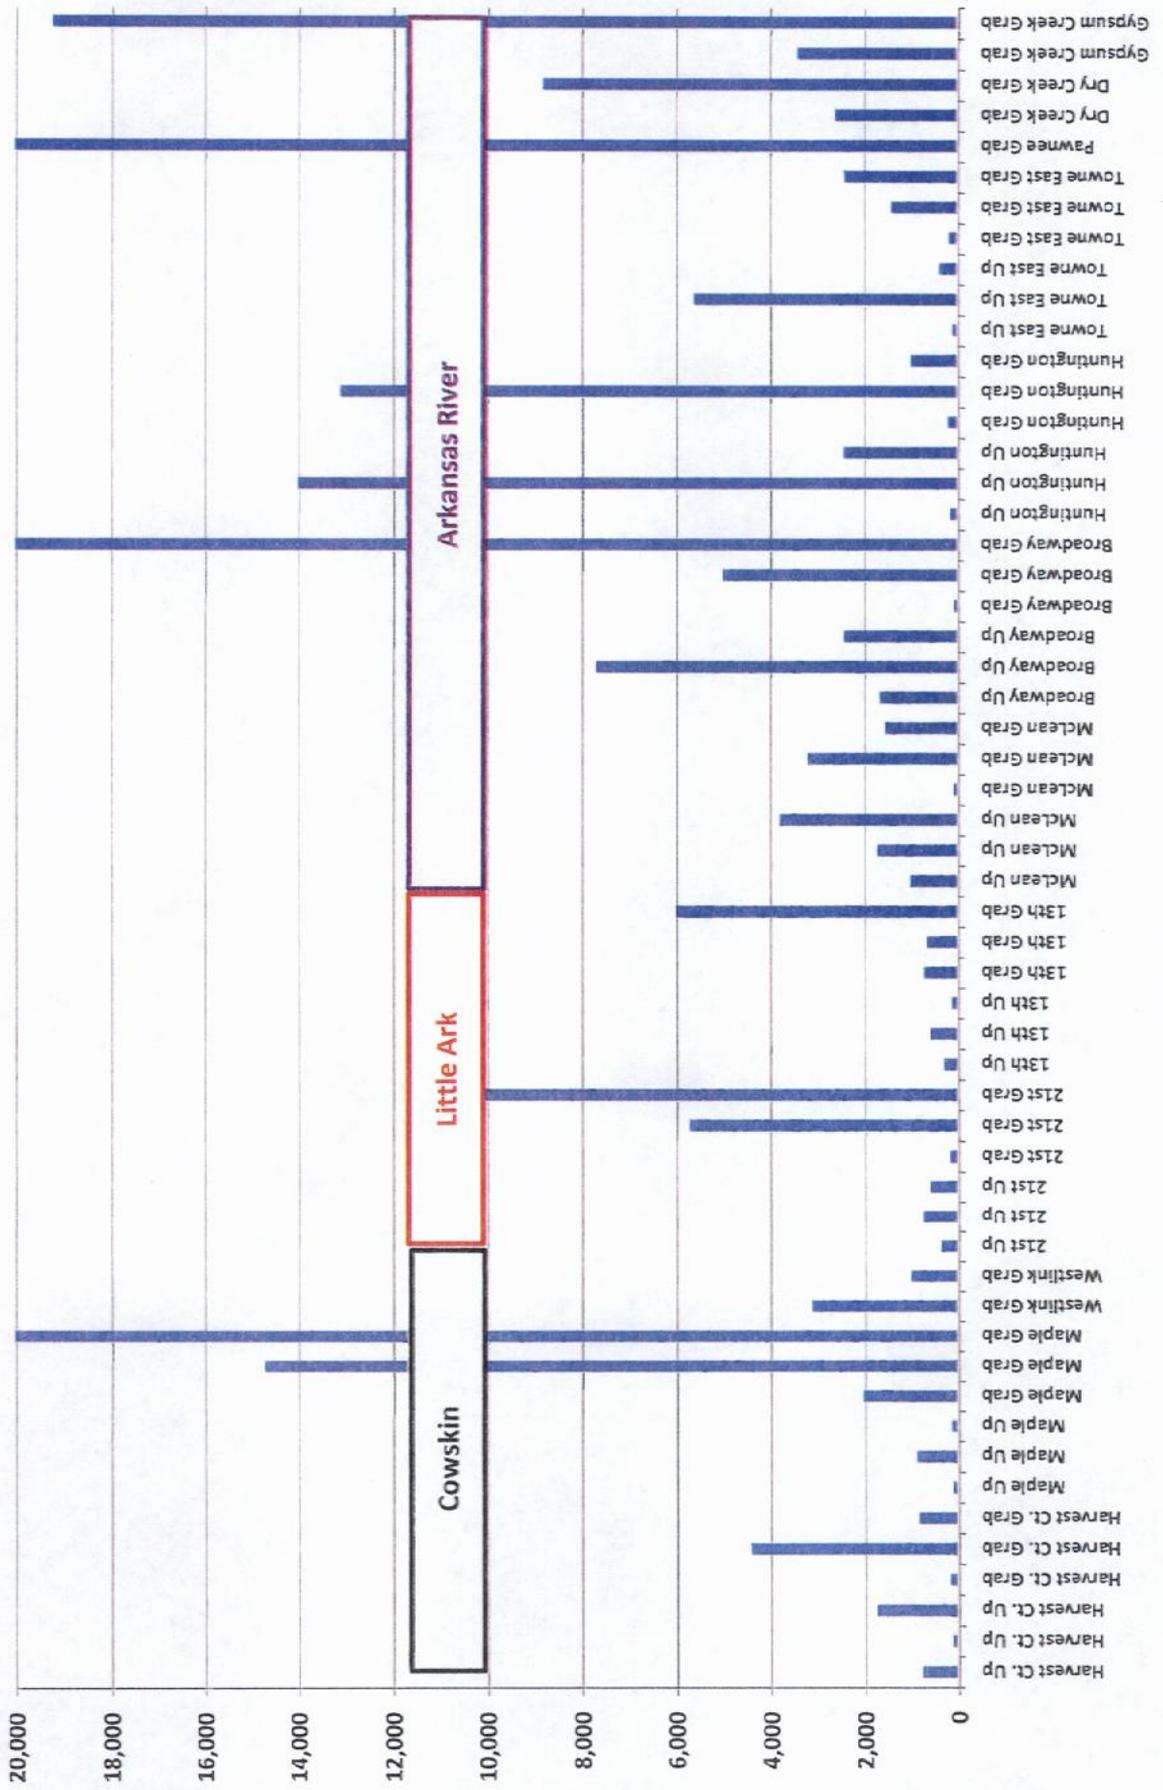

The current reporting period covers the fourth year that the expanded complement of sample sites and sample requirements have been necessary under the current Permit. Therefore, the following analysis continues to be based on a limited data set, and, until more data are compiled, reliable observations are limited.

- Precipitation for all storm events was moderate, and ranged from approximately 0.7" to 0.20".
- The City continued upstream sampling at all sites in 2012, and plan to continue doing so throughout 2013. Oddly, in half of the 2010 events, upstream samples were higher in E. coli than were the 1st flush grab samples. In 2011, only 2 of the 8 upstream samples were higher. In 2012, of the 15 samples that exceeded 4000 MPN, 12 were grab samples and 3 were upstream samples.
- In 2012, E.coli results varied widely both upstream and 1st flush. Land use in the surrounding drainage area showed no correlation to sample results.
- Again in 2012, BOD results were generally highest at the Cowskin sites, specifically at Harvest Ct.. The Little Ark basin also had elevated samples, but not as consistent as the Cowskin basin.
- The McLean sample site produced consistent Cd results above detection limits, with the exception of one sample at Broadway, McLean is the only site that was above MDL (1 ug/L).
- In 2011, approximately 1/3 of Cu and Zn samples were non-detect. In 2012, the breakdown was 34% of Cu, and 17% of Zn samples were non-detect.
- Approximately 85% of TSS results were less than 100 mg/L. Of the 20 results that exceeded 100 mg/L, it is interesting that 10 of those results came from the newly added 'open channel' (Westlink, Gyp Creek, Dry Creek) sites.
- Clearly, the Cowskin and Little Ark sites are the most phosphorous laden. Of the 22 non-detects City wide, only 5 non-detects were from those 2 (western) drainage basins. The other 17 non-detects were in the 'Ark' (eastern) half of the City.
- Not surprisingly, Total Nitrogen followed a similar west/east pattern of non-detects.

Dear Mr. Hardesty:

This laboratory report containing the samples indicated below, includes 6 pages for the analytical report, 1 page(s) for the chain of custody and/or analysis request, and 1 page(s) for the sample receipt form.

<u>CAS LAB ID #</u>	<u>SAMPLE DESCRIPTION</u>	<u>SAMPLE TYPE</u>	<u>DATE SAMPLED</u>
12020416	Grotto Pool	Liquid	2/3/2012
12020417	Grotto Gate	Liquid	2/3/2012

The Appendix and Quality Control sections are integral parts of this laboratory report and may contain important data qualifiers.

All results are reported on a wet weight basis unless otherwise stated.

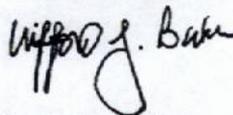

Samples will be retained for thirty days unless Continental is otherwise notified.

Continental is accredited by the State of Kansas through the National Environmental Laboratory Accreditation Program (NELAP). The results contained in this report were obtained using Continental's Standard Operating Procedures. These procedures are in substantial compliance with the approved methods referenced and the standards published by NELAP unless otherwise noted in the Appendix and Quality Control sections of this report.

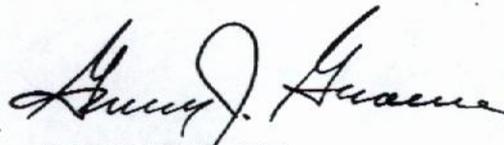

This report may not be reproduced, except in full, without written approval from Continental Analytical Services, Inc.

Thank you for choosing Continental for this project.

NELAP accreditation is issued under each EPA regulatory program for a given matrix/analyte/method combination. Continental is NELAP accredited for each matrix/analyte/method and EPA program cited in this Laboratory Report, except for those listed in the table below and for analyses performed in the field. For most of the analyses listed in the table, NELAP accreditation is not offered under the listed EPA program and Continental is NELAP accredited for the analysis, using the same analytical technology, but under a different EPA program. Continental's full NELAP accreditation status may be viewed at www.kdheks.gov/envlab. Note that unless qualified otherwise in the Laboratory Report, Continental performs all analyses, including each analysis listed in the table below, utilizing NELAP protocol.

 DESCRIPTION: Cowskin Creek @ 37th North

Report Date: 02/22/2012
 Date/Time Collected: 02/02/2012 08:22
 Date/Time Received: 02/02/2012 10:40
 Sample Collector KLING, TABATHA

Site code: FAC

Sample Type:

Sample Frequency: MTH

Comments: Lower plant sample point for Cowskin Creek

Parameter	Analytical Result	Units	MDL	Analytical Method	Analysis Date and Time	Analyst
Chloride	155	mg/L	5	EPA 300.0	02/02/2012 15:59	KCARTER
Sulfate	114	mg/L	5	EPA 300.0	02/02/2012 15:59	KCARTER
Total Hardness Manual	208	mg/L	1	SM 2340 C	02/22/2012 11:29	KCARTER

This report is respectfully submitted by Terry A. Pajor, Laboratory Director, Wichita Municipal Water and Wastewater Laboratory. If you have any question, please call me at 316-269-4766. The results relate only to the sample as received by the laboratory. This report shall not be reproduced except in full, without the written approval of the laboratory.

Dear Ms. Snapp:

This laboratory report containing the samples indicated below, includes 11 pages for the analytical report, 1 page(s) for the chain of custody and/or analysis request, and 1 page(s) for the sample receipt form.

<u>CAS LAB ID #</u>	<u>SAMPLE DESCRIPTION</u>	<u>SAMPLE TYPE</u>	<u>DATE SAMPLED</u>
12010825	COW @ K-42	Liquid	1/5/2012
12010826	COW @ PAWNEE	Liquid	1/5/2012
12010827	COW @ 37TH	Liquid	1/5/2012
12010828	COW @ 135TH	Liquid	1/5/2012
12010829	BIG ARK @ 47TH	Liquid	1/5/2012

The Appendix and Quality Control sections are integral parts of this laboratory report and may contain important data qualifiers.

All results are reported on a wet weight basis unless otherwise stated.

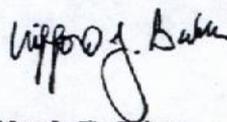

Samples will be retained for thirty days unless Continental is otherwise notified.

Continental is accredited by the State of Kansas through the National Environmental Laboratory Accreditation Program (NELAP). The results contained in this report were obtained using Continental's Standard Operating Procedures. These procedures are in substantial compliance with the approved methods referenced and the standards published by NELAP unless otherwise noted in the Appendix and Quality Control sections of this report.

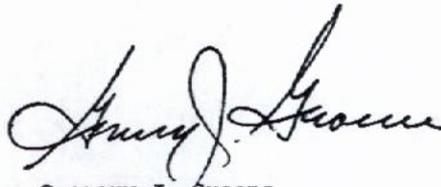

This report may not be reproduced, except in full, without written approval from Continental Analytical Services, Inc.

Thank you for choosing Continental for this project.

ND(), where reported, indicates the analyte was not detected above the Limit of Quantitation (LOQ). The concentration of the LOQ is inside the parentheses.

All samples which require cooling were received at a temperature of less than 6 degrees Celsius.

No analysis with a holding time of seventy-two hours or less was performed in this Continental order.

NELAP accreditation is issued under each EPA regulatory program for a given matrix/analyte/method combination. Continental is NELAP accredited for each matrix/analyte/method and EPA program cited in this Laboratory Report, except for those listed in the table below and analysis performed in the field. For most of the analyses listed in the table, NELAP accreditation is not offered under the listed EPA program and Continental is NELAP accredited for the analysis, using the same analytical technology, but under a different EPA program. Continental's full NELAP accreditation status may be viewed at www.kdheks.gov/envlab. Note that unless qualified otherwise in the Laboratory Report, Continental performs all analyses, including each analysis listed in the table below, utilizing NELAP protocol.

The Appendix and Quality Control sections are integral parts of this laboratory report and may contain important data qualifiers.

All results are reported on a wet weight basis unless otherwise stated.

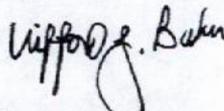

Samples will be retained for thirty days unless Continental is otherwise notified.

Continental is accredited by the State of Kansas through the National Environmental Laboratory Accreditation Program (NELAP). The results contained in this report were obtained using Continental's Standard Operating Procedures. These procedures are in substantial compliance with the approved methods referenced and the standards published by NELAP unless otherwise noted in the Appendix and Quality Control sections of this report.

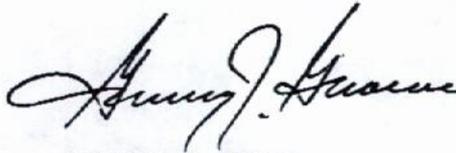

This report may not be reproduced, except in full, without written approval from Continental Analytical Services, Inc.

Thank you for choosing Continental for this project.

ND(), where reported, indicates the analyte was not detected above the Limit of Quantitation (LOQ). The concentration of the LOQ is inside the parentheses.

All samples which require cooling were received at a temperature of less than 6 degrees Celsius.

No analysis with a holding time of seventy-two hours or less was performed in this Continental order.

NELAP accreditation is issued under each EPA regulatory program for a given matrix/analyte/method combination. Continental is NELAP accredited for each matrix/analyte/method and EPA program cited in this Laboratory Report, except for those listed in the table below and for analyses performed in the field. For most of the analyses listed in the table, NELAP accreditation is not offered under the listed EPA program and Continental is NELAP accredited for the analysis, using the same analytical technology, but under a different EPA program. Continental's full NELAP accreditation status may be viewed at www.kdheks.gov/envlab. Note that unless qualified otherwise in the Laboratory Report, Continental performs all analyses, including each analysis listed in the table below, utilizing NELAP protocol.

ND(), where reported, indicates the analyte was not detected above the Limit of Quantitation (LOQ). The concentration of the LOQ is inside the parentheses.

All samples which require cooling were received at a temperature of less than 6 degrees Celsius.

No analysis with a holding time of seventy-two hours or less was performed in this Continental order.

NELAP accreditation is issued under each EPA regulatory program for a given matrix/analyte/method combination. Continental is NELAP accredited for each matrix/analyte/method and EPA program cited in this Laboratory Report, except for those listed in the table below and analysis performed in the field. For most of the analyses listed in the table, NELAP accreditation is not offered under the listed EPA program and Continental is NELAP accredited for the analysis, using the same analytical technology, but under a different EPA program. Continental's full NELAP accreditation status may be viewed at www.kdheks.gov/envlab. Note that unless qualified otherwise in the Laboratory Report, Continental performs all analyses, including each analysis listed in the table below, utilizing NELAP protocol.

