National Pollutant Discharge Elimination System Permit 2013 Annual Report

Department of Public Works & Utilities
Stormwater Management
455 N Main
Wichita, KS 67202
(316) 268-4498

March 3, 2013

CITY OF WICHITA

Department of Public Works & Utilities

March 10, 2014

Mr. Rance Walker, P.E.
KDHE/Bureau of Water Resources
1000 SW Jackson, Suite 420
Topeka, KS 66612

Re: NPDES Annual Report for 2013 for Wichita, Ks

Dear Mr. Walker:

Enclosed is the City of Wichita's Annual Report. The reporting period is for calendar year 2013. This copy consists of the Executive Summary, the abbreviated report and Exhibit G.3. Supporting documentation has been compiled and put in a binder. It will be held in our office for viewing.

Please advise if you have questions or concerns relative to this document.

Sincerely,

Scott Lindebak, P.E., CFM
Stormwater Engineer

KANSAS STORMWATER ANNUAL REPORT FORM FOR MUNICIPAL SEPARATE STORM SEWER SYSTEMS (MS4s)

Check box if this is a new name, address, etc.

A. Permittee Information and Reporting Period

Permittee:	City of Wichita, Kansas	☐
Mailing Address 1:	Department of Public Works & Utilities/Stormwater Mgmt	☐
Mailing Address 2:	455 N Main – 8th Floor	☐
City:	Wichita	☐
State:	Kansas	☐
Zip Code:	67202	☐
Contact Person:	Scott Lindebak, P.E.	☐
Contact Phone #:	(316) 268-4545 Cell #: (316) 214-6877	
Kansas Permit No.:	M - AR94 - S001	

The enclosed reports are for:

- ☐ Stormwater Management Plan
- ☐ Annual Report Year 1: Covers activities from January 1, 2008 – December 31, 2008
- ☐ Annual Report Year 2: Covers activities from January 1, 2009 – December 31, 2009
- ☐ Annual Report Year 3: Covers activities from January 1, 2010 – December 31, 2010
- ☐ Annual Report Year 4: Covers activities from January 1, 2011 – December 31, 2011
- ☐ Annual Report Year 5: Covers activities from January 1, 2012 – December 31, 2012
- ☒ Annual Report Year 6: Covers activities from January 1, 2013 – December 31, 2013

B. Executive Summary

Append an executive summary to this report which briefly covers the major aspects of the MS4 stormwater management program enacted during the year. In completing the executive summary, the preparer should address the following questions:

1. Were there any aspects of the program that appeared especially effective at reducing pollutants in your stormwater discharge?
2. Were there any aspects of the program that provided unsatisfactory results?
3. What was the most successful part of the program?
4. What was the most challenging aspect of the program?

The executive summary does not need to be extensive and detailed. It is anticipated the executive summaries will range from one half of a page to two pages in length depending on the scope of the program.

C. Stormwater Management Program

		Place mark in the appropriate box	
		Yes	No
1.	Has the Stormwater Management Plan (SMP) been developed?	☒	☐
a.	If yes, Has it been submitted to KDHE as required by the permit?	☒	☐
b.	If no, it needs to be developed and submitted to KDHE by October 1, 2008.		

D. Total Maximum Daily Load (TMDL) Best Management Practices

The permit requires the implementation of these BMPs prior to October 1, 2009.

		Place mark in the appropriate box.		
		Yes	No	Not Applicable
1.	Were any best management practices (BMPs) intended to attenuate the discharge of TMDL regulated pollutants implemented? See your permit to determine if TMDL regulated pollutants are listed for the receiving streams affected by your stormwater system.	☒	☐	☐
2.	List all of the BMPs intended to attenuate the discharge of TMDL regulated pollutants as identified in the SMP and provide the requested information on the following table. – SEE TABLE			

D. Total Maximum Daily Load (TMDL) Best Management Practices

BMP ID NUMBER	Brief BMP Description	Regulated TMDL Parameter	Measurable Goals(s)	Progress on Achieving Goal(s) (Measured Result)
TMDL 1A	Pet Waste A pet waste brochure will be developed for public education and dissemination. This brochure will encourage pet owners to pick up the waste as well as other pollution prevention tips for pet owners.	Total nitrogen, biochemical oxygen demand pollutants, suspended solids, and bacteria.	The brochure will be posted on the City Stormwater Website and printed and placed in various buildings and City Hall for citizen use. This brochure will be provided to neighborhood associations for printing in their newsletters and for distribution at neighborhood meetings. This brochure will address the TMDL regulated parameters and actions that citizens and particularly pet owners can do to ameliorate the discharge. The brochure will be developed prior to May 1, 2009. Each subsequent year, pet waste will be addressed in an education program or printed informational handout.	Brochure was expanded to include several stormwater discharge practices. The brochure is entitled" Yucky Stuff" and was distributed at several stormwater education events and posted on Wichita 1Thing website: http://wichita.1thingus.com/in-the-community. Another brochure has been developed and distributed that addresses pet waste and other residential pollution issues. Two 'Dog Parks' are now operating in Wichita, both of which include pet waste stations. A 5 minute educational pet waste video 'Dog Doogity" has been produced for use on You-Tube, City Channel 7, and Facebook. A 30 second and 15 second version are also available as public service announcements available to area television stations, and has been aired on KWCH-TV. The video has had 4,497 views on Facebook, and was featured in an article in the Wichita Eagle. The video has also been added to the EPA's Non-Point Source Pollution 'Toolbox'.
TMDL 1B	Pollution Prevention A "Don't discharge grass clippings or leaves into the street" brochure was developed and is disseminated to individuals when a complaint about grass clippings or leaves in the street has been observed.	Total nitrogen, biochemical oxygen demand pollutants, suspended solids, and bacteria.	Brochures and citations presented to those that violate the ordinance requiring grass clippings and leaves to be kept out of the street and associated storm drains will be documented and reported in the City's Annual Report.	In 2013, City staff sent 135 notifications regarding grass clippings disposal practices to residents and businesses.

