

Fused Glass Class Information

First time students - Glass will be provided for the first class to make a small project. COE 96 glass is the only glass we use and is available to purchase in the classroom for your convenience. You will need to provide your own glass after the first class. We also recommend Bearden's Glass (6205 W. Kellogg 316-942-2929) for a local glass source. Be sure to ask for a student discount and sign up for their email list to get notifications of sales.

Due to kiln size and number of students in a class there is a size limit of 9" piece for a finished product.

Only work made in class will be fired. No bringing in outside work.

Ideas and Inspirations

- Pinterest is a great resource with unlimited amounts of ideas for beginner to advanced users.
- Facebook has several helpful groups Fusers of CPI, Fusing 101 and Fused Glass Fanatics are a few to get you started.
- Instagram has fused glass artists from around the world (#fusedglass, #glassart).
- YouTube is another excellent resource for inspiration and tutorials.
- Glasshoppa is a popular site with relatively simple projects shown on video.
- Aae has several free tutorials.