12020406	13th and River-Upstream	Liquid	2/3/2012

The Appendix and Quality Control sections are integral parts of this laboratory report and may contain important data qualifiers.

All results are reported on a wet weight basis unless otherwise stated.

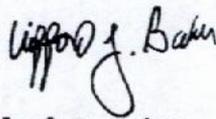

Samples will be retained for thirty days unless Continental is otherwise notified.

Continental is accredited by the State of Kansas through the National Environmental Laboratory Accreditation Program (NELAP). The results contained in this report were obtained using Continental's Standard Operating Procedures. These procedures are in substantial compliance with the approved methods referenced and the standards published by NELAP unless otherwise noted in the Appendix and Quality Control sections of this report.

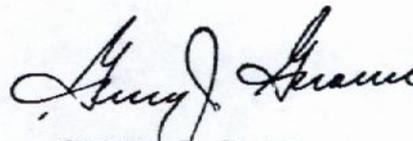

This report may not be reproduced, except in full, without written approval from Continental Analytical Services, Inc.

Thank you for choosing Continental for this project.

ND(), where reported, indicates the analyte was not detected above the Limit of Quantitation (LOQ). The concentration of the LOQ is inside the parentheses.

All samples which require cooling were received at a temperature of less than 6 degrees Celsius.

The following table presents the date and time sampled, the date and time analyzed, and the total time elapsed for each analysis with an EPA recommended holding time of seventy-two hours or less.

<u>CAS LAB ID #</u>	<u>ANALYSIS</u>	<u>DATE/TIME SAMPLED</u>	<u>DATE/TIME ANALYZED</u>	<u>ELAPSED HRS:MIN</u>

DM - NPDES requirements specify that dissolved metals and orthophosphate must be filtered within 15 minutes of the time of collection. This analysis did not meet these criteria.

QC - QC data qualifiers were noted. See the Quality Control Report.

NELAP accreditation is issued under each EPA regulatory program for a given matrix/analyte/method combination. Continental is NELAP accredited for each matrix/analyte/method and EPA program cited in this Laboratory Report, except for those listed in the table below and for analyses performed in the field. For most of the analyses listed in the table, NELAP accreditation is not offered under the listed EPA program and Continental is NELAP accredited for the analysis, using the same analytical technology, but under a different EPA program. Continental's full NELAP accreditation status may be viewed at www.kdheks.gov/envlab. Note that unless qualified otherwise in the Laboratory Report, Continental performs all analyses, including each analysis listed in the table below, utilizing NELAP protocol.

Data Qualifiers:

MN - The MS/MSD sample analyses were not performed on a sample from this Continental order number.

N/A - Not Applicable

J - The concentration or not detected (ND) value is below the Limit of Quantitation (LOQ) and is considered an estimated value.

- Limits not available.

** - RPD cannot be calculated.

Quality Control Report
Continuing Calibration Data Summary

Date Reported: 02/17/2012
Date Received: 02/03/2012
Continental File No: 8339
Continental Order No: 101255

Zinc, Dissolved, ICP-MS	02/08/2012	3IP3039	CCV recovery acceptable for this Instrument Batch.
Zinc, Tot. Rec., ICP-MS	02/09/2012	3IP3040	CCV recovery acceptable for this Instrument Batch.
Zinc, Tot. Rec., ICP-MS	02/09/2012	4IP3040	CCV recovery acceptable for this Instrument Batch.
Zinc, Dissolved, ICP-MS	02/15/2012	4IP3046	CCV recovery acceptable for this Instrument Batch.
Zinc, Dissolved, ICP-MS	02/15/2012	5IP3046	CCV recovery acceptable for this Instrument Batch.

Data Qualifiers:

CH - The continuing calibration verification (CCV) standard recovery for this analyte was above the method or SOP limit. The reported concentration for this analyte may be biased high.

- Laboratory Report Conclusion -

Dear Mr. Hardesty:

This laboratory report containing the samples indicated below, includes 10 pages for the analytical report, 1 page(s) for the chain of custody and/or analysis request, and 1 page(s) for the sample receipt form.

<u>CAS LAB ID #</u>	<u>SAMPLE DESCRIPTION</u>	<u>SAMPLE TYPE</u>	<u>DATE SAMPLED</u>
12041003	13th and River-Grab	Liquid	4/12/2012
12041004	13th and River-Composite	Liquid	4/12/2012
12041005	13th and River-Upstream	Liquid	4/12/2012

The Appendix and Quality Control sections are integral parts of this laboratory report and may contain important data qualifiers.

All results are reported on a wet weight basis unless otherwise stated.

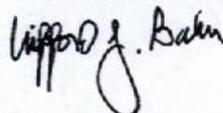

Samples will be retained for thirty days unless Continental is otherwise notified.

Continental is accredited by the State of Kansas through the National Environmental Laboratory Accreditation Program (NELAP). The results contained in this report were obtained using Continental's Standard Operating Procedures. These procedures are in substantial compliance with the approved methods referenced and the standards published by NELAP unless otherwise noted in the Appendix and Quality Control sections of this report.

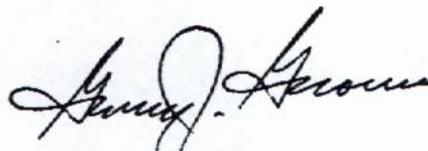

This report may not be reproduced, except in full, without written approval from Continental Analytical Services, Inc.

Thank you for choosing Continental for this project.

ND(), where reported, indicates the analyte was not detected above the Limit of Quantitation (LOQ). The concentration of the LOQ is inside the parentheses.

All samples which require cooling were received at a temperature of less than 6 degrees Celsius.

The following table presents the date and time sampled, the date and time analyzed, and the total time elapsed for each analysis with an EPA recommended holding time of seventy-two hours or less.

<u>CAS LAB ID #</u>	<u>ANALYSIS</u>	<u>DATE/TIME SAMPLED</u>	<u>DATE/TIME ANALYZED</u>	<u>ELAPSED HRS:MIN</u>

NELAP accreditation is issued under each EPA regulatory program for a given matrix/analyte/method combination. Continental is NELAP accredited for each matrix/analyte/method and EPA program cited in this Laboratory Report, except for those listed in the table below and for analyses performed in the field. For most of the analyses listed in the table, NELAP accreditation is not offered under the listed EPA program and Continental is NELAP accredited for the analysis, using the same analytical technology, but under a different EPA program. Continental's full NELAP accreditation status may be viewed at www.kdheks.gov/envlab. Note that unless qualified otherwise in the Laboratory Report, Continental performs all analyses, including each analysis listed in the table below, utilizing NELAP protocol.

Dear Mr. Hardesty:

This laboratory report containing the samples indicated below, includes 12 pages for the analytical report, 1 page(s) for the chain of custody and/or analysis request, and 1 page(s) for the sample receipt form.

<u>CAS LAB ID #</u>	<u>SAMPLE DESCRIPTION</u>	<u>SAMPLE TYPE</u>	<u>DATE SAMPLED</u>
12020413	21st and Hood-Grab	Liquid	2/3/2012
12020414	21st and Hood-Composite	Liquid	2/3/2012
12020415	21st and Hood-Upstream	Liquid	2/3/2012

The Appendix and Quality Control sections are integral parts of this laboratory report and may contain important data qualifiers.

All results are reported on a wet weight basis unless otherwise stated.

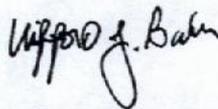

Samples will be retained for thirty days unless Continental is otherwise notified.

Continental is accredited by the State of Kansas through the National Environmental Laboratory Accreditation Program (NELAP). The results contained in this report were obtained using Continental's Standard Operating Procedures. These procedures are in substantial compliance with the approved methods referenced and the standards published by NELAP unless otherwise noted in the Appendix and Quality Control sections of this report.

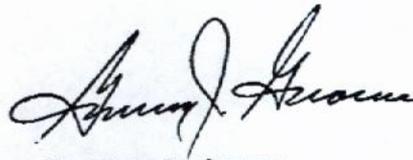

This report may not be reproduced, except in full, without written approval from Continental Analytical Services, Inc.

Thank you for choosing Continental for this project.

ND(), where reported, indicates the analyte was not detected above the Limit of Quantitation (LOQ). The concentration of the LOQ is inside the parentheses.

All samples which require cooling were received at a temperature of less than 6 degrees Celsius.

The following table presents the date and time sampled, the date and time analyzed, and the total time elapsed for each analysis with an EPA recommended holding time of seventy-two hours or less.

<u>CAS LAB ID #</u>	<u>ANALYSIS</u>	<u>DATE/TIME SAMPLED</u>	<u>DATE/TIME ANALYZED</u>	<u>ELAPSED HRS:MIN</u>

DM - NPDES requirements specify that dissolved metals and orthophosphate must be filtered within 15 minutes of the time of collection. This analysis did not meet these criteria.

QC - QC data qualifiers were noted. See the Quality Control Report.

NELAP accreditation is issued under each EPA regulatory program for a given matrix/analyte/method combination. Continental is NELAP accredited for each matrix/analyte/method and EPA program cited in this Laboratory Report, except for those listed in the table below and for analyses performed in the field. For most of the analyses listed in the table, NELAP accreditation is not offered under the listed EPA program and Continental is NELAP accredited for the analysis, using the same analytical technology, but under a different EPA program. Continental's full NELAP accreditation status may be viewed at www.kdheks.gov/envlab. Note that unless qualified otherwise in the Laboratory Report, Continental performs all analyses, including each analysis listed in the table below, utilizing NELAP protocol.

Dear Mr. Hardesty:

This laboratory report containing the samples indicated below, includes 11 pages for the analytical report, 1 page(s) for the chain of custody and/or analysis request, and 1 page(s) for the sample receipt form.

<u>CAS LAB ID #</u>	<u>SAMPLE DESCRIPTION</u>	<u>SAMPLE TYPE</u>	<u>DATE SAMPLED</u>
12041010	21st and Hood-Grab	Liquid	4/12/2012
12041011	21st and Hood-Composite	Liquid	4/12/2012
12041012	21st and Hood-Upstream	Liquid	4/12/2012

The Appendix and Quality Control sections are integral parts of this laboratory report and may contain important data qualifiers.

All results are reported on a wet weight basis unless otherwise stated.

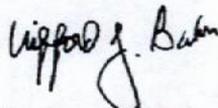

Samples will be retained for thirty days unless Continental is otherwise notified.

Continental is accredited by the State of Kansas through the National Environmental Laboratory Accreditation Program (NELAP). The results contained in this report were obtained using Continental's Standard Operating Procedures. These procedures are in substantial compliance with the approved methods referenced and the standards published by NELAP unless otherwise noted in the Appendix and Quality Control sections of this report.

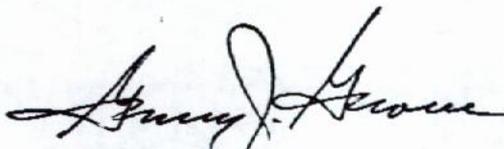

This report may not be reproduced, except in full, without written approval from Continental Analytical Services, Inc.

Thank you for choosing Continental for this project.

ND(), where reported, indicates the analyte was not detected above the Limit of Quantitation (LOQ). The concentration of the LOQ is inside the parentheses.

All samples which require cooling were received at a temperature of less than 6 degrees Celsius.

The following table presents the date and time sampled, the date and time analyzed, and the total time elapsed for each analysis with an EPA recommended holding time of seventy-two hours or less.

<u>CAS LAB ID #</u>	<u>ANALYSIS</u>	<u>DATE/TIME SAMPLED</u>	<u>DATE/TIME ANALYZED</u>	<u>ELAPSED HRS:MIN</u>
12041011	BOD	04/12/2012 1105	04/13/2012 1455	27:50

DM - NPDES requirements specify that dissolved metals and orthophosphate must be filtered within 15 minutes of the time of collection. This analysis did not meet these criteria.

QC - QC data qualifiers were noted. See the Quality Control Report.

NELAP accreditation is issued under each EPA regulatory program for a given matrix/analyte/method combination. Continental is NELAP accredited for each matrix/analyte/method and EPA program cited in this Laboratory Report, except for those listed in the table below and for analyses performed in the field. For most of the analyses listed in the table, NELAP accreditation is not offered under the listed EPA program and Continental is NELAP accredited for the analysis, using the same analytical technology, but under a different EPA program. Continental's full NELAP accreditation status may be viewed at www.kdheks.gov/envlab. Note that unless qualified otherwise in the Laboratory Report, Continental performs all analyses, including each analysis listed in the table below, utilizing NELAP protocol.

Data Qualifiers:

MN - The MS/MSD sample analyses were not performed on a sample from this Continental order number.

N/A - Not Applicable

ML - The matrix spike and/or matrix spike duplicate recovery for this analyte was below the method or laboratory control limit. See LCS data for the basis for acceptance of this sample. The reported sample concentration is estimated.

MZ - The MSD recovery and the MS/MSD precision for this analyte were outside of method or laboratory control limits. See LCS data for the basis for

Custody Seal: Present: Intact / Broken Absent: X Seal No: _____

Seal Name: _____ Seal Date: _____

Seal matches Chain of Custody: Yes / No / N/A

Type of Packing Material: Blue Ice Ice / Melted Ice / Bubble / Foam / Paper / Peanuts / Vermiculite / None / Other: _____

Cooler Temperature (°C): Original Reading (°C) 1.1 Corrected Reading (°C) 1.6

Temp. By: Temp. Blank Cooler Surface: Glass / Plastic / Metal / Other: _____

min
4-12-12

Thermo. ID No.: 585 Thermo. Correction Factor (°C): 0.5

Evidence of Cooling and date received = date sampled

Sample Receipt Discrepancies: No Yes (See below for discrepancies.)

Note: If discrepancies are present, CAS will proceed with analyses until/unless directed otherwise by the client.

Project ID: Stormwater
Purchase Auth: BP800121

Dear Mr. Hardesty:

This laboratory report containing the samples indicated below, includes 10 pages for the analytical report, 1 page(s) for the chain of custody and/or analysis request, and 1 page(s) for the sample receipt form.

<u>CAS LAB ID #</u>	<u>SAMPLE DESCRIPTION</u>	<u>SAMPLE TYPE</u>	<u>DATE SAMPLED</u>
12090965	McLean - Grab	Liquid	9/13/2012
12090966	McLean - Composite	Liquid	9/13/2012
12090967	McLean - Upstream	Liquid	9/13/2012

The Appendix and Quality Control sections are integral parts of this laboratory report and may contain important data qualifiers.

All results are reported on a wet weight basis unless otherwise stated.

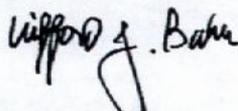

Samples will be retained for thirty days unless Continental is otherwise notified.

Continental is accredited by the State of Kansas through the National Environmental Laboratory Accreditation Program (NELAP). The results contained in this report were obtained using Continental's Standard Operating Procedures. These procedures are in substantial compliance with the approved methods referenced and the standards published by NELAP unless otherwise noted in the Appendix and Quality Control sections of this report.

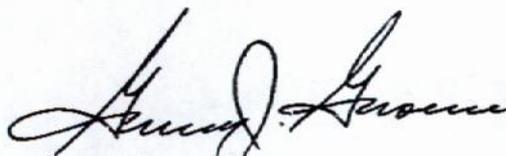

This report may not be reproduced, except in full, without written approval from Continental Analytical Services, Inc.

Thank you for choosing Continental for this project.

ND(), where reported, indicates the analyte was not detected above the Limit of Quantitation (LOQ). The concentration of the LOQ is inside the parentheses.

All samples which require cooling were received at a temperature of less than 6 degrees Celsius.

The following table presents the date and time sampled, the date and time analyzed, and the total time elapsed for each analysis with an EPA recommended holding time of seventy-two hours or less.

<u>CAS LAB ID #</u>	<u>ANALYSIS</u>	<u>DATE/TIME</u> <u>SAMPLED</u>	<u>DATE/TIME</u> <u>ANALYZED</u>	<u>ELAPSED</u> <u>HRS:MIN</u>
12090966	BOD	09/13/2012 1455	09/14/2012 1755	27:00
12090966	Nitrate, as N	09/13/2012 1455	09/14/2012 1519	24:24
12090966	Nitrite, as N	09/13/2012 1455	09/14/2012 1519	24:24

DM - NPDES requirements specify that dissolved metals and orthophosphate must be filtered within 15 minutes of the time of collection. This analysis did not meet these criteria.