BMP ID NUMBER	Brief BMP Description .	Regulated TMDL Parameter	Measurable Goals(s)	Progress on Achieving Goal(s) (Measured Result)
TMDL 1C	W.A.T.E.R. Center A display for the five regulated TMDL parameters will be designed and installed at the City's W.A.T.E.R. Center addressing each of the regulated parameters and their associated river or creek	Total nitrogen, BOD pollutants, suspended solids, and bacteria.	The display will be designed and installed prior to August 1, 2009. The annual number of W.A.T.E.R. Center visitors will be reported in the Annual Report.	In 2013, the City contracted a firm to develop brochures that address, among other pollution concerns, TMDL's. In 2014, that scope of work will be expanded to include a traveling static display addressing these pollutants at EARTH Day, W.A.T.E.R Center, City Hall, and other environmental educational events.
TMDL 1D	The Little Arkansas and the Cowskin Creek watersheds contain several operations involved in the caring, feeding of livestock. The City or other volunteer organization on the City's behalf will seek-out and contact these operations to discuss and offer any types of assistance to reduce the listed pollutants in their discharge.	Total nitrogen, biochemical oxygen demand pollutants, suspended solids, and bacteria.	CAFO operations will be contacted each year and the results of those contacts will be reported annually. These efforts will begin in July 2009. Affected Parameters: Total phosphorus, total nitrogen, biochemical oxygen demand pollutants, suspended solids, and bacteria.	Though not able to influence practices outside of our City limits as we had desired when this BMP was conceived, we still believe it can be very effective. The City will remain receptive to any initiatives that we are requested to participate in, and will provide any resources possible when we are approached by an entity that does have influence outside of our City limits. Because this BMP exceeds the City's MS4 jurisdiction, and at the request of EPA, this item has been removed from the SMP.
TMDL 1E	Septic Systems In all four of the targeted watersheds, priority attention is currently given to regulated septic system installation and usage. Response to complaints received regarding improper discharges or surfacing sewage related to septic systems failures will be given top priority for complaint investigation and response.	Total nitrogen, biochemical oxygen demand pollutants, suspended solids, and bacteria.	Continue regulation of septic systems in accordance with City Code Chapter 16.32 during the entire Permit term. Records will be maintained to document the number of complaints received and disposition of problems found will be reported in the Annual Report. The number of 'order in' requests is demand driven.	In 2013: • 82 On-site wastewater systems were evaluated for title transfers. • 69 newly installed or replaced on-site systems were inspected and approved. • 2 Properties were connected to sanitary sewer.

D. Total Maximum Daily Load (TMDL) Best Management Practices, cont.

BMP ID NUMBER	Brief BMP Description	Regulated TMDL Parameter	Measurable Goals(s)	Progress on Achieving Goal(s) (Measured Result)
TMDL 1 F	**Construction Site Inspections** The City will use the current program of construction site inspections to target construction activities within the four listed watersheds.	Total nitrogen, biochemical oxygen demand pollutants, suspended solids, and bacteria.	Beginning October 2008, the City will identify and target those construction or redevelopment projects having BMPs that are within close proximity to one of the four associated designated streams or rivers. The City will initially inspect within 30 days of the project start date. This effort will continue throughout the permit term.	In 2013, 28 City personnel oversaw BMP implementation on 103 publicly bid City construction projects budgeted at $41.5 million. The engineers, who have received BMP training, have inspected the projects within 30 days of construction start date. Sites continue to be monitored daily throughout the duration of construction.
TMDL 1G	**Stormwater Demonstration Projects** Stormwater demonstration projects will be implemented in each permit year as funding sources are made available. Each project will be publicized for the community to view, evaluate and discuss. The City will evaluate each project for effectiveness and will report its findings to the general public through its website or other communication avenue and in the Annual Report.	Total nitrogen, biochemical oxygen demand pollutants, suspended solids, and bacteria.	Beginning October 2008, the City will identify at least one demonstration project for design, construction and implementation. The demonstration project will be in reasonably close proximity to one of the four associated designated streams or rivers. The City will periodically inspect, evaluate and maintain each project and report on its effectiveness in the Annual Report.	No-Mow Grass Buffer Strips: • The City initiated 2 No-Mow zone grass buffer strips in separate drainage channels, totaling over a mile. The area of the waterway from the crest down the embankment to the stream was allowed to grow naturally from April through October. Informative signage was installed.

E. Stormwater Management Program Requirements (Six Minimum Control Measures)

1. Public Education and Outreach

The permit requires the implementation of these BMPs prior to October 1, 2008. List all of the public education and outreach BMPs as identified in the SMP and provide the requested information in the following table.

BMP ID Number	Brief BMP Description	Measurable Goal(s)	Progress on Achieving Goal(s) (Measured Result)
MCM 1A	**Citizen Outreach/Educational Materials**: Video messages and graphics will be developed by the City for use on the City's Cable Channel 7 or other video outlets for community distribution. This activity will take the form of periodic repeating video presentations or graphics informing citizens of the importance of preventing stormwater pollution and individual actions citizens can take to reduce their impact on stormwater.	A new repeating video, obtained in January 2012, designed to inform the public on stormwater pollution prevention will be run at least twice per year on the City's Cable Channel 7, beginning in 2012. Presentations/messages and graphics will be documented along with the media used and its duration.	In 2013, the following stormwater information was disseminated via Cable Channel 7 and/or press releases. • Announcement of the 12th Annual River Trash Round Up. • To date, 4778 storm-inlet medallions 'No Dumping-Drains To Arkansas River' have been purchased, and 3253 have been installed. Installation will continue in 2014. • The EPA video 'Reduce Runoff', "After The Storm", and the locally produced 'Dog Doogity' video were aired over 100 times.
MCM 1B	**Brochure in Water Utility Bill** Develop informational brochure on stormwater quality for residents. This brochure will be used as a water bill insert.	Brochure will be developed, and, approximately 130,000 will be distributed via Wichita Water Utility bill inserts.	Stormwater contracted a firm in 2013 to accomplish a public education program that will include new brochures, PSA's, water bill inserts, and a wide range of encompassing educational materials. Though partially completed, this project is continuing into 2014.

MCM 1C	**Stormwater Web Page** Distribute stormwater education materials through the City of Wichita website. Including appropriate links to local, regional, and national websites.	Website will be developed and in operation after October 1, 2008, and continue throughout the permit term. At least one informational document or website link will be added to the website for stormwater education and will be reported and documented in the Annual Report.	Stormwater pollution prevention information is available at: http://www.wichita.gov/Government/Departments/PWU/Pages/Documents.aspx

BMP ID Number	Brief BMP Description	Measurable Goal(s)	Progress on Achieving Goal(s) (Measured Result)
MCM 1D	**Support for Water Quality Initiatives for Schools and Community: Schools** Stormwater pollution prevention, water conservation and water quality education programs have been and will continue to be developed and provided to public and private schools. These may be provided at the City's W.A.T.E.R. Center as well as at public school facilities or other locations. Such programs and assistance may be provided in cooperation with educational, non-profit, or other governmental groups.	City will continue contact with interested teachers and appropriate school officials. Programs and assistance will continue to be provided through several ongoing programs and will reach a minimum of 500 students or participants each permit year and will be documented.	In 2013, City staff educated over 433 students at 14 presentations with stormwater activities and distributed educational materials for use in their classrooms.

MCM 1E	**Support for Water Quality Initiatives for Schools and Community: Community** Stormwater pollution prevention, water conservation and water quality education programs have been and will continue to be developed and provided to neighborhood groups, homeowner's associations, business and trade associations, community organizations, youth groups, and other groups and organizations. These may be provided at the City's W.A.T.E.R. Center as well as at other locations. Such programs and assistance may be provided in cooperation with educational, non-profit, or other governmental groups.	There will be at least 20 programs provided annually of each permit year. The programs will be documented and a summary of the programs provided will be identified in the annual report.	In 2013, WATER Center staff presented 5 talks and tours focusing on water quality issues that were attended by 162 adult citizens. Staff also gave out 556 pieces of water quality educational materials.

