

# Appendix D: Additional Existing Conditions Maps

Some additional existing features of the Wichita that can influence decisions related to pedestrian improvements are shown in the following figures. The maps are presented as “heat maps” which highlight the density of a given feature with a color gradient. Red indicates areas of highest density, while blue indicates areas of lowest density. Maps include:

- College Density
- School Density
- Park Density
- Community Center Density
- Employment Density
- Population Density