NELAP accreditation is issued under each EPA regulatory program for a given matrix/analyte/method combination. Continental is NELAP accredited for each matrix/analyte/method and EPA program cited in this Laboratory Report, except for those listed in the table below and for analyses performed in the field. For most of the analyses listed in the table, NELAP accreditation is not offered under the listed EPA program and Continental is NELAP accredited for the analysis, using the same analytical technology, but under a different EPA program. Continental's full NELAP accreditation status may be viewed at www.kdheks.gov/envlab. Note that unless qualified otherwise in the Laboratory Report, Continental performs all analyses, including each analysis listed in the table below, utilizing NELAP protocol.

Data Qualifiers:

T - MS/MSD cannot be performed for this analysis. The MS result is the same as the sample result. The MSD result is a duplicate of the sample.

MN - The MS/MSD sample analyses were not performed on a sample from this Continental order number.

- Limits not available.

** - RPD cannot be calculated.

Dear Mr. Hardesty:

This laboratory report containing the samples indicated below, includes 12 pages for the analytical report, 1 page(s) for the chain of custody and/or analysis request, and 1 page(s) for the sample receipt form.

<u>CAS LAB ID #</u>	<u>SAMPLE DESCRIPTION</u>	<u>SAMPLE TYPE</u>	<u>DATE SAMPLED</u>
12090977	13th and River - Grab	Liquid	9/13/2012
12090978	13th and River - Composite	Liquid	9/13/2012
12090979	13th and River - Upstream	Liquid	9/13/2012

The Appendix and Quality Control sections are integral parts of this laboratory report and may contain important data qualifiers.

All results are reported on a wet weight basis unless otherwise stated.

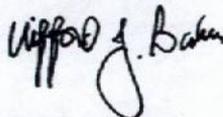

Samples will be retained for thirty days unless Continental is otherwise notified.

Continental is accredited by the State of Kansas through the National Environmental Laboratory Accreditation Program (NELAP). The results contained in this report were obtained using Continental's Standard Operating Procedures. These procedures are in substantial compliance with the approved methods referenced and the standards published by NELAP unless otherwise noted in the Appendix and Quality Control sections of this report.

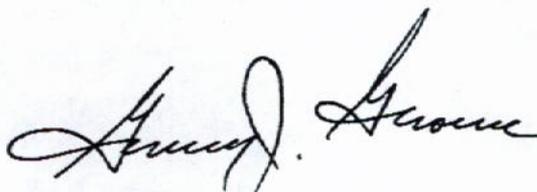

This report may not be reproduced, except in full, without written approval from Continental Analytical Services, Inc.

Thank you for choosing Continental for this project.

ND(), where reported, indicates the analyte was not detected above the Limit of Quantitation (LOQ). The concentration of the LOQ is inside the parentheses.

All samples which require cooling were received at a temperature of less than 6 degrees Celsius.

The following table presents the date and time sampled, the date and time analyzed, and the total time elapsed for each analysis with an EPA recommended holding time of seventy-two hours or less.

<u>CAS LAB ID #</u>	<u>ANALYSIS</u>	<u>DATE/TIME</u> <u>SAMPLED</u>	<u>DATE/TIME</u> <u>ANALYZED</u>	<u>ELAPSED</u> <u>HRS:MIN</u>

12090979	BOD	09/13/2012 1535	09/15/2012 1311	45:36
12090979	Nitrate, as N	09/13/2012 1535	09/14/2012 1807	26:32
12090979	Nitrite, as N	09/13/2012 1535	09/14/2012 1807	26:32

DM - NPDES requirements specify that dissolved metals and orthophosphate must be filtered within 15 minutes of the time of collection. This analysis did not meet these criteria.

NELAP accreditation is issued under each EPA regulatory program for a given matrix/analyte/method combination. Continental is NELAP accredited for each matrix/analyte/method and EPA program cited in this Laboratory Report, except for those listed in the table below and for analyses performed in the field. For most of the analyses listed in the table, NELAP accreditation is not offered under the listed EPA program and Continental is NELAP accredited for the analysis, using the same analytical technology, but under a different EPA program. Continental's full NELAP accreditation status may be viewed at www.kdheks.gov/envlab. Note that unless qualified otherwise in the Laboratory Report, Continental performs all analyses, including each analysis listed in the table below, utilizing NELAP protocol.

Dear Mr. Hardesty:

This laboratory report containing the samples indicated below, includes 12 pages for the analytical report, 1 page(s) for the chain of custody and/or analysis request, and 1 page(s) for the sample receipt form.

<u>CAS LAB ID #</u>	<u>SAMPLE DESCRIPTION</u>	<u>SAMPLE TYPE</u>	<u>DATE SAMPLED</u>
12090980	21st and Hood - Grab	Liquid	9/13/2012
12090981	21st and Hood - Composite	Liquid	9/13/2012
12090982	21st and Hood - Upstream	Liquid	9/13/2012

The Appendix and Quality Control sections are integral parts of this laboratory report and may contain important data qualifiers.

All results are reported on a wet weight basis unless otherwise stated.

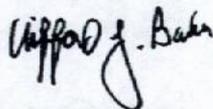

Samples will be retained for thirty days unless Continental is otherwise notified.

Continental is accredited by the State of Kansas through the National Environmental Laboratory Accreditation Program (NELAP). The results contained in this report were obtained using Continental's Standard Operating Procedures. These procedures are in substantial compliance with the approved methods referenced and the standards published by NELAP unless otherwise noted in the Appendix and Quality Control sections of this report.

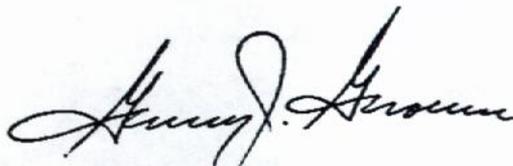

This report may not be reproduced, except in full, without written approval from Continental Analytical Services, Inc.

Thank you for choosing Continental for this project.

ND(), where reported, indicates the analyte was not detected above the Limit of Quantitation (LOQ). The concentration of the LOQ is inside the parentheses.

All samples which require cooling were received at a temperature of less than 6 degrees Celsius.

The following table presents the date and time sampled, the date and time analyzed, and the total time elapsed for each analysis with an EPA recommended holding time of seventy-two hours or less.

<u>CAS LAB ID #</u>	<u>ANALYSIS</u>	<u>DATE/TIME</u> <u>SAMPLED</u>	<u>DATE/TIME</u> <u>ANALYZED</u>	<u>ELAPSED</u> <u>HRS:MIN</u>

DM - NPDES requirements specify that dissolved metals and orthophosphate must be filtered within 15 minutes of the time of collection. This analysis did not meet these criteria.

NELAP accreditation is issued under each EPA regulatory program for a given matrix/analyte/method combination. Continental is NELAP accredited for each matrix/analyte/method and EPA program cited in this Laboratory Report, except for those listed in the table below and for analyses performed in the field. For most of the analyses listed in the table, NELAP accreditation is not offered under the listed EPA program and Continental is NELAP accredited for the analysis, using the same analytical technology, but under a different EPA program. Continental's full NELAP accreditation status may be viewed at www.kdheks.gov/envlab. Note that unless qualified otherwise in the Laboratory Report, Continental performs all analyses, including each analysis listed in the table below, utilizing NELAP protocol.

Cooler/Sample Receipt Form (C/S RF)

CAS Order No.: 10084

Client Name: City of Wichita

CAS File No.: 8339

Sample ID's in cooler: 21st & Hood

Cooler 1 of 1 for this CAS Order No.

Cooler Identification: CAS Cooler #: 1462 / Client's Cooler / Box / Letter / Hand-delivered
Other: _____

Date/Time Cooler Received: 9 / 13 / 12 19:30

Delivered By: UPS / FedEx / AB Express / Field Svcs / Mail Walk-In / Other: _____

Custody Seal: Present: Intact / Broken Absent Seal No: _____

Seal Name: _____ Seal Date: _____

Seal matches Chain of Custody: Yes / No / N/A

Type of Packing Material: Blue Ice Ice / Melted Ice / Bubble / Foam / Paper / Peanuts / Vermiculite / None / Other: _____

Cooler Temperature (°C): Original Reading (°C) 0.5 Corrected Reading (°C) 1.0

AB
9/13/12

Temp. By: Temp. Blank Cooler Surface: Glass / Plastic / Metal / Other: _____

Thermo. ID No.: 585 Thermo. Correction Factor (°C): +0.5

Evidence of Cooling and date received = date sampled

Sample Receipt Discrepancies: No Yes (See below for discrepancies.)

Note: If discrepancies are present, CAS will proceed with analyses until/unless directed otherwise by the client.

Dear Mr. Hardesty:

This laboratory report containing the samples indicated below, includes 9 pages for the analytical report, 1 page(s) for the chain of custody and/or analysis request, and 1 page(s) for the sample receipt form.

<u>CAS LAB ID #</u>	<u>SAMPLE DESCRIPTION</u>	<u>SAMPLE TYPE</u>	<u>DATE SAMPLED</u>
12090983	Gypsum Creek - Grab	Liquid	9/13/2012
12090984	Gypsum Creek - Composite	Liquid	9/13/2012

The Appendix and Quality Control sections are integral parts of this laboratory report and may contain important data qualifiers.

All results are reported on a wet weight basis unless otherwise stated.

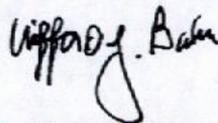

Samples will be retained for thirty days unless Continental is otherwise notified.

Continental is accredited by the State of Kansas through the National Environmental Laboratory Accreditation Program (NELAP). The results contained in this report were obtained using Continental's Standard Operating Procedures. These procedures are in substantial compliance with the approved methods referenced and the standards published by NELAP unless otherwise noted in the Appendix and Quality Control sections of this report.

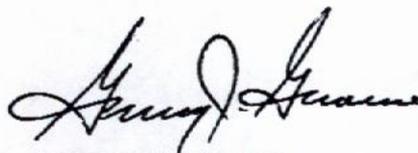

This report may not be reproduced, except in full, without written approval from Continental Analytical Services, Inc.

Thank you for choosing Continental for this project.

ND(), where reported, indicates the analyte was not detected above the Limit of Quantitation (LOQ). The concentration of the LOQ is inside the parentheses.

All samples which require cooling were received at a temperature of less than 6 degrees Celsius.

The following table presents the date and time sampled, the date and time analyzed, and the total time elapsed for each analysis with an EPA recommended holding time of seventy-two hours or less.

<u>CAS LAB ID #</u>	<u>ANALYSIS</u>	<u>DATE/TIME</u> <u>SAMPLED</u>	<u>DATE/TIME</u> <u>ANALYZED</u>	<u>ELAPSED</u> <u>HRS:MIN</u>
12090984	BOD	09/13/2012 1555	09/15/2012 1311	45:16
12090984	Nitrate, as N	09/13/2012 1555	09/14/2012 2225	30:30
12090984	Nitrite, as N	09/13/2012 1555	09/14/2012 2225	30:30

DM - NPDES requirements specify that dissolved metals and orthophosphate must be filtered within 15 minutes of the time of collection. This analysis did not meet these criteria.

NELAP accreditation is issued under each EPA regulatory program for a given matrix/analyte/method combination. Continental is NELAP accredited for each matrix/analyte/method and EPA program cited in this Laboratory Report, except for those listed in the table below and for analyses performed in the field. For most of the analyses listed in the table, NELAP accreditation is not offered under the listed EPA program and Continental is NELAP accredited for the analysis, using the same analytical technology, but under a different EPA program. Continental's full NELAP accreditation status may be viewed at www.kdheks.gov/envlab. Note that unless qualified otherwise in the Laboratory Report, Continental performs all analyses, including each analysis listed in the table below, utilizing NELAP protocol.

Dear Mr. Hardesty:

This laboratory report containing the samples indicated below, includes 10 pages for the analytical report, 1 page(s) for the chain of custody and/or analysis request, and 1 page(s) for the sample receipt form.

<u>CAS LAB ID #</u>	<u>SAMPLE DESCRIPTION</u>	<u>SAMPLE TYPE</u>	<u>DATE SAMPLED</u>
12090962	Huntington - Grab	Liquid	9/13/2012
12090963	Huntington - Composite	Liquid	9/13/2012
12090964	Huntington - Upstream	Liquid	9/13/2012

The Appendix and Quality Control sections are integral parts of this laboratory report and may contain important data qualifiers.

All results are reported on a wet weight basis unless otherwise stated.

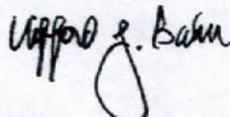

Samples will be retained for thirty days unless Continental is otherwise notified.

Continental is accredited by the State of Kansas through the National Environmental Laboratory Accreditation Program (NELAP). The results contained in this report were obtained using Continental's Standard Operating Procedures. These procedures are in substantial compliance with the approved methods referenced and the standards published by NELAP unless otherwise noted in the Appendix and Quality Control sections of this report.

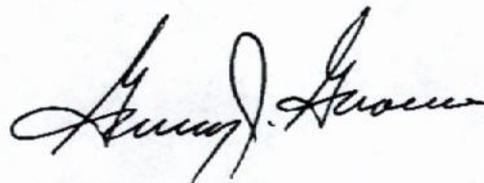

This report may not be reproduced, except in full, without written approval from Continental Analytical Services, Inc.

Thank you for choosing Continental for this project.

ND(), where reported, indicates the analyte was not detected above the Limit of Quantitation (LOQ). The concentration of the LOQ is inside the parentheses.

All samples which require cooling were received at a temperature of less than 6 degrees Celsius.

The following table presents the date and time sampled, the date and time analyzed, and the total time elapsed for each analysis with an EPA recommended holding time of seventy-two hours or less.

<u>CAS LAB ID #</u>	<u>ANALYSIS</u>	<u>DATE/TIME</u> <u>SAMPLED</u>	<u>DATE/TIME</u> <u>ANALYZED</u>	<u>ELAPSED</u> <u>HRS:MIN</u>

DM - NPDES requirements specify that dissolved metals and orthophosphate must be filtered within 15 minutes of the time of collection. This analysis did not meet these criteria.

NELAP accreditation is issued under each EPA regulatory program for a given matrix/analyte/method combination. Continental is NELAP accredited for each matrix/analyte/method and EPA program cited in this Laboratory Report, except for those listed in the table below and for analyses performed in the field. For most of the analyses listed in the table, NELAP accreditation is not offered under the listed EPA program and Continental is NELAP accredited for the analysis, using the same analytical technology, but under a different EPA program. Continental's full NELAP accreditation status may be viewed at www.kdheks.gov/envlab. Note that unless qualified otherwise in the Laboratory Report, Continental performs all analyses, including each analysis listed in the table below, utilizing NELAP protocol.

Dear Mr. Hardesty:

This laboratory report containing the samples indicated below, includes 12 pages for the analytical report, 1 page(s) for the chain of custody and/or analysis request, and 1 page(s) for the sample receipt form.

<u>CAS LAB ID #</u>	<u>SAMPLE DESCRIPTION</u>	<u>SAMPLE TYPE</u>	<u>DATE SAMPLED</u>
12090959	Broadway - Grab	Liquid	9/13/2012
12090960	Broadway - Composite	Liquid	9/13/2012
12090961	Broadway - Upstream	Liquid	9/13/2012

The Appendix and Quality Control sections are integral parts of this laboratory report and may contain important data qualifiers.

All results are reported on a wet weight basis unless otherwise stated.

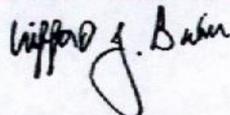

Samples will be retained for thirty days unless Continental is otherwise notified.

Continental is accredited by the State of Kansas through the National Environmental Laboratory Accreditation Program (NELAP). The results contained in this report were obtained using Continental's Standard Operating Procedures. These procedures are in substantial compliance with the approved methods referenced and the standards published by NELAP unless otherwise noted in the Appendix and Quality Control sections of this report.

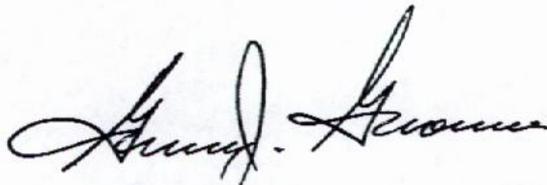

This report may not be reproduced, except in full, without written approval from Continental Analytical Services, Inc.

Thank you for choosing Continental for this project.

Continental Order No: 106027

ND(), where reported, indicates the analyte was not detected above the Limit of Quantitation (LOQ). The concentration of the LOQ is inside the parentheses.

All samples which require cooling were received at a temperature of less than 6 degrees Celsius.

The following table presents the date and time sampled, the date and time analyzed, and the total time elapsed for each analysis with an EPA recommended holding time of seventy-two hours or less.