E. Stormwater Management Program Requirements (Six Minimum Control Measures), cont

BMP ID Number	Brief BMP Description	Measurable Goal(s)	Progress on Achieving Goal(s) (Measured Result)
MCM 1F	**BMP Evaluation** Annually each BMP and corresponding measurable goal provided in this SMP will be evaluated and progress or actions will be reported in the Annual Report as required by the KDHE NPDES permit.	As required by the KDHE NPDES permit, an Annual Report will be submitted to KDHE by April 1 of each year for the previous calendar year. The Annual Report will also be provided to the City Manager and posted on the City's stormwater website.	This Annual Report will be submitted on or before April 1, 2014.

2. Public Involvement and Participation

The permit requires the implementation of these BMPs prior to October 1, 2008. List all of the public involvement and participation BMPs as identified in the SMP and provide the requested information in the following table.

BMP ID Number	Brief BMP Description	Measurable Goal(s)	Progress on Achieving Goal(s) (Measured Result)
MCM 2A	**Mechanism for Citizen Participation** Public comments and recommendations for this plan and recommended changes to this plan will be solicited by the City regarding the BMPs and measurable goals we will utilize to achieve the goals of this permit. Public input will be considered and utilized, if applicable, in the annual evaluation of this SMP.	Public comment periods will be established and announced via press releases and posted on the City website. Public comments will be documented and considered in finalizing all documents. Comments made via any method, (i.e., web site, phone, mail, etc.,) will be evaluated and, if appropriate, incorporated into this SMP.	The final Stormwater Management Plan is posted on the City's website. In 2013, no comments or suggestions were submitted to Stormwater Management. The Wichita WRAPS Program has completed the Assessment and Planning phase containing the 9 Element Plan. Application for the Implementation Phase was successful, and Consultants were interviewed in December 2013.

E. Stormwater Management Program Requirements (Six Minimum Control Measures), cont

BMP ID Number	Brief BMP Description	Measurable Goal(s)	Progress on Achieving Goal(s) (Measured Result)
MCM 2B	**Promote Community Involvement in Stormwater Quality Issues** The City will conduct at least one volunteer river clean up day with citizen and group volunteers and participants will be surveyed for their suggestions for stormwater pollution prevention measures.	An Arkansas River (and/or tributaries) Cleanup will be held at least once each year of the permit. Stream miles cleaned number of volunteers, tons of trash collected and survey responses will be documented. Results will be contained in the annual evaluation of this SMP.	Co-hosted by City staff and community partners, the annual River Trash Roundup was held on April 20, 2013. 2.6 tons of trash was collected by 743 volunteers in the area by the Sims Park walking bridge and the Broadway 'John Mack' bridge in the Arkansas River.
MCM 2C	**BMP Task Force** The City will convene a Task Force for the purpose of reviewing stormwater best management practices and making recommendations to the City for implementation.	The City has already initiated this Task Force (August 2008) and will seek its input regarding this Program and individual best management practices as determined by the City. Comments will be evaluated and, if appropriate, incorporated into this SMP. This will begin in September 2008.	The role of the Task Force was completed with the adoption of the Wichita/Sedgwick County Stormwater Manual in November 2010. The advisory duties of the Task Force have been taken up by The Sedgwick County Stormwater Management Advisory Board (SMAB), and the Stormwater Advisory Board (SWAB). Both groups met regularly throughout 2013.

E. Stormwater Management Program Requirements (Six Minimum Control Measures), cont

3. Illicit Discharge Detection and Elimination

The permit requires the implementation of these BMPs prior to October 1, 2009.

		Place mark in the appropriate box.		
		Yes	No	Not Applicable
1.	Has a program/plan been developed and is it presently implemented to detect and address illicit/prohibited discharges into the MS4?	☒	☐	
2.	Has a map of the MS4 been developed, showing the location of all outfalls, either pipes or open channel drainage, showing the names and location of all streams or lakes that receive discharges from those outfalls?	☒	☐	
3.	The permit requires the permittee enact certain ordinances or resolutions if the permittee has such authority. Has an ordinance or resolution to prohibit non-stormwater discharges into the storm sewer system been enacted? Date Effective: *Ordinance passed in 1993, and updated in 1998, and 2010.*	☒	☐	☐
4.	Has a copy of the ordinance or resolution been submitted to KDHE as required by the permit? *The 2010 ordinance is submitted in Exhibit G3.*	☒	☐	☐
5.	Have public employees, businesses, and the general public been informed of hazards associated with illegal discharges and improper disposal of waste?	☒	☐	
6.	List all of the illicit discharge detection and elimination BMPs as identified in the SMP and provide the requested information in the table on the following page.	☒	☐	

E. Stormwater Management Program Requirements (Six Minimum Control Measures), cont

BMP ID Number	Brief BMP Description	Measurable Goal(s)	Progress on Achieving Goal(s) (Measured Result)
MCM 3A	**Plan to Detect and Eliminate Illicit/Non-Stormwater Discharges to the MS4** The City has already passed an ordinance to prohibit non-stormwater discharges into the storm sewer system as required by the current KDHE permit and has implemented appropriate enforcement procedures and actions.	An ordinance prohibiting non-stormwater discharges is currently in place, Chapter 16.32., and will be maintained and updated as necessary throughout the effective dates of this permit. A copy of the implemented ordinance will be provided in the next Annual Report.	Title 16, Chapter 16.32 in the City Code of Ordinances was adopted by City Council in 1998, and most recently updated in November of 2010. A copy of the ordinance is submitted in Exhibit G3.
MCM 3B	**Televise Storm Sewer Lines** The City will continue to televise storm sewer pipe to identify illicit connections or discharges.	Each permit year the City will televise 45,000 linear feet of storm sewer pipe in an effort to find illicit connections or discharges. Any illicit discharges found will be investigated with actions documented. The amount of storm sewer televised will be reported in the Annual Report with a summary of results included.	In 2013 City staff televised 53,364 linear feet of storm sewer line, and 745,208 linear feet of line were cleaned. No illicit connections were reported.
MCM 3C	**Televise Sanitary Sewer Lines** Permittee will continue the program of televising sanitary sewer lines.	A minimum of 400,000 linear feet of sanitary sewer line will be televised in each of the remaining years of the permit and reported in the Annual Report.	In 2013 City staff televised 600,367 linear feet of sanitary sewer line, and 60,176 linear feet were rehabilitated or replaced, and, 149 lines repaired resulting in 32,780 linear feet of repairs were completed.
MCM 3D	**Storm Inlet Inspection** A City program of systematic inlet inspections and cleaning, including visual observations for illicit discharges will be continued.	Permittee will perform at least 30,000 catch basin cleanings each year. This effort is currently underway and inspection frequency will be reviewed each permit year for planning of the next year's cleaning schedule. In the third quarter of the 3rd year of permit coverage a new plan will be established for years 4 and 5 to take any new factors including new equipment into consideration.	In 2013, City staff cleaned 100,689 storm structures, and inspected 2,270 storm structures.

