Media Advisory Community Crime Mapping

The Wichita Police Department (WPD) is offering a new service to help residents stay informed and stay safe.

In partnership with LexisNexis, WPD is offering a crime-mapping service, which provides up-to-date crime data through online filtered Community Crime Mapping.

Specifically, the Community Crime Mapping provides specific searchable crime data to residents, allowing them to have a greater awareness of crime in their neighborhoods.

The goal is to empower residents to have an active role in combating, addressing and resolving crime in their neighborhoods.

The Community Crime Mapping includes several features to help citizens stay on top of crime. To learn about these features and the technology, please watch this informational video:

<https://youtu.be/ddtgyut6ffM>

To sign up and start tracking data today, please visit <https://communitycrimemap.com/>

Crime alerts are also available through the LexisNexis Crime Alerts app.