<u>CAS LAB ID #</u>	<u>ANALYSIS</u>	<u>DATE/TIME SAMPLED</u>	<u>DATE/TIME ANALYZED</u>	<u>ELAPSED HRS:MIN</u>
12090960	BOD	09/13/2012 1430	09/14/2012 1755	27:25
12090960	Nitrate, as N	09/13/2012 1430	09/14/2012 1201	21:31
12090960	Nitrite, as N	09/13/2012 1430	09/14/2012 1201	21:31
12090961	BOD	09/13/2012 1435	09/14/2012 1755	27:20
12090961	Nitrate, as N	09/13/2012 1435	09/14/2012 1418	23:43
12090961	Nitrite, as N	09/13/2012 1435	09/14/2012 1418	23:43

DM - NPDES requirements specify that dissolved metals and orthophosphate must be filtered within 15 minutes of the time of collection. This analysis did not meet these criteria.

NELAP accreditation is issued under each EPA regulatory program for a given matrix/analyte/method combination. Continental is NELAP accredited for each matrix/analyte/method and EPA program cited in this Laboratory Report, except for those listed in the table below and for analyses performed in the field. For most of the analyses listed in the table, NELAP accreditation is not offered under the listed EPA program and Continental is NELAP accredited for the analysis, using the same analytical technology, but under a different EPA program. Continental's full NELAP accreditation status may be viewed at www.kdheks.gov/envlab. Note that unless qualified otherwise in the Laboratory Report, Continental performs all analyses, including each analysis listed in the table below, utilizing NELAP protocol.

Data Qualifiers:

MN - The MS/MSD sample analyses were not performed on a sample from this Continental order number.

T - MS/MSD cannot be performed for this analysis. The MS result is the same as the sample result. The MSD result is a duplicate of the sample.

- Limits not available.

** - RPD cannot be calculated.

Dear Mr. Hardesty:

This laboratory report containing the samples indicated below, includes 12 pages for the analytical report, 1 page(s) for the chain of custody and/or analysis request, and 1 page(s) for the sample receipt form.

<u>CAS LAB ID #</u>	<u>SAMPLE DESCRIPTION</u>	<u>SAMPLE TYPE</u>	<u>DATE SAMPLED</u>
12090968	Towne East - Grab	Liquid	9/13/2012
12090969	Towne East - Composite	Liquid	9/13/2012
12090970	Towne East - Upstream	Liquid	9/13/2012

The Appendix and Quality Control sections are integral parts of this laboratory report and may contain important data qualifiers.

All results are reported on a wet weight basis unless otherwise stated.

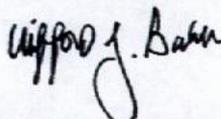

Samples will be retained for thirty days unless Continental is otherwise notified.

Continental is accredited by the State of Kansas through the National Environmental Laboratory Accreditation Program (NELAP). The results contained in this report were obtained using Continental's Standard Operating Procedures. These procedures are in substantial compliance with the approved methods referenced and the standards published by NELAP unless otherwise noted in the Appendix and Quality Control sections of this report.

This report may not be reproduced, except in full, without written approval from Continental Analytical Services, Inc.

Thank you for choosing Continental for this project.

ND(), where reported, indicates the analyte was not detected above the Limit of Quantitation (LOQ). The concentration of the LOQ is inside the parentheses.

All samples which require cooling were received at a temperature of less than 6 degrees Celsius.

The following table presents the date and time sampled, the date and time analyzed, and the total time elapsed for each analysis with an EPA recommended holding time of seventy-two hours or less.

<u>CAS LAB ID #</u>	<u>ANALYSIS</u>	<u>DATE/TIME SAMPLED</u>	<u>DATE/TIME ANALYZED</u>	<u>ELAPSED HRS:MIN</u>

DM - NPDES requirements specify that dissolved metals and orthophosphate must be filtered within 15 minutes of the time of collection. This analysis did not meet these criteria.

QC - QC data qualifiers were noted. See the Quality Control Report.

NELAP accreditation is issued under each EPA regulatory program for a given matrix/analyte/method combination. Continental is NELAP accredited for each matrix/analyte/method and EPA program cited in this Laboratory Report, except for those listed in the table below and for analyses performed in the field. For most of the analyses listed in the table, NELAP accreditation is not offered under the listed EPA program and Continental is NELAP accredited for the analysis, using the same analytical technology, but under a different EPA program. Continental's full NELAP accreditation status may be viewed at www.kdheks.gov/envlab. Note that unless qualified otherwise in the Laboratory Report, Continental performs all analyses, including each analysis listed in the table below, utilizing NELAP protocol.

Continental Analytical Services, Inc.
Cooler/Sample Receipt Form (C/S RF)

CAS Order No.: 100630

Client Name: City of Wichita

CAS File No.: 8339

Sample ID's in cooler: TOWNE East

Cooler 1 of 1 for this CAS Order No.

Cooler Identification: CAS Cooler #: TOWNE EAST / Client's Cooler / Box / Letter / Hand-delivered
Other: _____

Date/Time Cooler Received: 9 / 13 / 12 19:30

Delivered By: UPS / FedX / AB Express / Field Svcs / Mail Walk-In / Other: _____

Custody Seal: Present: Intact / Broken Absent Seal No: _____

Seal Name: _____ Seal Date: _____

Seal matches Chain of Custody: Yes / No / N/A

Type of Packing Material: Blue Ice Ice / Melted Ice / Bubble / Foam / Paper / Peanuts / Vermiculite / None / Other: _____

Cooler Temperature (°C): Original Reading (°C) 0.6 Corrected Reading (°C) 1.1

AB
9/13/12

Temp. By: Temp. Blank Cooler Surface: Glass / Plastic / Metal / Other: _____

Thermo. ID No.: 585 Thermo. Correction Factor (°C): +0.5

Evidence of Cooling and date received = date sampled

Sample Receipt Discrepancies: No Yes (See below for discrepancies.)

Note: If discrepancies are present, CAS will proceed with analyses until/unless directed otherwise by the client.

Dear Mr. Hardesty:

This laboratory report containing the samples indicated below, includes 12 pages for the analytical report, 1 page(s) for the chain of custody and/or analysis request, and 1 page(s) for the sample receipt form.

<u>CAS LAB ID #</u>	<u>SAMPLE DESCRIPTION</u>	<u>SAMPLE TYPE</u>	<u>DATE SAMPLED</u>
12090971	Harvest Ct. - Grab	Liquid	9/13/2012
12090972	Harvest Ct. - Composite	Liquid	9/13/2012
12090973	Harvest Ct. - Upstream	Liquid	9/13/2012

The Appendix and Quality Control sections are integral parts of this laboratory report and may contain important data qualifiers.

All results are reported on a wet weight basis unless otherwise stated.

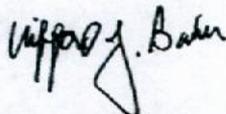

Samples will be retained for thirty days unless Continental is otherwise notified.

Continental is accredited by the State of Kansas through the National Environmental Laboratory Accreditation Program (NELAP). The results contained in this report were obtained using Continental's Standard Operating Procedures. These procedures are in substantial compliance with the approved methods referenced and the standards published by NELAP unless otherwise noted in the Appendix and Quality Control sections of this report.

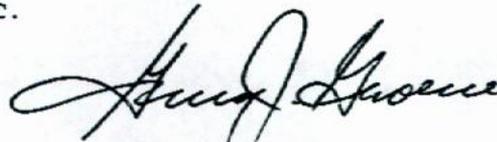

This report may not be reproduced, except in full, without written approval from Continental Analytical Services, Inc.

Thank you for choosing Continental for this project.

ND(), where reported, indicates the analyte was not detected above the Limit of Quantitation (LOQ). The concentration of the LOQ is inside the parentheses.

All samples which require cooling were received at a temperature of less than 6 degrees Celsius.

The following table presents the date and time sampled, the date and time analyzed, and the total time elapsed for each analysis with an EPA recommended holding time of seventy-two hours or less.

<u>CAS LAB ID #</u>	<u>ANALYSIS</u>	<u>DATE/TIME SAMPLED</u>	<u>DATE/TIME ANALYZED</u>	<u>ELAPSED HRS:MIN</u>

NELAP accreditation is issued under each EPA regulatory program for a given matrix/analyte/method combination. Continental is NELAP accredited for each matrix/analyte/method and EPA program cited in this Laboratory Report, except for those listed in the table below and for analyses performed in the field. For most of the analyses listed in the table, NELAP accreditation is not offered under the listed EPA program and Continental is NELAP accredited for the analysis, using the same analytical technology, but under a different EPA program. Continental's full NELAP accreditation status may be viewed at www.kdheks.gov/envlab. Note that unless qualified otherwise in the Laboratory Report, Continental performs all analyses, including each analysis listed in the table below, utilizing NELAP protocol.

Dear Mr. Hardesty:

This laboratory report containing the samples indicated below, includes 12 pages for the analytical report, 1 page(s) for the chain of custody and/or analysis request, and 1 page(s) for the sample receipt form.

<u>CAS LAB ID #</u>	<u>SAMPLE DESCRIPTION</u>	<u>SAMPLE TYPE</u>	<u>DATE SAMPLED</u>
12090974	Cowskin and Maple - Grab	Liquid	9/13/2012
12090975	Cowskin and Maple - Composite	Liquid	9/13/2012
12090976	Cowskin and Maple - Upstream	Liquid	9/13/2012

The Appendix and Quality Control sections are integral parts of this laboratory report and may contain important data qualifiers.

All results are reported on a wet weight basis unless otherwise stated.

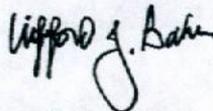

Samples will be retained for thirty days unless Continental is otherwise notified.

Continental is accredited by the State of Kansas through the National Environmental Laboratory Accreditation Program (NELAP). The results contained in this report were obtained using Continental's Standard Operating Procedures. These procedures are in substantial compliance with the approved methods referenced and the standards published by NELAP unless otherwise noted in the Appendix and Quality Control sections of this report.

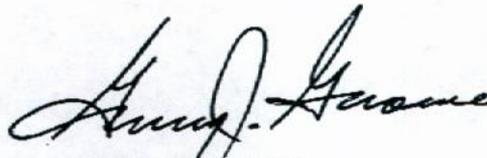

This report may not be reproduced, except in full, without written approval from Continental Analytical Services, Inc.

Thank you for choosing Continental for this project.

 City Hall, 8th Floor
 455 N. Main
 Wichita, KS 67202

Date Reported: 09/28/2012
 Date Received: 09/13/2012
 Continental File No: 8339
 Continental Order No: 106032

ND(), where reported, indicates the analyte was not detected above the Limit of Quantitation (LOQ). The concentration of the LOQ is inside the parentheses.

All samples which require cooling were received at a temperature of less than 6 degrees Celsius.

The following table presents the date and time sampled, the date and time analyzed, and the total time elapsed for each analysis with an EPA recommended holding time of seventy-two hours or less.

<u>CAS LAB ID #</u>	<u>ANALYSIS</u>	<u>DATE/TIME SAMPLED</u>	<u>DATE/TIME ANALYZED</u>	<u>ELAPSED HRS:MIN</u>
12090975	BOD	09/13/2012 1415	09/15/2012 1311	46:56
12090975	Nitrate, as N	09/13/2012 1415	09/14/2012 1721	27:06
12090975	Nitrite, as N	09/13/2012 1415	09/14/2012 1721	27:06
12090976	BOD	09/13/2012 1420	09/15/2012 1311	46:51
12090976	Nitrate, as N	09/13/2012 1420	09/14/2012 1736	27:16
12090976	Nitrite, as N	09/13/2012 1420	09/14/2012 1736	27:16

DM - NPDES requirements specify that dissolved metals and orthophosphate must be filtered within 15 minutes of the time of collection. This analysis did not meet these criteria.

NELAP accreditation is issued under each EPA regulatory program for a given matrix/analyte/method combination. Continental is NELAP accredited for each matrix/analyte/method and EPA program cited in this Laboratory Report, except for those listed in the table below and for analyses performed in the field. For most of the analyses listed in the table, NELAP accreditation is not offered under the listed EPA program and Continental is NELAP accredited for the analysis, using the same analytical technology, but under a different EPA program. Continental's full NELAP accreditation status may be viewed at www.kdheks.gov/envlab. Note that unless qualified otherwise in the Laboratory Report, Continental performs all analyses, including each analysis listed in the table below, utilizing NELAP protocol.

Cooler Identification: CAS Cooler #: 3135 / Client's Cooler / Box / Letter / Hand-delivered
Other: _____

Date/Time Cooler Received: 9 / 13 / 12 19:30

Delivered By: UPS / FedEx / AB Express / Field Svcs / Mail Walk-In / Other: _____

Custody Seal: Present: Intact / Broken Absent Seal No: _____

Seal Name: _____ Seal Date: _____

Seal matches Chain of Custody: Yes / No / N/A

Type of Packing Material: Blue Ice Ice Melted Ice / Bubble / Foam / Paper / Peanuts / Vermiculite / None / Other: _____

Cooler Temperature (°C): Original Reading (°C) 0.3 Corrected Reading (°C) 0.8

AB
9/13/12

Temp. By: Temp. Blank Cooler Surface: Glass / Plastic / Metal / Other: _____

Thermo. ID No.: 585 Thermo. Correction Factor (°C): +0.5

Evidence of Cooling and date received = date sampled

Sample Receipt Discrepancies: No Yes (See below for discrepancies.)

Note: If discrepancies are present, CAS will proceed with analyses until/unless directed otherwise by the client.

Dear Mr. Hardesty:

This laboratory report containing the samples indicated below, includes 9 pages for the analytical report, 1 page(s) for the chain of custody and/or analysis request, and 1 page(s) for the sample receipt form.

<u>CAS LAB ID #</u>	<u>SAMPLE DESCRIPTION</u>	<u>SAMPLE TYPE</u>	<u>DATE SAMPLED</u>
12090985	Pawnee and Canal - Grab	Liquid	9/13/2012
12090986	Pawnee and Canal - Composite	Liquid	9/13/2012

The Appendix and Quality Control sections are integral parts of this laboratory report and may contain important data qualifiers.

All results are reported on a wet weight basis unless otherwise stated.

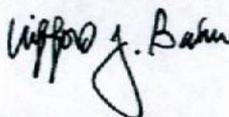

Samples will be retained for thirty days unless Continental is otherwise notified.

Continental is accredited by the State of Kansas through the National Environmental Laboratory Accreditation Program (NELAP). The results contained in this report were obtained using Continental's Standard Operating Procedures. These procedures are in substantial compliance with the approved methods referenced and the standards published by NELAP unless otherwise noted in the Appendix and Quality Control sections of this report.

This report may not be reproduced, except in full, without written approval from Continental Analytical Services, Inc.

Thank you for choosing Continental for this project.

ND(), where reported, indicates the analyte was not detected above the Limit of Quantitation (LOQ). The concentration of the LOQ is inside the parentheses.

All samples which require cooling were received at a temperature of less than 6 degrees Celsius.

The following table presents the date and time sampled, the date and time analyzed, and the total time elapsed for each analysis with an EPA recommended holding time of seventy-two hours or less.

<u>CAS LAB ID #</u>	<u>ANALYSIS</u>	<u>DATE/TIME SAMPLED</u>	<u>DATE/TIME ANALYZED</u>	<u>ELAPSED HRS:MIN</u>

NELAP accreditation is issued under each EPA regulatory program for a given matrix/analyte/method combination. Continental is NELAP accredited for each matrix/analyte/method and EPA program cited in this Laboratory Report, except for those listed in the table below and for analyses performed in the field. For most of the analyses listed in the table, NELAP accreditation is not offered under the listed EPA program and Continental is NELAP accredited for the analysis, using the same analytical technology, but under a different EPA program. Continental's full NELAP accreditation status may be viewed at www.kdheks.gov/envlab. Note that unless qualified otherwise in the Laboratory Report, Continental performs all analyses, including each analysis listed in the table below, utilizing NELAP protocol.

Continental Analytical Services, Inc.
Cooler/Sample Receipt Form (C/S RF)

CAS Order No.: 10603p

Client Name: City of Wichita

CAS File No.: 8339

Sample ID's in cooler: Pawnee & Canal

Cooler 1 of 1 for this CAS Order No.