E. Stormwater Management Program Requirements (Six Minimum Control Measures), cont

BMP ID Number	Brief BMP Description	Measurable Goal(s)	Progress on Achieving Goal(s) (Measured Result)
MCM 3E	**Storm System Map** The City has already prepared a current and complete storm sewer collection system map in accordance with the KDHE NPDES permit requirements. An updated GIS storm sewer system map is currently being prepared.	Permittee has contracted for the development of a electronic geo-database of the storm sewer collection system. Due to the City's large system, this program will need to be implemented in phases. The system will include specifications identified by the current KDHE NPDES Permit.	By the end of 2013, 67,394 stormwater structures and 1,214 miles of conduit have been put on a GIS layer. The City has been inventorying since 2007, and is 95% complete. The City is continuing to collect new projects and is reviewing quality control, and collecting the open channel drainage systems.
MCM 3F	**Restaurant Inspection for Proper Waste Grease Management** Inspect restaurants to verify that grease is not being discharged to the municipal storm drains. These inspections are incorporated into the regular restaurant inspection system and are accomplished by City inspectors.	Inspections of restaurant grease handling are an existing program within the Water & Sewer Department. There will be a minimum of 160 inspections performed each year of the Permit will be reported in our Annual Report. If changes are necessary with this program, KDHE will be informed.	In 2013, restaurant grease interceptor inspectors performed 253 inspections, issued 14 NOV's, and 84 variances. And documented an 85% on-time pump rate.
MCM 3G	**On-Site Septic Sewer System Inspection at Resale** Regulate septic system installation and usage, via our existing Ordinance, and respond to complaints regarding improper discharges related to septic systems. Septic system regulation is an ongoing program of the City. The City will seek City Council approval to 'order in' municipal services as a result of failed septic systems.	Regulation of septic systems in accordance with Code of Ordinances Title 16 during the entire Permit term. Records will be maintained to document the number of complaints received and disposition of problems found will be reported in the Annual Report. The number of 'order in' requests is demand driven.	In 2013: • 82 On-site wastewater systems were evaluated for title transfers. • 69 newly installed or replaced on-site systems were inspected and approved. 2 Properties were connected to sanitary sewer.

E. Stormwater Management Program Requirements (Six Minimum Control Measures), cont

BMP ID Number	Brief BMP Description	Measurable Goal(s)	Progress on Achieving Goal(s) (Measured Result)
MCM 3H	**Training of Businesses and Industries** The City will either provide training for, or work in conjunction with, organizations to ensure businesses and industries are trained in stormwater pollution prevention best management practices and local, state and federal regulations and ordinances.	The City has provided periodic training and BMP discussions to area business regarding stormwater pollution prevention and BMP's. The City will conduct one annual training program for area businesses to ensure compliance with this Program. Results will be reported in the Annual Report.	In June, the City participated in a conference hosted by the Clean 20 group. Stormwater BMP's were discussed with the organization. Presentations to SWAB were given explaining the stormwater collection system, storm event sampling, and water quality. An educational brochure tailored to business and industry was finalized and is undergoing distribution.

E. Stormwater Management Program Requirements (Six Minimum Control Measures), cont

4. Construction Site Stormwater Runoff Control

The permit requires the implementation of these BMPs prior to October 1, 2008.

		Place mark in the appropriate box.		
		Yes	No	Not Applicable
1.	The permit requires the permittee enact certain ordinances or resolutions if the permittee has such authority. Has an ordinance or resolution to address construction site runoff from new development and redevelopment projects been enacted? Date Effective: *November 16, 2010*	☒	☐	☐
2.	Has a copy of the ordinance or resolution been submitted to KDHE as required by the permit? *Submitted in Exhibit G3*	☒	☐	
3.	Has a procedure or program been developed which requires construction site owners or operators to implement appropriate erosion and sediment control best management practices?	☒	☐	
4.	Has a procedure or program been developed which requires construction site owners or operators to control waste such as discarded building materials, concrete truck washout, chemicals, litter, and sanitary waste at the construction site that are likely to cause adverse impacts to water quality?	☒	☐	
5.	Has a procedure been developed that requires site plan review which incorporates consideration of potential water quality impacts?	☒	☐	
6.	Has a procedure been developed for receipt and consideration of information submitted by the public?	☒	☐	
7.	Has a procedure been developed for site inspection and enforcement of control measures?	☒	☐	
8.	List all of the construction site stormwater runoff control BMPs as identified in the SMP and provide the requested information in the table on the following page.			

E. Stormwater Management Program Requirements (Six Minimum Control Measures), cont

BMP ID Number	Brief BMP Description	Measurable Goal(s)	Progress on Achieving Goal(s) (Measured Result)
MCM 4A	**Erosion Control Ordinance** The City has implemented an ordinance requiring erosion and sediment control measures at construction sites.	An ordinance is currently in place, Chapter 16.32.050, and will be maintained and updated as necessary throughout the effective dates of this permit.	Title 16, Chapter 16.32 in the City Code of Ordinances was adopted by City Council in 1998, and revised in November 2010.
MCM 4B	**Site Inspection and Enforcement** The City has developed and implemented a program to reduce pollutants in stormwater runoff to the MS4 from construction activities as required by the City's permit.	This is an existing program which will continue regulation of construction activities in accordance with City Code, Chapter 16.32.050. Permittee will perform at least 600 inspections in each year of the permit, and violations/ citations will be written as necessary. In 2011, our Manual of Inspection Procedures will be updated and revised. A copy of the updated program instructions will be included in the next Annual Report.	In 2013, City stormwater staff performed 1006 inspections and issued 312 Notices Of Violation. City engineering personnel oversaw BMP implementation on 103 publicly bid City construction sites, these sites continue to be monitored daily throughout the duration of construction. The City's Manual of Inspection Procedures is updated with an EROSION CONTROL SUMMARY report to be completed for ongoing publicly bid projects. The parts of the manual that remain relevant for today's standards are unchanged. City field personnel in other departments have also been trained to notify Stormwater Staff if they see any potential stormwater violations.

E. Stormwater Management Program Requirements (Six Minimum Control Measures), cont

5. Post-Construction Site Stormwater Management in New Development and Redevelopment

The permit requires the implementation of these BMPs prior to October 1, 2009.

	Place mark in the appropriate box.	
	Yes	No
1. The permit requires the permittee enact a program to address post-construction stormwater runoff from new development and redevelopment. The program developed to manage stormwater in new development and redevelopment projects must include the following elements: a. strategies which include a combination of structural and/or non-structural BMPs, b. measures to ensure adequate long-term operation and maintenance of BMPs. c. BMPs to prevent or minimize adverse water impacts. Has a post construction stormwater runoff program been implemented? *November 2010.*	☒	☐
2. List all of the post-construction site stormwater management in new development and redevelopment BMPs as identified in the SMP and provide the requested information in the table on the following page.		

E. Stormwater Management Program Requirements (Six Minimum Control Measures), cont

BMP ID Number	Brief BMP Description	Measurable Goal(s)	Progress on Achieving Goal(s) (Measured Result)
MCM 5A	**Program to Address Post-Construction Stormwater Runoff** The City will develop, implement, and enforce a program to address post-construction stormwater runoff from new development and redevelopment projects as required by the Permit. To obtain the best information and technical input from national and area resources, the City has implemented a Task Force to develop BMP's required for post-construction operations and maintenance.	Structural and/or non-structural BMP's will be selected and identified as determined by the Task Force by October 2009 and implemented by January 2010.	The Wichita/Sedgwick County Stormwater Manual was completed in June 2011. It is available for download in a digital format for free at: http://www.wichita.gov/Government/Departments/PWU/Pages/Regulations.aspx Or users can purchase a hard copy of the Manual from KBP Reprographics for their printing fee. The Wichita/Sedgwick County Stormwater Manual has been fully implemented, and is reviewed and updated via monthly meetings with the Stormwater Advisory Board. Updates are posted on the City website.
MCM 5B	**Stormwater Runoff Control Ordinance** The City will enact an ordinance to address post-construction runoff from new development and redevelopment projects.	The City currently has provisions in its stormwater ordinance to address protection of MS4 and waters of the U.S. from development as provided in Chapter 16.32. Updates to the current ordinances will be provided by October 2009 and shall be reviewed, and updated as needed, each year of the Permit.	The Stormwater Manual includes the following: • Inspection report every 2 years • Inspection Certification submitted to City/County • 19 Structural BMP's to select from • 5 Non-Structural BMP's • Requirements to permit Proprietary Systems

E. Stormwater Management Program Requirements (Six Minimum Control Measures), cont

6. Pollution Prevention/Good Housekeeping for Municipal Operations

The permit requires the implementation of these BMPs prior to October 1, 2009. List all of the pollution prevention/good housekeeping for municipal operations BMPs as identified in the SMP and provide the requested information in the following table.

BMP ID Number	Brief BMP Description	Measurable Goal(s)	Progress on Achieving Goal(s) (Measured Result)
MCM 6A	**Municipal Industrial Compliance** Develop and implement an operation and maintenance program, which includes employee training, BMP's, and SWP3's to reduce or prevent stormwater pollution from municipal industrial operations including park and open space maintenance, fleet and building maintenance, new construction and land disturbances, and stormwater system maintenance.	Many programs are currently in place for stormwater pollution prevention at municipal facilities although not necessarily documented for this program. Current programs will be documented beginning in the fall of 2008. All municipal facilities will be evaluated and will have programs designed, implemented and completed by September 2009. A summary of these efforts will be provided in the Annual Report.	In 2013, City staff updated SWP3's for all Municipal Industrial Facilities, which are: *Central Maintenance Facility *West Substation *Northeast Substation *Brooks Landfill *Sewage Treatment Plant 1 *Sewage Treatment Plant 2 *Wichita Transit Center *K-96 & Hillside Reclamation Facility
MCM 6B	**Municipal Industrial Inspections** Stormwater pollution prevention inspections of municipal industrial facilities, noting potential sources of exposures and opportunities for improvements, will be conducted in coordination with identifying needed stormwater pollution prevention programs and training at municipal facilities	All municipal industrial facilities, with a stormwater NPDES Permit, will be inspected annually beginning in October 2009.	In 2013, City stormwater staff performed an inspection and training at each designated Municipal Industrial Facility. On-site City staff performs monthly inspections as required by the Stormwater Management Plan.
MCM 6C	**Street Sweeping Efforts** Continuation of existing street sweeping program to reduce pollutant loadings to the storm sewer.	Conduct two rounds of residential street sweeping, eight rounds of arterial street sweeping, and two rounds per week of downtown street sweeping will be completed annually by the City. This effort is currently underway, and will continue throughout the permit term.	In 2013, City staff swept 25,283 lane miles, completed 2 rounds of residential street sweeping, 5.5 rounds of arterial street sweeping, and 104 rounds of downtown street sweeping. This sweeping removed 10,025 tons of dirt and debris from City streets.

E. Stormwater Management Program Requirements (Six Minimum Control Measures), cont

BMP ID Number	Brief BMP Description	Measurable Goal(s)	Progress on Achieving Goal(s) (Measured Result)
MCM 6D	**Pesticide/Herbicide Application** The City has a program to ensure proper application of pesticides and herbicides are applied at municipal parks and properties. Some parks will be designated as a "Pesticide Free" property.	The City will continue the existing program that requires all City employed applicators of pesticides and/or herbicides to be licensed or directly supervised by licensed personnel. Records shall be maintained as required by local, state and federal laws for pesticide/herbicide application events and licensed personnel shall be trained periodically to ensure proper management and application of the pesticides and/or herbicides. A "Pesticide Free" Parks program shall be maintained for some parks and identified to the public through the City's website.	City staff includes 19 KS. Dept. of Agriculture certified applicators of pesticides and/or herbicides. Records are maintained by the Parks and Recreation Department as required by local, state and federal laws for pesticide/herbicide application events.
MCM 6E	**Stormwater Control Structures** Stormwater control structures will continue to be adequately identified, operated and maintained through a coordinated operations and maintenance program.	Control structures are already maintained in an ongoing maintenance program although not necessarily documented for this SMP. Current programs were documented beginning in the fall of 2008. A summary of the annual maintenance efforts will be provided in the Annual Report.	In 2013, City Stormwater staff: Installed 49 lf of conduit, Repaired 518 lf of conduit, Repaired 215 storm structures, Installed 0 structures, Replaced 265 structures. Located 193 structures.
MCM 6F	**Spill Response** The City will respond to spills of hazardous materials and solid wastes on to public roadways and private and public properties. City staff will ensure that discharged materials are cleaned up by the responsible parties and reported to local, state and federal officials.	All roadway and property spills of hazardous materials or solid wastes will be monitored and cleaned up by responsible parties. Spill notifications, cleanup actions and environmental impacts will be documented and provided in each Annual Report throughout the permit period.	In 2013, City Fire and Police Department responded to 165 incidents of released materials on public roadways and private property. None of these incidents resulted in the Fire Department removing the material by flushing with water.

F. Principal Pollutants of Concern (PPoC) Best Management Practices

The permit requires the implementation of these BMPs prior to October 1, 2009.

	Place mark in the appropriate box.		
	Yes	No	Not Applicable
1. Were any best management practices (BMPs) intended to attenuate the discharge of PPoC regulated pollutants implemented? See your permit to determine if TMDL regulated pollutants are listed for the receiving streams affected by your stormwater system.	☒	☐	☐
2. List all of the BMPs intended to attenuate the discharge of PPoC regulated pollutants as identified in the SMP and provide the requested information on the following table.			