Cooler Identification: CAS Cooler #: 3464 / Client's Cooler / Box / Letter / Hand-delivered
Other: _____

Date/Time Cooler Received: 9 / 13 / 12 19:30

Delivered By: UPS / FedX / AB Express / Field Svcs / Mail Walk-In / Other: _____

Custody Seal: Present: Intact / Broken Absent Seal No: _____

Seal Name: _____ Seal Date: _____

Seal matches Chain of Custody: Yes / No / N/A

Type of Packing Material: Blue Ice Ice / Melted Ice / Bubble / Foam / Paper / Peanuts / Vermiculite / None / Other: _____

Cooler Temperature (°C): Original Reading (°C) 0.4 Corrected Reading (°C) 0.9

AB
9/13/12

Temp. By: Temp. Blank Cooler Surface: Glass / Plastic / Metal / Other: _____

Thermo. ID No.: 585 Thermo. Correction Factor (°C): +0.5

Evidence of Cooling and date received = date sampled

Sample Receipt Discrepancies: No Yes (See below for discrepancies.)

Note: If discrepancies are present, CAS will proceed with analyses until/unless directed otherwise by the client.

Dear Mr. Hardesty:

This laboratory report containing the samples indicated below, includes 9 pages for the analytical report, 1 page(s) for the chain of custody and/or analysis request, and 1 page(s) for the sample receipt form.

<u>CAS LAB ID #</u>	<u>SAMPLE DESCRIPTION</u>	<u>SAMPLE TYPE</u>	<u>DATE SAMPLED</u>
12090987	Westlink - Grab	Liquid	9/13/2012
12090988	Westlink - Composite	Liquid	9/13/2012

The Appendix and Quality Control sections are integral parts of this laboratory report and may contain important data qualifiers.

All results are reported on a wet weight basis unless otherwise stated.

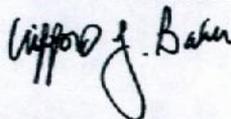

Samples will be retained for thirty days unless Continental is otherwise notified.

Continental is accredited by the State of Kansas through the National Environmental Laboratory Accreditation Program (NELAP). The results contained in this report were obtained using Continental's Standard Operating Procedures. These procedures are in substantial compliance with the approved methods referenced and the standards published by NELAP unless otherwise noted in the Appendix and Quality Control sections of this report.

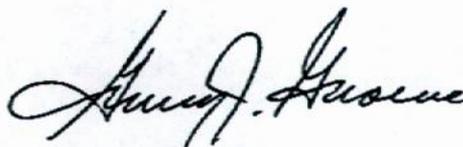

This report may not be reproduced, except in full, without written approval from Continental Analytical Services, Inc.

Thank you for choosing Continental for this project.

Continental File No: 8339
Continental Order No: 106037

ND(), where reported, indicates the analyte was not detected above the Limit of Quantitation (LOQ). The concentration of the LOQ is inside the parentheses.

All samples which require cooling were received at a temperature of less than 6 degrees Celsius.

The following table presents the date and time sampled, the date and time analyzed, and the total time elapsed for each analysis with an EPA recommended holding time of seventy-two hours or less.

<u>CAS LAB ID #</u>	<u>ANALYSIS</u>	<u>DATE/TIME</u> <u>SAMPLED</u>	<u>DATE/TIME</u> <u>ANALYZED</u>	<u>ELAPSED</u> <u>HRS:MIN</u>
12090988	BOD	09/13/2012 1430	09/15/2012 1311	46:41
12090988	Nitrate, as N	09/13/2012 1430	09/14/2012 2357	33:27
12090988	Nitrite, as N	09/13/2012 1430	09/14/2012 2357	33:27

DM - NPDES requirements specify that dissolved metals and orthophosphate must be filtered within 15 minutes of the time of collection. This analysis did not meet these criteria.

NELAP accreditation is issued under each EPA regulatory program for a given matrix/analyte/method combination. Continental is NELAP accredited for each matrix/analyte/method and EPA program cited in this Laboratory Report, except for those listed in the table below and for analyses performed in the field. For most of the analyses listed in the table, NELAP accreditation is not offered under the listed EPA program and Continental is NELAP accredited for the analysis, using the same analytical technology, but under a different EPA program. Continental's full NELAP accreditation status may be viewed at www.kdheks.gov/envlab. Note that unless qualified otherwise in the Laboratory Report, Continental performs all analyses, including each analysis listed in the table below, utilizing NELAP protocol.

Dear Mr. Hardesty:

This laboratory report containing the samples indicated below, includes 9 pages for the analytical report, 1 page(s) for the chain of custody and/or analysis request, and 1 page(s) for the sample receipt form.

<u>CAS LAB ID #</u>	<u>SAMPLE DESCRIPTION</u>	<u>SAMPLE TYPE</u>	<u>DATE SAMPLED</u>
12090989	Dry Creek - Grab	Liquid	9/13/2012
12090990	Dry Creek - Composite	Liquid	9/13/2012

The Appendix and Quality Control sections are integral parts of this laboratory report and may contain important data qualifiers.

All results are reported on a wet weight basis unless otherwise stated.

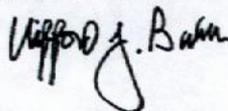

Samples will be retained for thirty days unless Continental is otherwise notified.

Continental is accredited by the State of Kansas through the National Environmental Laboratory Accreditation Program (NELAP). The results contained in this report were obtained using Continental's Standard Operating Procedures. These procedures are in substantial compliance with the approved methods referenced and the standards published by NELAP unless otherwise noted in the Appendix and Quality Control sections of this report.

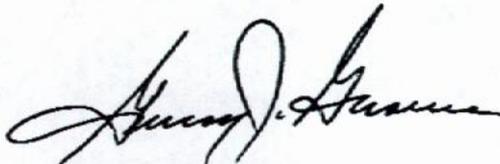

This report may not be reproduced, except in full, without written approval from Continental Analytical Services, Inc.

Thank you for choosing Continental for this project.

ND(), where reported, indicates the analyte was not detected above the Limit of Quantitation (LOQ). The concentration of the LOQ is inside the parentheses.

All samples which require cooling were received at a temperature of less than 6 degrees Celsius.

The following table presents the date and time sampled, the date and time analyzed, and the total time elapsed for each analysis with an EPA recommended holding time of seventy-two hours or less.

<u>CAS LAB ID #</u>	<u>ANALYSIS</u>	<u>DATE/TIME SAMPLED</u>	<u>DATE/TIME ANALYZED</u>	<u>ELAPSED HRS:MIN</u>
12090990	BOD	09/13/2012 1545	09/15/2012 1311	45:26
12090990	Nitrate, as N	09/13/2012 1545	09/15/2012 0027	32:42
12090990	Nitrite, as N	09/13/2012 1545	09/15/2012 0027	32:42

DM - NPDES requirements specify that dissolved metals and orthophosphate must be filtered within 15 minutes of the time of collection. This analysis did not meet these criteria.

NELAP accreditation is issued under each EPA regulatory program for a given matrix/analyte/method combination. Continental is NELAP accredited for each matrix/analyte/method and EPA program cited in this Laboratory Report, except for those listed in the table below and for analyses performed in the field. For most of the analyses listed in the table, NELAP accreditation is not offered under the listed EPA program and Continental is NELAP accredited for the analysis, using the same analytical technology, but under a different EPA program. Continental's full NELAP accreditation status may be viewed at www.kdheks.gov/envlab. Note that unless qualified otherwise in the Laboratory Report, Continental performs all analyses, including each analysis listed in the table below, utilizing NELAP protocol.

Cooler/Sample Receipt Form (C/S RF)

CAS Order No.: 108038

Client Name: City of Wichita

CAS File No.: 8339

Sample ID's in cooler: Dry Creek

Cooler 1 of 1 for this CAS Order No.

Cooler Identification: CAS Cooler #: 0005 / Client's Cooler / Box / Letter / Hand-delivered
Other: _____

Date/Time Cooler Received: 9 / 13 / 12 19:30

Delivered By: UPS / FedX / AB Express / Field Svcs / Mail Walk-In / Other: _____

Custody Seal: Present: Intact / Broken Absent Seal No: _____

Seal Name: _____ Seal Date: _____

Seal matches Chain of Custody: Yes / No / N/A

Type of Packing Material: Blue Ice Ice / Melted Ice / Bubble / Foam / Paper / Peanuts / Vermiculite / None / Other: _____

Cooler Temperature (°C): Original Reading (°C) 0.6 Corrected Reading (°C) 1.1

AB
9/13/12

Temp. By: Temp. Blank Cooler Surface: Glass / Plastic / Metal / Other: _____

Thermo. ID No.: 585 Thermo. Correction Factor (°C): +0.5

Evidence of Cooling and date received = date sampled

Sample Receipt Discrepancies: No Yes (See below for discrepancies.)

Note: If discrepancies are present, CAS will proceed with analyses until/unless directed otherwise by the client.

Dear Mr. Hardesty:

This laboratory report containing the samples indicated below, includes 12 pages for the analytical report, 1 page(s) for the chain of custody and/or analysis request, and 1 page(s) for the sample receipt form.

<u>CAS LAB ID #</u>	<u>SAMPLE DESCRIPTION</u>	<u>SAMPLE TYPE</u>	<u>DATE SAMPLED</u>
12020398	Broadway-Grab	Liquid	2/3/2012
12020399	Broadway-Composite	Liquid	2/3/2012
12020400	Broadway-Upstream	Liquid	2/3/2012

The Appendix and Quality Control sections are integral parts of this laboratory report and may contain important data qualifiers.

All results are reported on a wet weight basis unless otherwise stated.

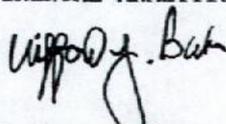

Samples will be retained for thirty days unless Continental is otherwise notified.

Continental is accredited by the State of Kansas through the National Environmental Laboratory Accreditation Program (NELAP). The results contained in this report were obtained using Continental's Standard Operating Procedures. These procedures are in substantial compliance with the approved methods referenced and the standards published by NELAP unless otherwise noted in the Appendix and Quality Control sections of this report.

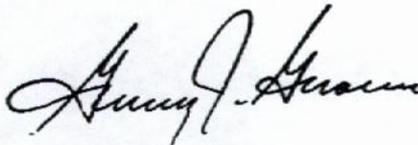

This report may not be reproduced, except in full, without written approval from Continental Analytical Services, Inc.

Thank you for choosing Continental for this project.

ND(), where reported, indicates the analyte was not detected above the Limit of Quantitation (LOQ). The concentration of the LOQ is inside the parentheses.

All samples which require cooling were received at a temperature of less than 6 degrees Celsius.

The following table presents the date and time sampled, the date and time analyzed, and the total time elapsed for each analysis with an EPA recommended holding time of seventy-two hours or less.

<u>CAS LAB ID #</u>	<u>ANALYSIS</u>	<u>DATE/TIME SAMPLED</u>	<u>DATE/TIME ANALYZED</u>	<u>ELAPSED HRS:MIN</u>

DM - NPDES requirements specify that dissolved metals and orthophosphate must be filtered within 15 minutes of the time of collection. This analysis did not meet these criteria.

QC - QC data qualifiers were noted. See the Quality Control Report.

NELAP accreditation is issued under each EPA regulatory program for a given matrix/analyte/method combination. Continental is NELAP accredited for each matrix/analyte/method and EPA program cited in this Laboratory Report, except for those listed in the table below and for analyses performed in the field. For most of the analyses listed in the table, NELAP accreditation is not offered under the listed EPA program and Continental is NELAP accredited for the analysis, using the same analytical technology, but under a different EPA program. Continental's full NELAP accreditation status may be viewed at www.kdheks.gov/envlab. Note that unless qualified otherwise in the Laboratory Report, Continental performs all analyses, including each analysis listed in the table below, utilizing NELAP protocol.

Dear Mr. Hardesty:

This laboratory report containing the samples indicated below, includes 12 pages for the analytical report, 1 page(s) for the chain of custody and/or analysis request, and 1 page(s) for the sample receipt form.

<u>CAS LAB ID #</u>	<u>SAMPLE DESCRIPTION</u>	<u>SAMPLE TYPE</u>	<u>DATE SAMPLED</u>
12020398	Broadway-Grab	Liquid	2/3/2012
12020399	Broadway-Composite	Liquid	2/3/2012
12020400	Broadway-Upstream	Liquid	2/3/2012

The Appendix and Quality Control sections are integral parts of this laboratory report and may contain important data qualifiers.

All results are reported on a wet weight basis unless otherwise stated.

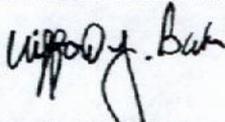

Samples will be retained for thirty days unless Continental is otherwise notified.

Continental is accredited by the State of Kansas through the National Environmental Laboratory Accreditation Program (NELAP). The results contained in this report were obtained using Continental's Standard Operating Procedures. These procedures are in substantial compliance with the approved methods referenced and the standards published by NELAP unless otherwise noted in the Appendix and Quality Control sections of this report.

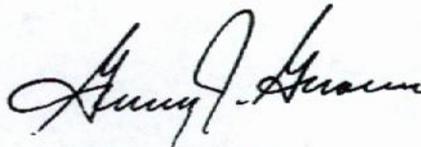

This report may not be reproduced, except in full, without written approval from Continental Analytical Services, Inc.

Thank you for choosing Continental for this project.

ND(), where reported, indicates the analyte was not detected above the Limit of Quantitation (LOQ). The concentration of the LOQ is inside the parentheses.

All samples which require cooling were received at a temperature of less than 6 degrees Celsius.

The following table presents the date and time sampled, the date and time analyzed, and the total time elapsed for each analysis with an EPA recommended holding time of seventy-two hours or less.

<u>CAS LAB ID #</u>	<u>ANALYSIS</u>	<u>DATE/TIME SAMPLED</u>	<u>DATE/TIME ANALYZED</u>	<u>ELAPSED HRS:MIN</u>

DM - NPDES requirements specify that dissolved metals and orthophosphate must be filtered within 15 minutes of the time of collection. This analysis did not meet these criteria.

QC - QC data qualifiers were noted. See the Quality Control Report.

NELAP accreditation is issued under each EPA regulatory program for a given matrix/analyte/method combination. Continental is NELAP accredited for each matrix/analyte/method and EPA program cited in this Laboratory Report, except for those listed in the table below and for analyses performed in the field. For most of the analyses listed in the table, NELAP accreditation is not offered under the listed EPA program and Continental is NELAP accredited for the analysis, using the same analytical technology, but under a different EPA program. Continental's full NELAP accreditation status may be viewed at www.kdheks.gov/envlab. Note that unless qualified otherwise in the Laboratory Report, Continental performs all analyses, including each analysis listed in the table below, utilizing NELAP protocol.

Dear Mr. Hardesty:

This laboratory report containing the samples indicated below, includes 11 pages for the analytical report, 1 page(s) for the chain of custody and/or analysis request, and 1 page(s) for the sample receipt form.

<u>CAS LAB ID #</u>	<u>SAMPLE DESCRIPTION</u>	<u>SAMPLE TYPE</u>	<u>DATE SAMPLED</u>
12041016	Broadway-Grab	Liquid	4/12/2012
12041017	Broadway-Composite	Liquid	4/12/2012
12041018	Broadway-Upstream	Liquid	4/12/2012

The Appendix and Quality Control sections are integral parts of this laboratory report and may contain important data qualifiers.

All results are reported on a wet weight basis unless otherwise stated.

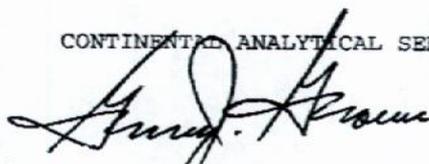

Samples will be retained for thirty days unless Continental is otherwise notified.

Continental is accredited by the State of Kansas through the National Environmental Laboratory Accreditation Program (NELAP). The results contained in this report were obtained using Continental's Standard Operating Procedures. These procedures are in substantial compliance with the approved methods referenced and the standards published by NELAP unless otherwise noted in the Appendix and Quality Control sections of this report.

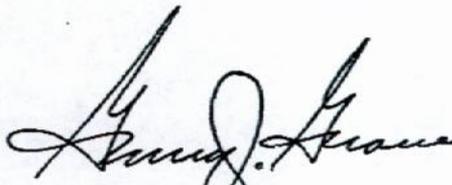

This report may not be reproduced, except in full, without written approval from Continental Analytical Services, Inc.

Thank you for choosing Continental for this project.

ND(), where reported, indicates the analyte was not detected above the Limit of Quantitation (LOQ). The concentration of the LOQ is inside the parentheses.

All samples which require cooling were received at a temperature of less than 6 degrees Celsius.

The following table presents the date and time sampled, the date and time analyzed, and the total time elapsed for each analysis with an EPA recommended holding time of seventy-two hours or less.

CAS LAB ID #	ANALYSIS	DATE/TIME	DATE/TIME	ELAPSED
		SAMPLED	ANALYZED	HRS:MIN
12041017	BOD	04/12/2012 1145	04/13/2012 1455	27:10

12041018	Nitrate, as N	04/12/2012 1145	04/13/2012 0831	20:46
12041018	Nitrite, as N	04/12/2012 1145	04/13/2012 0831	20:46

DM - NPDES requirements specify that dissolved metals and orthophosphate must be filtered within 15 minutes of the time of collection. This analysis did not meet these criteria.