F. Principal Pollutants of Concern (PPoC) Best Management Practices

BMP ID NUMBER	Brief BMP Description	Regulated TMDL Parameter	Measurable Goals(s)	Progress on Achieving Goal(s) (Measured Result)
PPoC 1A	**Citizen Outreach/Educational Materials**: The City will implement a public education program for the Principal Pollutants of Concern, (PPoC) that will include development of a message and distribution in the community. This message will be disseminated by use of the City's Cable Channel 7. This activity may take the form of a periodic repeating video presentation or graphic informing citizens of the importance of their activities regarding pollution prevention measures. Such information will highlight the PPoC's.	Biochemical oxygen demand, E. coli, total recoverable cadmium, total recoverable copper, and total recoverable zinc.	A new repeating video, obtained in January 2012, designed to inform the public on stormwater pollution prevention will be run at least twice per year on the City's Cable Channel 7, beginning in 2012. Presentations/messages and graphics will be documented along with the media used and its duration.	In 2013, the following stormwater information was disseminated via Cable Channel 7 and/or press releases. • Announcement of the 12th Annual River Trash Round Up. • To date, 4778 storm-inlet medallions 'No Dumping-Drains To Arkansas River' have been purchased, and 3253 have been installed. Installation will continue in 2014. • The EPA video 'Reduce Runoff', "After The Storm", and the locally produced 'Dog Doogity' video were aired over 100 times.
PPoC 1B	**Citizen Outreach/Educational Materials**: An informational brochure will be developed focusing on the five PPoC and stormwater quality for residents. This brochure will be used as a Water Utility bill insert.	Biochemical oxygen demand, E. coli, total recoverable cadmium, total recoverable copper, and total recoverable zinc.	A PPoC-focused brochure will be developed and provided to Water Utility users to reflect the increased priority of PPoC's and actions to prevent PPoC's into stormwater. Brochure will be mailed annually, beginning summer 2009.	In 2013, Stormwater contracted a firm to accomplish a public education program that will include new brochures, PSA's, and water bill inserts that address PPoC's and other pollution concerns. In 2014 those work products will be distributed.

F. Principal Pollutants of Concern (PPoC) Best Management Practices

PPoC 1C	**Citizen Outreach/Educational Materials**: Permittee will distribute stormwater education materials, that will highlight PPoC, through the City of Wichita website ("www.wichita.gov"). Such distribution may include direct distribution on the City web pages and/or may direct user to appropriate links to local, regional, and national websites.	Biochemical oxygen demand, E. coli, total recoverable cadmium, total recoverable copper, and total recoverable zinc.	Webpages will be designed and available highlighting the PPoC during the second year of the permit (2009) and continuing throughout the permit term. Webpages will be updated at least annually and will be copied and provided as attachments in the Annual Report. At least one informational document or website link will be added to the website for stormwater education and will be reported and documented in the Annual Report.	The City's website was revamped in 2013, and pollution prevention information is included and can be found at: http://www.wichita.gov/Government/Departments/PWU/Pages/Documents.aspx .
PPoC 1D	**Street Sweeping Program** The City will continue the existing street sweeping program to reduce pollutant loadings to the storm sewer.	Biochemical oxygen demand, E. coli, total recoverable cadmium, total recoverable copper, and total recoverable zinc.	Two rounds of residential street sweeping, eight rounds of arterial street sweeping, and two rounds per week of downtown street sweeping will be completed annually by the City. This effort is currently underway, and will continue throughout the permit term.	In 2013, City staff swept 25,283 lane miles, completed 2 rounds of residential street sweeping, 5.5 rounds of arterial street sweeping, and 104 rounds of downtown street sweeping. This sweeping removed 10,025 tons of dirt and debris from City streets.

PPoC 1E	**Education For NPDES Industries** An informational brochure for businesses and industries that have stormwater NPDES permits will be developed focusing on the five PPoC and stormwater quality. This brochure will be provided as mailer to the identified businesses and industries.	Biochemical oxygen demand, E. coli, total recoverable cadmium, total recoverable copper, and total recoverable zinc.	A PPoC-focused brochure will be developed and provided to local businesses and industries to reflect the increased priority of PPoC and actions to prevent PPoC into stormwater. Brochures will be mailed annually, beginning spring 2009.	A pollution prevention brochure targeted at businesses and industries has been completed and is undergoing distribution.

F. Principal Pollutants of Concern (PPoC) Best Management Practices

PPoC 1F	**Industrial Inspections** In an effort to ameliorate discharges of Primary Pollutants of Concern, the City will continue using an Industrial Inspection Program. At least 10 industries will be formally inspected each year to determine if NPDES permitted industrial activities are contributing to, or causing, illicit connections or pollutant discharges of PPoC or other contaminants to be discharged into the stormwater.	Biochemical oxygen demand, E. coli, total recoverable cadmium, total recoverable copper, and total recoverable zinc.	Ten industrial facilities will be inspected each year and the result summary will be included in submission of the Annual Report.	In 2013, City staff conducted Industrial Inspections at 13 facilities. Reports are attached. In 2012, 47 grocery store compactors/dumpsters were targeted for inspection/reinspection. In 2013, with the exception of one location, all of compactor/dumpster issues were resolved.

G. Recordkeeping and Reporting

Attach a report which addresses the following subjects:

1. A general assessment of the appropriateness of the various BMPs included for each of the major program elements as follows:
   a. TMDL regulated pollutants
   b. Public Education and Outreach
   c. Public Involvement and Participation
   d. Illicit Discharge Detection and Elimination
   e. Construction Site Stormwater Runoff Control
   f. Post-Construction Site Stormwater Management in New Development and Redevelopment
   g. Pollution Prevention/Good Housekeeping for Municipal Operations

Issues which may be addressed include:

   a. Are the BMPs appropriate for local population? *Bilingual information will be available when appropriate.*
   b. Are the BMPs appropriate for the pollution sources? *With little to no control over BMP's on private property, we feel Municipal BMP's are appropriate.*
   c. Are the specific concerns related to the local receiving waters that may justify a change in BMPs? *To be determined.*

2. An assessment of the effectiveness of the BMPs towards achieving the statutory goal of reducing the discharge of pollutants to the Maximum Extent Practicable (MEP).

   The general assessment of the community's stormwater sewers, in-town streams and rivers are being maintained in a pro-active manner that has resulted in a reduction of pollutants to the MS4 to the maximum extent practicable.

   For new development and redevelopment, the 2010 implementation of the county-wide Stormwater Manual and adoption of associated Ordinances will help achieve the goal of reducing the pollutants to the maximum extent practicable. The City has developed a program that inspects post-construction BMPs on a biennial basis to insure the BMPs are functioning as they were intended when the BMP design was approved. That program began implementation in December 2013 with inspection notices being sent to 15 developments notifying the owner that those inspections are due by January 15, 2014.

3. Provide a summary of results of information collected and analyzed, if any, during the reporting period used to assess the success of the SMP. If the MS4 has tested the stormwater entering a receiving stream or the water in the receiving stream, please provide the laboratory test results and a map showing the location of the sampling. Also, provide an explanation of the conditions under which the sample was taken (recent rainfall amounts and dates, estimated amount of stormwater running in the ditch (ditch barely running, quarter full, half full, full, overflowing,) and stream conditions (barely running, quarter full, half full, full, overflowing its banks) and any other conditions that may help characterize the situation at the time the samples were taken. An explanation as to why the sample was taken or what the permittee intended to show would be helpful in understanding the test results.

See Exhibit G3 attached.

G. Recordkeeping and Reporting, cont.

4. Provide a summary of the planned minor changes in stormwater activities to accomplish the SMP designated goals that are scheduled to be undertaken during the next annual reporting cycle. Examples would be emphasizing (or de-emphasizing but not elimination) of a significant action to accomplish a designate goal – for instance, changing the direction of public education from annual public meetings to education of school children.