NELAP accreditation is issued under each EPA regulatory program for a given matrix/analyte/method combination. Continental is NELAP accredited for each matrix/analyte/method and EPA program cited in this Laboratory Report, except for those listed in the table below and for analyses performed in the field. For most of the analyses listed in the table, NELAP accreditation is not offered under the listed EPA program and Continental is NELAP accredited for the analysis, using the same analytical technology, but under a different EPA program. Continental's full NELAP accreditation status may be viewed at www.kdheks.gov/envlab. Note that unless qualified otherwise in the Laboratory Report, Continental performs all analyses, including each analysis listed in the table below, utilizing NELAP protocol.

- Laboratory Report Conclusion -

Continental Analytical Services, Inc.
Cooler/Sample Receipt Form (C/S RF)

CAS Order No.: 102696

Client Name: Wichita

CAS File No.: 8339

Sample ID's in cooler: 5-00
Broadway

Cooler 1 of 1 for this CAS Order No.

Cooler Identification: CAS Cooler #: _____ Other: Client's Cooler / Box / Letter / Hand-delivered

Date/Time Cooler Received: 4/12/12 16:20

Delivered By: UPS / FedX / AB Express / Field Svcs / Mail / Walk-In / Other: _____

Custody Seal: Present: Intact / Broken Absent: X Seal No: _____
Seal Name: _____ Seal Date: _____

Seal matches Chain of Custody: Yes / No / N/A

Type of Packing Material: Blue Ice Ice / Melted Ice / Bubble / Foam / Paper / Peanuts / Vermiculite / None / Other: _____

Cooler Temperature (°C): Original Reading (°C) 1.1 Corrected Reading (°C) 1.6

Temp. By: Temp. Blank Cooler Surface: Glass / Plastic / Metal / Other: _____

mwj
4-12-12

Thermo. ID No.: 585 Thermo. Correction Factor (°C): 0.5

Evidence of Cooling and date received = date sampled

Sample Receipt Discrepancies: No Yes (See below for discrepancies.)

Note: If discrepancies are present, CAS will proceed with analyses until/unless directed otherwise by the client.

Dear Mr. Hardesty:

This laboratory report containing the samples indicated below, includes 9 pages for the analytical report, 1 page(s) for the chain of custody and/or analysis request, and 1 page(s) for the sample receipt form.

<u>CAS LAB ID #</u>	<u>SAMPLE DESCRIPTION</u>	<u>SAMPLE TYPE</u>	<u>DATE SAMPLED</u>
12041006	Dry Creek-Grab	Liquid	4/12/2012
12041007	Dry Creek-Composite	Liquid	4/12/2012

The Appendix and Quality Control sections are integral parts of this laboratory report and may contain important data qualifiers.

All results are reported on a wet weight basis unless otherwise stated.

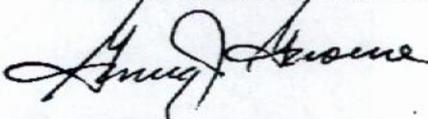

Samples will be retained for thirty days unless Continental is otherwise notified.

Continental is accredited by the State of Kansas through the National Environmental Laboratory Accreditation Program (NELAP). The results contained in this report were obtained using Continental's Standard Operating Procedures. These procedures are in substantial compliance with the approved methods referenced and the standards published by NELAP unless otherwise noted in the Appendix and Quality Control sections of this report.

This report may not be reproduced, except in full, without written approval from Continental Analytical Services, Inc.

Thank you for choosing Continental for this project.

ND(), where reported, indicates the analyte was not detected above the Limit of Quantitation (LOQ). The concentration of the LOQ is inside the parentheses.

All samples which require cooling were received at a temperature of less than 6 degrees Celsius.

The following table presents the date and time sampled, the date and time analyzed, and the total time elapsed for each analysis with an EPA recommended holding time of seventy-two hours or less.

<u>CAS LAB ID #</u>	<u>ANALYSIS</u>	<u>DATE/TIME SAMPLED</u>	<u>DATE/TIME ANALYZED</u>	<u>ELAPSED HRS:MIN</u>
12041007	BOD	04/12/2012 1245	04/13/2012 1455	26:10
12041007	Nitrate, as N	04/12/2012 1245	04/13/2012 0336	14:51
12041007	Nitrite, as N	04/12/2012 1245	04/13/2012 0336	14:51

DM - NPDES requirements specify that dissolved metals and orthophosphate must be filtered within 15 minutes of the time of collection. This analysis did not meet these criteria.

NELAP accreditation is issued under each EPA regulatory program for a given matrix/analyte/method combination. Continental is NELAP accredited for each matrix/analyte/method and EPA program cited in this Laboratory Report, except for those listed in the table below and for analyses performed in the field. For most of the analyses listed in the table, NELAP accreditation is not offered under the listed EPA program and Continental is NELAP accredited for the analysis, using the same analytical technology, but under a different EPA program. Continental's full NELAP accreditation status may be viewed at www.kdheks.gov/envlab. Note that unless qualified otherwise in the Laboratory Report, Continental performs all analyses, including each analysis listed in the table below, utilizing NELAP protocol.

Data Qualifiers:

MN - The MS/MSD sample analyses were not performed on a sample from this Continental order number.

N/A - Not Applicable

T - MS/MSD cannot be performed for this analysis. The MS result is the same as the sample result. The MSD result is a duplicate of the sample.

- Limits not available.

** - RPD cannot be calculated.

12041086	Gypsum Creek	Liquid	4/12/2012
12041087	Westlink	Liquid	4/12/2012

The Appendix and Quality Control sections are integral parts of this laboratory report and may contain important data qualifiers.

All results are reported on a wet weight basis unless otherwise stated.

Samples will be retained for thirty days unless Continental is otherwise notified.

Continental is accredited by the State of Kansas through the National Environmental Laboratory Accreditation Program (NELAP). The results contained in this report were obtained using Continental's Standard Operating Procedures. These procedures are in substantial compliance with the approved methods

ND(), where reported, indicates the analyte was not detected above the Limit of Quantitation (LOQ). The concentration of the LOQ is inside the parentheses.

All samples which require cooling were received at a temperature of less than 6 degrees Celsius.

The following table presents the date and time sampled, the date and time analyzed, and the total time elapsed for each analysis with an EPA recommended holding time of seventy-two hours or less.

HT - This sample exceeded the EPA maximum in transit holding time of six hours permitted for this analysis.

Accreditation Summary

Client: City of Wichita
Jim Hardesty
City Hall, 8th Floor
455 N. Main
Wichita, KS 67202

Date Reported: 04/23/2012
Date Received: 04/13/2012
Continental File No: 8339
Continental Order No: 102717

NELAP accreditation is issued under each EPA regulatory program for a given matrix/analyte/method combination. Continental is NELAP accredited for each matrix/analyte/method and EPA program cited in this Laboratory Report, except for those listed in the table below and for analyses performed in the field. For most of the analyses listed in the table, NELAP accreditation is not offered under the listed EPA program and Continental is NELAP accredited for the analysis, using the same analytical technology, but under a different EPA program. Continental's full NELAP accreditation status may be viewed at www.kdheks.gov/envlab. Note that unless qualified otherwise in the Laboratory Report, Continental performs all analyses, including each analysis listed in the table below, utilizing NELAP protocol.

Test Analysis

CAS is accredited for all analytes.

Matrix-Regulatory Program

Method

CAS NELAP Accredited in Other Reg. Program

Dear Mr. Hardesty:

This laboratory report containing the samples indicated below, includes 10 pages for the analytical report, 1 page(s) for the chain of custody and/or analysis request, and 1 page(s) for the sample receipt form.

<u>CAS LAB ID #</u>	<u>SAMPLE DESCRIPTION</u>	<u>SAMPLE TYPE</u>	<u>DATE SAMPLED</u>
12041008	Gypsum Creek-Grab	Liquid	4/12/2012
12041009	Gypsum Creek-Composite	Liquid	4/12/2012

The Appendix and Quality Control sections are integral parts of this laboratory report and may contain important data qualifiers.

All results are reported on a wet weight basis unless otherwise stated.

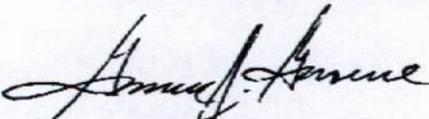

Samples will be retained for thirty days unless Continental is otherwise notified.

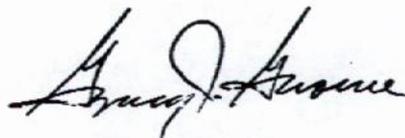

Continental is accredited by the State of Kansas through the National Environmental Laboratory Accreditation Program (NELAP). The results contained in this report were obtained using Continental's Standard Operating Procedures. These procedures are in substantial compliance with the approved methods referenced and the standards published by NELAP unless otherwise noted in the Appendix and Quality Control sections of this report.

This report may not be reproduced, except in full, without written approval from Continental Analytical Services, Inc.

Thank you for choosing Continental for this project.

ND(), where reported, indicates the analyte was not detected above the Limit of Quantitation (LOQ). The concentration of the LOQ is inside the parentheses.

All samples which require cooling were received at a temperature of less than 6 degrees Celsius.

The following table presents the date and time sampled, the date and time analyzed, and the total time elapsed for each analysis with an EPA recommended holding time of seventy-two hours or less.

<u>CAS LAB ID #</u>	<u>ANALYSIS</u>	<u>DATE/TIME</u> <u>SAMPLED</u>	<u>DATE/TIME</u> <u>ANALYZED</u>	<u>ELAPSED</u> <u>HRS:MIN</u>
12041009	BOD	04/12/2012 1255	04/13/2012 1455	26:00
12041009	Nitrate, as N	04/12/2012 1255	04/13/2012 0413	15:18
12041009	Nitrite, as N	04/12/2012 1255	04/13/2012 0413	15:18

DM - NPDES requirements specify that dissolved metals and orthophosphate must be filtered within 15 minutes of the time of collection. This analysis did not meet these criteria.

NELAP accreditation is issued under each EPA regulatory program for a given matrix/analyte/method combination. Continental is NELAP accredited for each matrix/analyte/method and EPA program cited in this Laboratory Report, except for those listed in the table below and for analyses performed in the field. For most of the analyses listed in the table, NELAP accreditation is not offered under the listed EPA program and Continental is NELAP accredited for the analysis, using the same analytical technology, but under a different EPA program. Continental's full NELAP accreditation status may be viewed at www.kdheks.gov/envlab. Note that unless qualified otherwise in the Laboratory Report, Continental performs all analyses, including each analysis listed in the table below, utilizing NELAP protocol.

Dear Mr. Hardesty:

This laboratory report containing the samples indicated below, includes 12 pages for the analytical report, 1 page(s) for the chain of custody and/or analysis request, and 1 page(s) for the sample receipt form.

<u>CAS LAB ID #</u>	<u>SAMPLE DESCRIPTION</u>	<u>SAMPLE TYPE</u>	<u>DATE SAMPLED</u>
12020407	Harvest CT-Grab	Liquid	2/3/2012
12020408	Harvest CT-Composite	Liquid	2/3/2012
12020409	Harvest CT-Upstream	Liquid	2/3/2012

The Appendix and Quality Control sections are integral parts of this laboratory report and may contain important data qualifiers.

All results are reported on a wet weight basis unless otherwise stated.

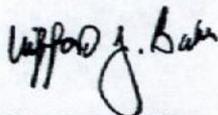

Samples will be retained for thirty days unless Continental is otherwise notified.

Continental is accredited by the State of Kansas through the National Environmental Laboratory Accreditation Program (NELAP). The results contained in this report were obtained using Continental's Standard Operating Procedures. These procedures are in substantial compliance with the approved methods referenced and the standards published by NELAP unless otherwise noted in the Appendix and Quality Control sections of this report.

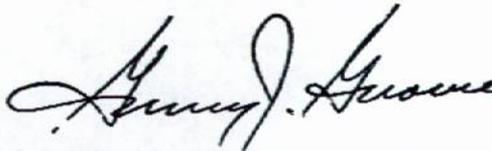

This report may not be reproduced, except in full, without written approval from Continental Analytical Services, Inc.

Thank you for choosing Continental for this project.

ND(), where reported, indicates the analyte was not detected above the Limit of Quantitation (LOQ). The concentration of the LOQ is inside the parentheses.

All samples which require cooling were received at a temperature of less than 6 degrees Celsius.

The following table presents the date and time sampled, the date and time analyzed, and the total time elapsed for each analysis with an EPA recommended holding time of seventy-two hours or less.

<u>CAS LAB ID #</u>	<u>ANALYSIS</u>	<u>DATE/TIME SAMPLED</u>	<u>DATE/TIME ANALYZED</u>	<u>ELAPSED HRS:MIN</u>

DM - NPDES requirements specify that dissolved metals and orthophosphate must be filtered within 15 minutes of the time of collection. This analysis did not meet these criteria.

QC - QC data qualifiers were noted. See the Quality Control Report.

NELAP accreditation is issued under each EPA regulatory program for a given matrix/analyte/method combination. Continental is NELAP accredited for each matrix/analyte/method and EPA program cited in this Laboratory Report, except for those listed in the table below and for analyses performed in the field. For most of the analyses listed in the table, NELAP accreditation is not offered under the listed EPA program and Continental is NELAP accredited for the analysis, using the same analytical technology, but under a different EPA program. Continental's full NELAP accreditation status may be viewed at www.kdheks.gov/envlab. Note that unless qualified otherwise in the Laboratory Report, Continental performs all analyses, including each analysis listed in the table below, utilizing NELAP protocol.

Dear Mr. Hardesty:

This laboratory report containing the samples indicated below, includes 11 pages for the analytical report, 1 page(s) for the chain of custody and/or analysis request, and 1 page(s) for the sample receipt form.

<u>CAS LAB ID #</u>	<u>SAMPLE DESCRIPTION</u>	<u>SAMPLE TYPE</u>	<u>DATE SAMPLED</u>
12041022	Harvest Ct.-Grab	Liquid	4/12/2012
12041023	Harvest Ct.-Composite	Liquid	4/12/2012
12041024	Harvest Ct.-Upstream	Liquid	4/12/2012

The Appendix and Quality Control sections are integral parts of this laboratory report and may contain important data qualifiers.

All results are reported on a wet weight basis unless otherwise stated.

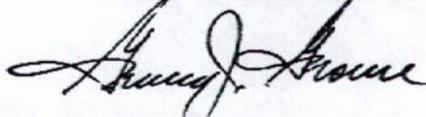

Samples will be retained for thirty days unless Continental is otherwise notified:

Continental is accredited by the State of Kansas through the National Environmental Laboratory Accreditation Program (NELAP). The results contained in this report were obtained using Continental's Standard Operating Procedures. These procedures are in substantial compliance with the approved methods referenced and the standards published by NELAP unless otherwise noted in the Appendix and Quality Control sections of this report.

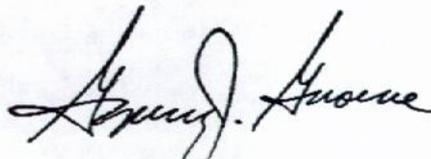

This report may not be reproduced, except in full, without written approval from Continental Analytical Services, Inc.

Thank you for choosing Continental for this project.

ND(), where reported, indicates the analyte was not detected above the Limit of Quantitation (LOQ). The concentration of the LOQ is inside the parentheses.

All samples which require cooling were received at a temperature of less than 6 degrees Celsius.

The following table presents the date and time sampled, the date and time analyzed, and the total time elapsed for each analysis with an EPA recommended holding time of seventy-two hours or less.

<u>CAS LAB ID #</u>	<u>ANALYSIS</u>	<u>DATE/TIME SAMPLED</u>	<u>DATE/TIME ANALYZED</u>	<u>ELAPSED HRS:MIN</u>
12041023	BOD	04/12/2012 1015	04/13/2012 1700	30:45
12041023	Nitrate, as N	04/12/2012 1015	04/13/2012 1116	25:01

NELAP accreditation is issued under each EPA regulatory program for a given matrix/analyte/method combination. Continental is NELAP accredited for each matrix/analyte/method and EPA program cited in this Laboratory Report, except for those listed in the table below and for analyses performed in the field. For most of the analyses listed in the table, NELAP accreditation is not offered under the listed EPA program and Continental is NELAP accredited for the analysis, using the same analytical technology, but under a different EPA program. Continental's full NELAP accreditation status may be viewed at www.kdheks.gov/envlab. Note that unless qualified otherwise in the Laboratory Report, Continental performs all analyses, including each analysis listed in the table below, utilizing NELAP protocol.