There were two minor goals that were not fully completed.

- *TMDL 1C: In 2013, the City contracted a firm to develop brochures that address, among other concerns, TMDL's. In 2014, that scope of work will be expanded to include a traveling display addressing these pollutants at various environmental venues and events. This is discussed further in the next item.*

- *MCM 1B and PPoC 1B: Stormwater discontinued publication of billing insert due to citizen apathy towards water bill inserts. A new media plan began development in 2013, to include rebranding of Stormwater Management and the means used to present our message to the public. The Consultant has been hired and they are proceeding with rebranding that will produce a unified approach and message.*

5. Provide a list of proposed major changes to the SMP. This should be a list of major changes in direction for any of the designated goals of the SMP. It does not include the minor changes in stormwater activities (listed in item 4) being planned to accomplish a previously designated goal. Examples of a major change would be the implementation of new BMPs and/or the deletion of a BMP. Include a projected schedule for the month or quarter when the BMP will be either implemented or discontinued.

- *No major changes occurred in 2013.*

Stormwater management is, and will continue to be, a dynamic process with changes in priorities, technology, and techniques. The City of Wichita and, The Department of Public Works & Utilities in particular, strive to administer the most effective and functional program possible. In working towards that goal, we evaluate and if appropriate, will implement changes we believe will have strong positive impacts on water quality in the Wichita area.
As part of this Executive Summary for 2013, the City will present some considerations that will lead towards that goal of enhanced water quality.

In an effort exceeding Permit requirements, the City has undertaken sampling upstream at all 8 sites, four times per year. The additional sampling started in 2010, and was fully implemented throughout 2013. Additionally, in 2013, the City exceeds requirements by adding sampling at four (4) open-channel sites; Gypsum Creek, Dry Creek, Pawnee, and Westlink. The data that is collected will allow for more accurate characterization of receiving waters prior to stormwater inflow.

G. Recordkeeping and Reporting, contd.

The current NPDES Permit expired September 30, 2012. Communication from KDHE on March 6, 2013 states that the Permit renewal application has been received, and the City is to continue to operate under the existing Permit until further notice.

6. Provide a list of other municipalities/contractors, if any, which will be responsible for implementing any of the program areas of the SMP.

Integrated Solutions Inc., is contracted to collect wet weather samples, CAS Labs is contracted to analyze those samples.

H. Certification

"I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations."

2013 ANNUAL REPORT
WICHITA NPDES MUNICIPAL STORMWATER PERMIT
Permit # M-AR94-SO01

Section B. Executive Summary

Submitted herein is the City of Wichita Annual NPDES Stormwater Permit Report for the 2013 reporting year. The report was prepared in compliance with the City of Wichita's NPDES Stormwater Permit, Kansas Permit #MAR94-S001, Federal Permit #KS0091049.

The City was issued a revised NPDES permit effective October 1, 2007. One of the requirements of the Permit was to develop, submit and implement a City Stormwater Management Plan (SMP). This Plan was completed and presented to the public for review and comment in September 2008. In 2013, the SMP remained posted on the City's website for public review, and we received no comments.

Working Groups:

- **The City of Wichita and Sedgwick County submitted a Water Restoration And Protection Strategy (WRAPS) http://www.wichitawraps.org** funding request to KDHE in 2006. KDHE authorized funding in 2007 for the Development Phase. In early 2010, the project was completed and the final report was delivered to KDHE. Moving forward, the RiverCity WRAPS group, in conjunction with the City, began the Assessment and Planning Phase for the Lower Arkansas River watershed. This RFP was released in December 2010, and bids were received in January of 2011. This project progressed throughout 2013, and the Final 9 Element Plan was accepted by KDHE and EPA. Also in 2013, the Grant Application for the Implementation Phase was successful, and the City is currently in the process of finalizing preparation to begin the Implementation Phase. The locally produced educational video "Dog Doogity", which addresses pet waste cleanup, has been incorporated into the EPA Nonpoint Source (NPS) Outreach Toolbox. **http://cfpub.epa.gov/npstbx**

- **The Sedgwick County Stormwater Management Advisory Board (SMAB) http://www.sedgwickcounty.org/public_works/stormwater_management.asp** is chartered "To protect lives and property within Sedgwick County by promoting better stormwater management and providing financial, technical and other assistance to all entities within Sedgwick County that are concerned with stormwater management." The Board's contribution has helped shape uniform drainage criteria for Sedgwick County through the Stormwater Manual and updated ordinances.
  The member's background includes consulting engineers and local government officials with experience in environmental and engineering responsibilities. The final draft of the Wichita/Sedgwick County Stormwater Manual was released in November 2010, and is currently being used as guidance for water quality issues arising from development and redevelopment. In August 2011, the Manual was adopted and made available to the Public, and continues to be used. SMAB meets on the first Wednesday of every month.

- **The Wichita Stormwater Advisory Board (SWAB) http://www.wichita.gov/Government/Departments/PWU/Pages/SWAB-Board.aspx** is a very similar Board and its main purpose is to take recommendations from the development industry to City staff and City Council related to the adoption and revisions to the Stormwater Manual and Chapter 16.32 of the City Code entitled 'Stormwater Pollution Prevention Ordinance'. The Manual undergoes periodic fine-tuning, and is updated on the City's website. SWAB meets on the third Friday of every month.

Projects: The City has implemented or completed design work on demonstration projects that will be used to evaluate stormwater permanent best management practices. These include:

- **Meridian Outfall to the Arkansas River is undergoing a $6.5 million reconstruction.** This gravity stormwater collector will house a $710,000 debris removal structure, and function as a separator connected to a 10' x 8' reinforced concrete box culvert. Prior to discharge into the Arkansas River, this structure will treat runoff from a 661 acre area of southwest Wichita. The amount of trash and pollutants removed will be measured to determine annual pollution removed.

- **Rain Garden at North High School**. This area discharges directly to the Little Arkansas River and is located on the western edge of the parking lot at North High School on 13th Street. The rain garden was completed in the Fall of 2012. Native grasses, flowers, and plants were planted in an area that collects rain water drainage from the surrounding parking area. Informative, educational signage was completed in 2013.

- **Storm Drain Markers have been installed since 2011.** The markers bear the message "No Dumping-Drains To The Arkansas River". In 2013, an additional 2478 markers, including 300 in Spanish, were purchased. Since 2011, 4778 markers have been purchased, and 3253 markers have been installed. Installation will continue in 2014.

- **No Mow Zone.** The City undertook a pilot-project to establish 'no mow zone' streamside grass buffer strips on Gypsum Creek. The grass buffer area consisted of both banks along 4000 feet of stream. Based on the results of surveys that were taken, the project met with mixed opinions from neighboring residents, with flooding and vermin being the primary concerns. The buffers were mowed down in December, and it has not yet been determined if another attempt will take place in 2014.

- **Drainage and Water Quality 'Hot Spots'** is an ongoing funding mechanism that allows the City to quickly locate, assess, and remedy trouble spots within our system, while avoiding the usual, and lengthy, RFP bidding system. In 2013, this flexibility allowed the City to rapidly make improvements at approximately 5 locations at a total cost of over $550,000.