Dear Mr. Hardesty:

This laboratory report containing the samples indicated below, includes 11 pages for the analytical report, 1 page(s) for the chain of custody and/or analysis request, and 1 page(s) for the sample receipt form.

<u>CAS LAB ID #</u>	<u>SAMPLE DESCRIPTION</u>	<u>SAMPLE TYPE</u>	<u>DATE SAMPLED</u>
12041025	Huntington-Grab	Liquid	4/12/2012
12041026	Huntington-Composite	Liquid	4/12/2012
12041027	Huntington-Upstream	Liquid	4/12/2012

The Appendix and Quality Control sections are integral parts of this laboratory report and may contain important data qualifiers.

All results are reported on a wet weight basis unless otherwise stated.

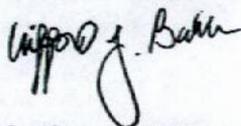

Samples will be retained for thirty days unless Continental is otherwise notified.

Continental is accredited by the State of Kansas through the National Environmental Laboratory Accreditation Program (NELAP). The results contained in this report were obtained using Continental's Standard Operating Procedures. These procedures are in substantial compliance with the approved methods referenced and the standards published by NELAP unless otherwise noted in the Appendix and Quality Control sections of this report.

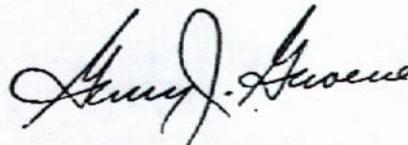

This report may not be reproduced, except in full, without written approval from Continental Analytical Services, Inc.

Thank you for choosing Continental for this project.

ND(), where reported, indicates the analyte was not detected above the Limit of Quantitation (LOQ). The concentration of the LOQ is inside the parentheses.

All samples which require cooling were received at a temperature of less than 6 degrees Celsius.

The following table presents the date and time sampled, the date and time analyzed, and the total time elapsed for each analysis with an EPA recommended holding time of seventy-two hours or less.

CAS LAB ID #	ANALYSIS	DATE/TIME		DATE/TIME		ELAPSED
		SAMPLED		ANALYZED		HRS:MIN

12041027	BOD	04/12/2012	1205	04/13/2012	1700	28:55
12041027	Nitrate, as N	04/12/2012	1205	04/13/2012	1249	24:44
12041027	Nitrite, as N	04/12/2012	1205	04/13/2012	1249	24:44

DM - NPDES requirements specify that dissolved metals and orthophosphate must be filtered within 15 minutes of the time of collection. This analysis did not meet these criteria.

NELAP accreditation is issued under each EPA regulatory program for a given matrix/analyte/method combination. Continental is NELAP accredited for each matrix/analyte/method and EPA program cited in this Laboratory Report, except for those listed in the table below and for analyses performed in the field. For most of the analyses listed in the table, NELAP accreditation is not offered under the listed EPA program and Continental is NELAP accredited for the analysis, using the same analytical technology, but under a different EPA program. Continental's full NELAP accreditation status may be viewed at www.kdheks.gov/envlab. Note that unless qualified otherwise in the Laboratory Report, Continental performs all analyses, including each analysis listed in the table below, utilizing NELAP protocol.

Dear Mr. Hardesty:

This laboratory report containing the samples indicated below, includes 12 pages for the analytical report, 1 page(s) for the chain of custody and/or analysis request, and 1 page(s) for the sample receipt form.

<u>CAS LAB ID #</u>	<u>SAMPLE DESCRIPTION</u>	<u>SAMPLE TYPE</u>	<u>DATE SAMPLED</u>
12020410	Cowskin and Maple-Grab	Liquid	2/3/2012
12020411	Cowskin and Maple-Composite	Liquid	2/3/2012
12020412	Cowskin and Maple-Upstream	Liquid	2/3/2012

The Appendix and Quality Control sections are integral parts of this laboratory report and may contain important data qualifiers.

All results are reported on a wet weight basis unless otherwise stated.

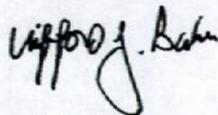

Samples will be retained for thirty days unless Continental is otherwise notified.

Continental is accredited by the State of Kansas through the National Environmental Laboratory Accreditation Program (NELAP). The results contained in this report were obtained using Continental's Standard Operating Procedures. These procedures are in substantial compliance with the approved methods referenced and the standards published by NELAP unless otherwise noted in the Appendix and Quality Control sections of this report.

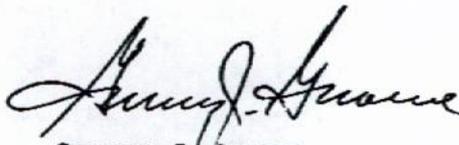

This report may not be reproduced, except in full, without written approval from Continental Analytical Services, Inc.

Thank you for choosing Continental for this project.

ND(), where reported, indicates the analyte was not detected above the Limit of Quantitation (LOQ). The concentration of the LOQ is inside the parentheses.

All samples which require cooling were received at a temperature of less than 6 degrees Celsius.

The following table presents the date and time sampled, the date and time analyzed, and the total time elapsed for each analysis with an EPA recommended holding time of seventy-two hours or less.

<u>CAS LAB ID #</u>	<u>ANALYSIS</u>	<u>DATE/TIME SAMPLED</u>	<u>DATE/TIME ANALYZED</u>	<u>ELAPSED HRS:MIN</u>
12020411	BOD	02/03/2012 0745	02/03/2012 1800	10:15

DM - NPDES requirements specify that dissolved metals and orthophosphate must be filtered within 15 minutes of the time of collection. This analysis did not meet these criteria.

QC - QC data qualifiers were noted. See the Quality Control Report.

NELAP accreditation is issued under each EPA regulatory program for a given matrix/analyte/method combination. Continental is NELAP accredited for each matrix/analyte/method and EPA program cited in this Laboratory Report, except for those listed in the table below and for analyses performed in the field. For most of the analyses listed in the table, NELAP accreditation is not offered under the listed EPA program and Continental is NELAP accredited for the analysis, using the same analytical technology, but under a different EPA program. Continental's full NELAP accreditation status may be viewed at www.kdheks.gov/envlab. Note that unless qualified otherwise in the Laboratory Report, Continental performs all analyses, including each analysis listed in the table below, utilizing NELAP protocol.

Data Qualifiers:

MN - The MS/MSD sample analyses were not performed on a sample from this Continental order number.

J - The concentration or not detected (ND) value is below the Limit of Quantitation (LOQ) and is considered an estimated value.

N/A - Not Applicable

- Limits not available.

** - RPD cannot be calculated.

Dear Mr. Hardesty:

This laboratory report containing the samples indicated below, includes 11 pages for the analytical report, 1 page(s) for the chain of custody and/or analysis request, and 1 page(s) for the sample receipt form.

<u>CAS LAB ID #</u>	<u>SAMPLE DESCRIPTION</u>	<u>SAMPLE TYPE</u>	<u>DATE SAMPLED</u>
12041000	Cowskin and Maple-Grab	Liquid	4/12/2012
12041001	Cowskin and Maple-Composite	Liquid	4/12/2012
12041002	Cowskin and Maple-Upstream	Liquid	4/12/2012

The Appendix and Quality Control sections are integral parts of this laboratory report and may contain important data qualifiers.

All results are reported on a wet weight basis unless otherwise stated.

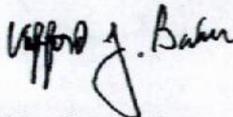

Samples will be retained for thirty days unless Continental is otherwise notified.

Continental is accredited by the State of Kansas through the National Environmental Laboratory Accreditation Program (NELAP). The results contained in this report were obtained using Continental's Standard Operating Procedures. These procedures are in substantial compliance with the approved methods referenced and the standards published by NELAP unless otherwise noted in the Appendix and Quality Control sections of this report.

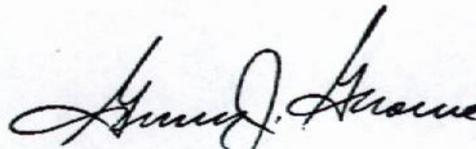

This report may not be reproduced, except in full, without written approval from Continental Analytical Services, Inc.

Thank you for choosing Continental for this project.

Wichita, KS 67202

Date Reported: 04/27/2012
Date Received: 04/12/2012
Continental File No: 8339
Continental Order No: 102690

ND(), where reported, indicates the analyte was not detected above the Limit of Quantitation (LOQ). The concentration of the LOQ is inside the parentheses.

All samples which require cooling were received at a temperature of less than 6 degrees Celsius.

The following table presents the date and time sampled, the date and time analyzed, and the total time elapsed for each analysis with an EPA recommended holding time of seventy-two hours or less.

<u>CAS LAB ID #</u>	<u>ANALYSIS</u>	<u>DATE/TIME SAMPLED</u>	<u>DATE/TIME ANALYZED</u>	<u>ELAPSED HRS:MIN</u>
12041001	BOD	04/12/2012 1030	04/13/2012 1455	28:25
12041001	Nitrate, as N	04/12/2012 1030	04/13/2012 0031	14:01
12041001	Nitrite, as N	04/12/2012 1030	04/13/2012 0031	14:01
12041002	BOD	04/12/2012 1030	04/13/2012 1455	28:25
12041002	Nitrate, as N	04/12/2012 1030	04/13/2012 0108	14:38
12041002	Nitrite, as N	04/12/2012 1030	04/13/2012 0108	14:38

DM - NPDES requirements specify that dissolved metals and orthophosphate must be filtered within 15 minutes of the time of collection. This analysis did not meet these criteria.

NELAP accreditation is issued under each EPA regulatory program for a given matrix/analyte/method combination. Continental is NELAP accredited for each matrix/analyte/method and EPA program cited in this Laboratory Report, except for those listed in the table below and for analyses performed in the field. For most of the analyses listed in the table, NELAP accreditation is not offered under the listed EPA program and Continental is NELAP accredited for the analysis, using the same analytical technology, but under a different EPA program. Continental's full NELAP accreditation status may be viewed at www.kdheks.gov/envlab. Note that unless qualified otherwise in the Laboratory Report, Continental performs all analyses, including each analysis listed in the table below, utilizing NELAP protocol.

Dear Mr. Hardesty:

This laboratory report containing the samples indicated below, includes 12 pages for the analytical report, 1 page(s) for the chain of custody and/or analysis request, and 1 page(s) for the sample receipt form.

<u>CAS LAB ID #</u>	<u>SAMPLE DESCRIPTION</u>	<u>SAMPLE TYPE</u>	<u>DATE SAMPLED</u>
12020401	McLean-Grab	Liquid	2/3/2012
12020402	McLean-Composite	Liquid	2/3/2012
12020403	McLean-Upstream	Liquid	2/3/2012

The Appendix and Quality Control sections are integral parts of this laboratory report and may contain important data qualifiers.

All results are reported on a wet weight basis unless otherwise stated.

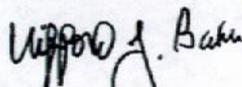

Samples will be retained for thirty days unless Continental is otherwise notified.

Continental is accredited by the State of Kansas through the National Environmental Laboratory Accreditation Program (NELAP). The results contained in this report were obtained using Continental's Standard Operating Procedures. These procedures are in substantial compliance with the approved methods referenced and the standards published by NELAP unless otherwise noted in the Appendix and Quality Control sections of this report.

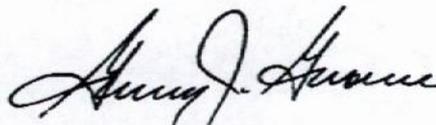

This report may not be reproduced, except in full, without written approval from Continental Analytical Services, Inc.

Thank you for choosing Continental for this project.

ND(), where reported, indicates the analyte was not detected above the Limit of Quantitation (LOQ). The concentration of the LOQ is inside the parentheses.

All samples which require cooling were received at a temperature of less than 6 degrees Celsius.

The following table presents the date and time sampled, the date and time analyzed, and the total time elapsed for each analysis with an EPA recommended holding time of seventy-two hours or less.

<u>CAS LAB ID #</u>	<u>ANALYSIS</u>	<u>DATE/TIME SAMPLED</u>	<u>DATE/TIME ANALYZED</u>	<u>ELAPSED HRS:MIN</u>

12020403	Nitrite, as N	02/03/2012 0600	02/04/2012 0156	19:56

DM - NPDES requirements specify that dissolved metals and orthophosphate must be filtered within 15 minutes of the time of collection. This analysis did not meet these criteria.

B - Analyte is also present in the method blank or load blank at the concentration indicated either to the right of the letter B and/or in the enclosed Quality Control Report. The reported sample concentration has not been blank corrected.

QC - QC data qualifiers were noted. See the Quality Control Report.

NELAP accreditation is issued under each EPA regulatory program for a given matrix/analyte/method combination. Continental is NELAP accredited for each matrix/analyte/method and EPA program cited in this Laboratory Report, except for those listed in the table below and for analyses performed in the field. For most of the analyses listed in the table, NELAP accreditation is not offered under the listed EPA program and Continental is NELAP accredited for the analysis, using the same analytical technology, but under a different EPA program. Continental's full NELAP accreditation status may be viewed at www.kdheks.gov/envlab. Note that unless qualified otherwise in the Laboratory Report, Continental performs all analyses, including each analysis listed in the table below, utilizing NELAP protocol.

Cooler/Sample Receipt Form (C/S RF)

CAS Order No.: 101254

Client Name: W, Chats

CAS File No.: 8339

Sample ID's in cooler: 5000
McLean

Cooler _____ of _____ for this CAS Order No.

Cooler Identification: CAS Cooler #: _____ / Client's Cooler / Box / Letter / Hand-delivered
Other: _____

Date/Time Cooler Received: 2/3/12 14:35

Delivered By: UPS / FedX / AB Express / Field Svcs / Mail / Walk-In / Other: _____

Custody Seal: Present: Intact / Broken Absent: Seal No: _____

Seal Name: _____ Seal Date: _____

Seal matches Chain of Custody: Yes / No / N/A

Type of Packing Material: Blue Ice Ice / Melted Ice / Bubble / Foam / Paper / Peanuts / Vermiculite / None / Other: _____

Cooler Temperature (°C): Original Reading (°C) 0.8 Corrected Reading (°C) 1.2

Temp. By: Temp. Blank Cooler Surface: Glass / Plastic / Metal / Other: _____

Thermo. ID No.: 535 Thermo. Correction Factor (°C): 0.4

Evidence of Cooling and date received = date sampled

Sample Receipt Discrepancies: No Yes (See below for discrepancies.)

Note: If discrepancies are present, CAS will proceed with analyses until/unless directed otherwise by the client.

Chain of Custody not present - information taken from:

Cover Letter Container

PO CAS Proj. Mgr.

Container label absent

Chain of Custody incomplete [see detail below]

Chain of Custody missing date/time sampled (excl. TB or Dup.)

Date or Time sampled obtained from container label

Chain of Custody missing sampler's name

Chain of Custody missing matrix (sample type)

Missing relinquished information: signature date time

Sample excluded from Chain of Custody

Sample listed on Chain of Custody, not received

Sample description on container and Chain of Custody do not agree

Air bubbles in Aqueous VOA vials larger than pea-size [approx. 6 mm]

Cooler temperature exceeded 0.1 - 6.0 °C requirement
[Do not mark if samples do not require cooling to 0.1 - 6.0 °C.]

Broken or leaking containers (detail actions below)

Sample container type or labeled chemical preservation inappropriate

Other discrepancies: _____

Dear Mr. Hardesty:

This laboratory report containing the samples indicated below, includes 11 pages for the analytical report, 1 page(s) for the chain of custody and/or analysis request, and 1 page(s) for the sample receipt form.

<u>CAS LAB ID #</u>	<u>SAMPLE DESCRIPTION</u>	<u>SAMPLE TYPE</u>	<u>DATE SAMPLED</u>
12041019	McLean-Grab	Liquid	4/12/2012
12041020	McLean-Composite	Liquid	4/12/2012
12041021	McLean-Upstream	Liquid	4/12/2012

The Appendix and Quality Control sections are integral parts of this laboratory report and may contain important data qualifiers.

All results are reported on a wet weight basis unless otherwise stated.

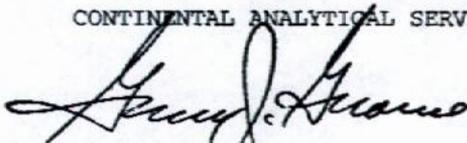

Samples will be retained for thirty days unless Continental is otherwise notified.

Continental is accredited by the State of Kansas through the National Environmental Laboratory Accreditation Program (NELAP). The results contained in this report were obtained using Continental's Standard Operating Procedures. These procedures are in substantial compliance with the approved methods referenced and the standards published by NELAP unless otherwise noted in the Appendix and Quality Control sections of this report.

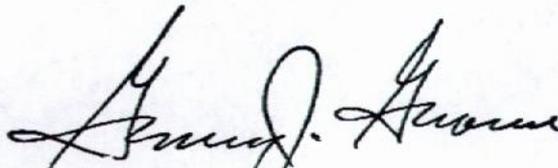

This report may not be reproduced, except in full, without written approval from Continental Analytical Services, Inc.

Thank you for choosing Continental for this project.

ND(), where reported, indicates the analyte was not detected above the Limit of Quantitation (LOQ). The concentration of the LOQ is inside the parentheses.

All samples which require cooling were received at a temperature of less than 6 degrees Celsius.

The following table presents the date and time sampled, the date and time analyzed, and the total time elapsed for each analysis with an EPA recommended holding time of seventy-two hours or less.

<u>CAS LAB ID #</u>	<u>ANALYSIS</u>	<u>DATE/TIME SAMPLED</u>	<u>DATE/TIME ANALYZED</u>	<u>ELAPSED HRS:MIN</u>

DM - NPDES requirements specify that dissolved metals and orthophosphate must be filtered within 15 minutes of the time of collection. This analysis did not meet these criteria.

NELAP accreditation is issued under each EPA regulatory program for a given matrix/analyte/method combination. Continental is NELAP accredited for each matrix/analyte/method and EPA program cited in this Laboratory Report, except for those listed in the table below and for analyses performed in the field. For most of the analyses listed in the table, NELAP accreditation is not offered under the listed EPA program and Continental is NELAP accredited for the analysis, using the same analytical technology, but under a different EPA program. Continental's full NELAP accreditation status may be viewed at www.kdheks.gov/envlab. Note that unless qualified otherwise in the Laboratory Report, Continental performs all analyses, including each analysis listed in the table below, utilizing NELAP protocol.

Dear Mr. Hardesty:

This laboratory report containing the samples indicated below, includes 12 pages for the analytical report, 1 page(s) for the chain of custody and/or analysis request, and 1 page(s) for the sample receipt form.

<u>CAS LAB ID #</u>	<u>SAMPLE DESCRIPTION</u>	<u>SAMPLE TYPE</u>	<u>DATE SAMPLED</u>
12020395	Towne East-Grab	Liquid	2/3/2012
12020396	Towne East-Composite	Liquid	2/3/2012
12020397	Towne East-Upstream	Liquid	2/3/2012

The Appendix and Quality Control sections are integral parts of this laboratory report and may contain important data qualifiers.

All results are reported on a wet weight basis unless otherwise stated.

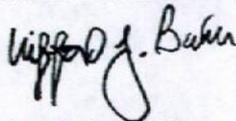

Samples will be retained for thirty days unless Continental is otherwise notified.

Continental is accredited by the State of Kansas through the National Environmental Laboratory Accreditation Program (NELAP). The results contained in this report were obtained using Continental's Standard Operating Procedures. These procedures are in substantial compliance with the approved methods referenced and the standards published by NELAP unless otherwise noted in the Appendix and Quality Control sections of this report.

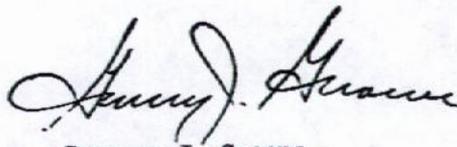

This report may not be reproduced, except in full, without written approval from Continental Analytical Services, Inc.

Thank you for choosing Continental for this project.

ND(), where reported, indicates the analyte was not detected above the Limit of Quantitation (LOQ). The concentration of the LOQ is inside the parentheses.

All samples which require cooling were received at a temperature of less than 6 degrees Celsius.

The following table presents the date and time sampled, the date and time analyzed, and the total time elapsed for each analysis with an EPA recommended holding time of seventy-two hours or less.

<u>CAS LAB ID #</u>	<u>ANALYSIS</u>	<u>DATE/TIME</u> <u>SAMPLED</u>	<u>DATE/TIME</u> <u>ANALYZED</u>	<u>ELAPSED</u> <u>HRS:MIN</u>
12020396	BOD	02/03/2012 0525	02/03/2012 1800	12:35
12020396	Nitrate, as N	02/03/2012 0525	02/03/2012 1834	13:09
12020396	Nitrite, as N	02/03/2012 0525	02/03/2012 1834	13:09
12020397	BOD	02/03/2012 0525	02/03/2012 1800	12:35
12020397	Nitrate, as N	02/03/2012 0525	02/04/2012 0043	19:18
12020397	Nitrite, as N	02/03/2012 0525	02/04/2012 0043	19:18

DM - NPDES requirements specify that dissolved metals and orthophosphate must be filtered within 15 minutes of the time of collection. This analysis did not meet these criteria.

QC - QC data qualifiers were noted. See the Quality Control Report.

NELAP accreditation is issued under each EPA regulatory program for a given matrix/analyte/method combination. Continental is NELAP accredited for each matrix/analyte/method and EPA program cited in this Laboratory Report, except for those listed in the table below and for analyses performed in the field. For most of the analyses listed in the table, NELAP accreditation is not offered under the listed EPA program and Continental is NELAP accredited for the analysis, using the same analytical technology, but under a different EPA program. Continental's full NELAP accreditation status may be viewed at www.kdheks.gov/envlab. Note that unless qualified otherwise in the Laboratory Report, Continental performs all analyses, including each analysis listed in the table below, utilizing NELAP protocol.

Quality Control Report
 Continuing Calibration Data Summary

Date Reported: 02/20/2012
 Date Received: 02/03/2012
 Continental File No: 8339
 Continental Order No: 101252

Nitrate, as N	02/03/2012	3IC2034	CCV recovery acceptable for this Instrument Batch.
Nitrate, as N	02/04/2012	4IC2034	CCV recovery acceptable for this Instrument Batch.
Kjeldahl Nitrogen, as N (TKN)	02/07/2012	120207-1	CCV recovery acceptable for this Instrument Batch.
Kjeldahl Nitrogen, as N (TKN)	02/07/2012	120207-2	CCV recovery acceptable for this Instrument Batch.
Hardness (Calculated)	02/06/2012	10IP4037	CCV recovery acceptable for this Instrument Batch.
Hardness (Calculated)	02/07/2012	7IP4038	CCV recovery acceptable for this Instrument Batch.
Hardness (Calculated)	02/07/2012	8IP4038	CCV recovery acceptable for this Instrument Batch.
Hardness (Calculated)	02/06/2012	9IP4037	CCV recovery acceptable for this Instrument Batch.
Zinc, Dissolved, ICP-MS	02/08/2012	2IP3039	CCV recovery acceptable for this Instrument Batch.
Zinc, Tot. Rec., ICP-MS	02/09/2012	2IP3040	CCV recovery acceptable for this Instrument Batch.
Zinc, Dissolved, ICP-MS	02/08/2012	3IP3039	CCV recovery acceptable for this Instrument Batch.
Zinc, Tot. Rec., ICP-MS	02/09/2012	3IP3040	CCV recovery acceptable for this Instrument Batch.
Zinc, Tot. Rec., ICP-MS	02/09/2012	4IP3040	CCV recovery acceptable for this Instrument Batch.
Zinc, Dissolved, ICP-MS	02/15/2012	4IP3046	CCV recovery acceptable for this Instrument Batch.
Zinc, Tot. Rec., ICP-MS	02/09/2012	5IP3040	CCV recovery acceptable for this Instrument Batch.
Zinc, Dissolved, ICP-MS	02/15/2012	5IP3046	CCV recovery acceptable for this Instrument Batch.

Data Qualifiers:

CH - The continuing calibration verification (CCV) standard recovery for this analyte was above the method or SOP limit. The reported concentration for this analyte may be biased high.

- Laboratory Report Conclusion -

Continental Analytical Services, Inc.
Cooler/Sample Receipt Form (C/S RF)

CAS Order No.: 101252

Client Name: Wichita

CAS File No.: 8339

Sample ID's in cooler: 50000
Toune East

Cooler _____ of _____ for this CAS Order No.

Cooler Identification: CAS Cooler #: _____ / Client's Cooler / Box / Letter / Hand-delivered
Other: _____

Date/Time Cooler Received: 2/3/12 14:35

Delivered By: UPS / FedX / AB Express / Field Svcs / Mail / Walk-In / Other: _____

Custody Seal: Present: Intact / Broken Absent: Seal No: _____

Seal Name: _____ Seal Date: _____

Seal matches Chain of Custody: Yes / No / N/A

Type of Packing Material: Blue Ice / Melted Ice / Bubble / Foam / Paper / Peanuts / Vermiculite / None / Other: _____

Cooler Temperature (°C): Original Reading (°C) 1.4 Corrected Reading (°C) 1.8

Temp. By: Temp. Blank Cooler Surface: Glass / Plastic / Metal / Other: _____

Thermo. ID No.: 585 Thermo. Correction Factor (°C): 0.4

Evidence of Cooling and date received = date sampled

Sample Receipt Discrepancies: No Yes (See below for discrepancies.)

Note: If discrepancies are present, CAS will proceed with analyses until/unless directed otherwise by the client.

Dear Mr. Hardesty:

This laboratory report containing the samples indicated below, includes 11 pages for the analytical report, 1 page(s) for the chain of custody and/or analysis request, and 1 page(s) for the sample receipt form.

<u>CAS LAB ID #</u>	<u>SAMPLE DESCRIPTION</u>	<u>SAMPLE TYPE</u>	<u>DATE SAMPLED</u>
12041013	Towne East-Grab	Liquid	4/12/2012
12041014	Towne East-Composite	Liquid	4/12/2012
12041015	Towne East-Upstream	Liquid	4/12/2012

The Appendix and Quality Control sections are integral parts of this laboratory report and may contain important data qualifiers.

All results are reported on a wet weight basis unless otherwise stated.

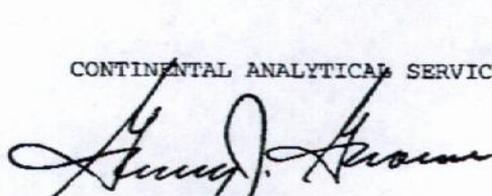

Samples will be retained for thirty days unless Continental is otherwise notified.

Continental is accredited by the State of Kansas through the National Environmental Laboratory Accreditation Program (NELAP). The results contained in this report were obtained using Continental's Standard Operating Procedures. These procedures are in substantial compliance with the approved methods referenced and the standards published by NELAP unless otherwise noted in the Appendix and Quality Control sections of this report.

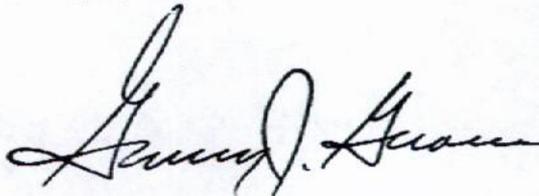

This report may not be reproduced, except in full, without written approval from Continental Analytical Services, Inc.

Thank you for choosing Continental for this project.

ND(), where reported, indicates the analyte was not detected above the Limit of Quantitation (LOQ). The concentration of the LOQ is inside the parentheses.

All samples which require cooling were received at a temperature of less than 6 degrees Celsius.

The following table presents the date and time sampled, the date and time analyzed, and the total time elapsed for each analysis with an EPA recommended holding time of seventy-two hours or less.

<u>CAS LAB ID #</u>	<u>ANALYSIS</u>	<u>DATE/TIME SAMPLED</u>	<u>DATE/TIME ANALYZED</u>	<u>ELAPSED HRS:MIN</u>

NELAP accreditation is issued under each EPA regulatory program for a given matrix/analyte/method combination. Continental is NELAP accredited for each matrix/analyte/method and EPA program cited in this Laboratory Report, except for those listed in the table below and for analyses performed in the field. For most of the analyses listed in the table, NELAP accreditation is not offered under the listed EPA program and Continental is NELAP accredited for the analysis, using the same analytical technology, but under a different EPA program. Continental's full NELAP accreditation status may be viewed at www.kdheks.gov/envlab. Note that unless qualified otherwise in the Laboratory Report, Continental performs all analyses, including each analysis listed in the table below, utilizing NELAP protocol.

Dear Mr. Hardesty:

This laboratory report containing the samples indicated below, includes 10 pages for the analytical report, 1 page(s) for the chain of custody and/or analysis request, and 1 page(s) for the sample receipt form.

<u>CAS LAB ID #</u>	<u>SAMPLE DESCRIPTION</u>	<u>SAMPLE TYPE</u>	<u>DATE SAMPLED</u>
12040998	Westlink-Grab	Liquid	4/12/2012
12040999	Westlink-Composite	Liquid	4/12/2012

The Appendix and Quality Control sections are integral parts of this laboratory report and may contain important data qualifiers.

All results are reported on a wet weight basis unless otherwise stated.

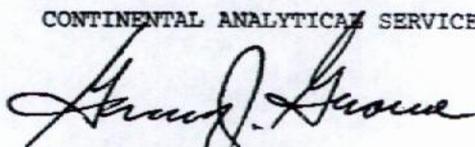

Samples will be retained for thirty days unless Continental is otherwise notified.

Continental is accredited by the State of Kansas through the National Environmental Laboratory Accreditation Program (NELAP). The results contained in this report were obtained using Continental's Standard Operating Procedures. These procedures are in substantial compliance with the approved methods referenced and the standards published by NELAP unless otherwise noted in the Appendix and Quality Control sections of this report.

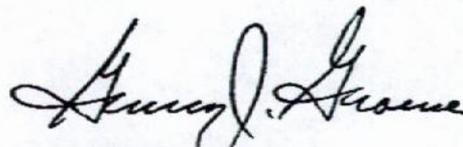

This report may not be reproduced, except in full, without written approval from Continental Analytical Services, Inc.

Thank you for choosing Continental for this project.

ND(), where reported, indicates the analyte was not detected above the Limit of Quantitation (LOQ). The concentration of the LOQ is inside the parentheses.

All samples which require cooling were received at a temperature of less than 6 degrees Celsius.

The following table presents the date and time sampled, the date and time analyzed, and the total time elapsed for each analysis with an EPA recommended holding time of seventy-two hours or less.

<u>CAS LAB ID #</u>	<u>ANALYSIS</u>	<u>DATE/TIME SAMPLED</u>	<u>DATE/TIME ANALYZED</u>	<u>ELAPSED HRS:MIN</u>
12040999	BOD	04/12/2012 1315	04/13/2012 1455	25:40
12040999	Nitrate, as N	04/12/2012 1315	04/12/2012 2355	10:40
12040999	Nitrite, as N	04/12/2012 1315	04/12/2012 2355	10:40

DM - NPDES requirements specify that dissolved metals and orthophosphate must be filtered within 15 minutes of the time of collection. This analysis did not meet these criteria.

NELAP accreditation is issued under each EPA regulatory program for a given matrix/analyte/method combination. Continental is NELAP accredited for each matrix/analyte/method and EPA program cited in this Laboratory Report, except for those listed in the table below and for analyses performed in the field. For most of the analyses listed in the table, NELAP accreditation is not offered under the listed EPA program and Continental is NELAP accredited for the analysis, using the same analytical technology, but under a different EPA program. Continental's full NELAP accreditation status may be viewed at www.kdheks.gov/envlab. Note that unless qualified otherwise in the Laboratory Report, Continental performs all analyses, including each analysis listed in the table below, utilizing NELAP protocol.

Continental Analytical Services, Inc.
Cooler/Sample Receipt Form (C/S RF)

CAS Order No.: 102689

Client Name: Wichita

CAS File No.: 8339

Sample ID's in cooler: 5-2-02
Worthington

Cooler _____ of _____ for this CAS Order No.

Cooler Identification: CAS Cooler #: 320 / Client's Cooler / Box / Letter / Hand-delivered
Other: _____

Date/Time Cooler Received: 4/12/12 16:20

Delivered By: UPS / FedX / AB Express / Field Svcs / Mail / Walk-In / Other: _____

Custody Seal: Present: Intact / Broken Absent: X Seal No: _____

Seal Name: _____ Seal Date: _____

Seal matches Chain of Custody: Yes / No / N/A

Type of Packing Material: Blue Ice X Melted Ice / Bubble / Foam / Paper / Peanuts / Vermiculite / None / Other: _____

Cooler Temperature (°C): Original Reading (°C) 0.9 Corrected Reading (°C) 1.4

Temp. By: Temp. Blank Cooler Surface: Glass / Plastic / Metal / Other: _____

mw
4-12-12

Thermo. ID No.: 585 Thermo. Correction Factor (°C): 0.5

Evidence of Cooling and date received = date sampled

Sample Receipt Discrepancies: No Yes (See below for discrepancies.)

Note: If discrepancies are present, CAS will proceed with analyses until/unless directed otherwise by the client.