- **Stream Channel Stabilization and Maintenance** is achieved by City crews cleaning and repairing local waterways that resulted in over 19,358 cubic yards of earthen repair, 24,775 cubic yards of tree/brush/vegetation removal, and 3,395 cubic yards of trash removal. In 2012, the City purchased a Kinkaid 750 Hydro-Seeder to assist in stabilizing disturbed stream banks immediately following routine maintenance. The hydro-mulch will improve the chance for seed germination by holding in the moisture included in the mulch, resulting in banks stabilized at a faster rate than prior practices. In 2013, 264 bags of mulch were applied to 14.5 acres.

- **Permanent Post Construction BMP Inspection**. December 2013 marked the first time that bi-annual inspections were due for permanent post construction BMP's that were installed in 2011. Inspection notices were sent to 15 developments notifying the owner that those inspections are due by January 15, 2014.

- **Arkansas River Tire Removal.** On July 24, 2013 Flood Control personnel removed more than 100 tires from the Arkansas River near 47th Street South.

This report provides a summary of the City of Wichita's Stormwater Management Program for the year 2013, Wichita's fifteenth year of operation under the NPDES Stormwater Discharge Permit Program, and the sixth year operating under the 2007 revised permit. The activities included in the attached report were tabulated from actions performed in the calendar year 2013. The City applied for, and received, a Permit extension to continue to operate per the 2007 MS4 Permit, KDHE has acknowledged that extension.

The City has complied with the provisions of the Permit, which includes a summary of all activities designated in the Permit requirements. A complete record of all activities shall be maintained by the Stormwater Management Division of the Public Works & Utilities Department, and is available for review on site. If you have questions concerning anything in this report, please contact:

Subject: Continuation of the NPDES MS4 Permit

Scott;

This follows our conversation earlier today regarding the Wichita permit. I have attached a document which address the continued operation under the present permit. If you have further questions, please do not hesitate to contact me.

Best Regards,

Rance Walker, P.E.

E-Mail: rcwalker@kdheks.gov

An explanation of how continued operation under the previously issued permit is addressed within PART IX. STANDARD CONDITONS of your MS4 permit, on page 12, item B.

KDHE is in receipt of the renewal application and considers it acceptable for the City of Wichita to continue to operate under the expired permit until such time as this Department reissues the new permit.

This concept of continuation of an expiring permit is rooted in the federal regulation 40 CFR 122.6(4)(d) which is repeated in part as follows:

> (d) State continuation. (1) An EPA-issued permit does not continue in force beyond its expiration date under Federal law if at that time a State is the permitting authority. States authorized to administer the NPDES program may continue either EPA or State-issued permits until the effective date of the new permits, if State law allows. Otherwise, the facility or activity is operating without a permit from the time of expiration of the old permit to the effective date of the State-issued new permit.

KDHE has been delegated the responsibility of administering the NPDES program in Kansas and this agency abides by the continuation of permit requirements addressed in the federal regulation cited above.

The state law that allows authority to continue permits (K.S.A. 77-155) is repeated in part as follows:

> (d) If a timely and sufficient application has been made for renewal of a license with reference to any activity of a continuing nature, the existing license does not expire until the state agency has taken final action upon the application for renewal or, if the state agency's action is unfavorable, until the last day for seeking judicial review of the state agency's action or a later date fixed by the reviewing court.

Please note a license and a permit are considered equivalent.

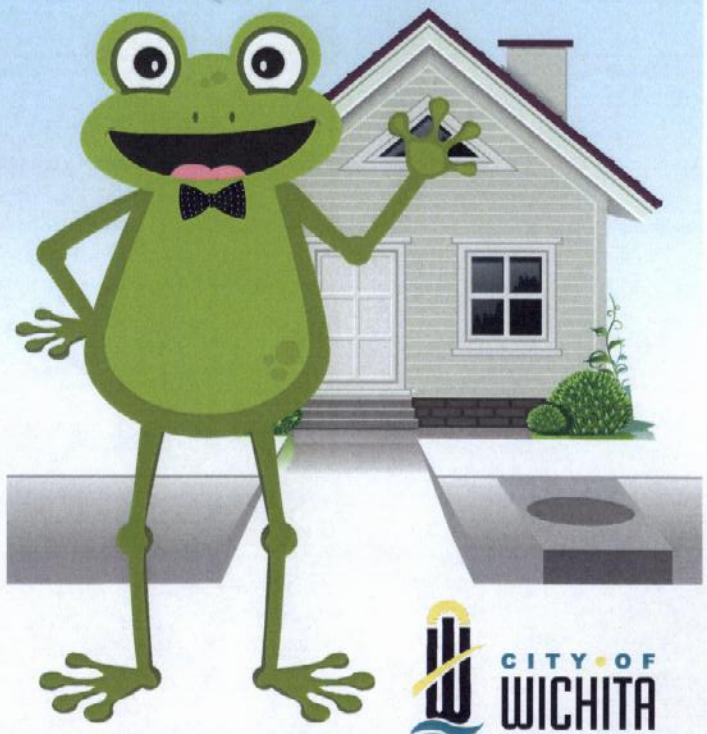
CLEAN WATER BEGINS AT HOME.

Many pollutants around our homes are washed down the storm drains directly into our waterways. The same waterways our children swim in and explore.

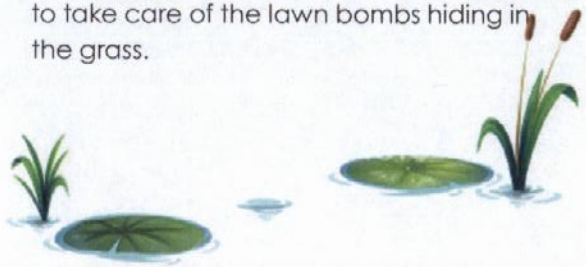


CITY OF WICHITA
WWW.WICHITA.GOV

TAKING CARE OF YOUR HOME, HELPS TAKE CARE OF MINE.

Here are a few things you can do to make sure both our homes stay clean and tidy.

- Turn your yard waste into compost or mulch for your garden.
- Use proper dosage when treating your lawn and avoid overwatering to prevent runoff.
- Mow grass without a lawnmower bag and leave clippings to naturally decompose. Don't worry, this will not produce thatch.
- Plant in bare spots in your yard, it looks better and helps prevent runoff and erosion.
- Dispose of used fluids properly when working on your car.
- Pick up pet waste and dispose of it properly through your garbage service. If you've got a garden shovel and plastic baggie, you've already got what it takes to take care of the lawn bombs hiding in the grass.



HOW BAD CAN IT BE? LET ME TELL YOU!

- Many household products can poison fish and other water animals. Please dispose of them properly, for my sake.
- Pet waste is a major contributor to harmful bacteria that makes activities like swimming, boating and fishing unsafe. It can also cause diseases in humans and other animals.
- Sediment destroys living habitats making it difficult for plants to grow, while also creating more problems with cloudy water and erosion.
- Fertilizer and lawn clippings can create unsightly algae that are harmful to water animals.
- Debris such as plastics, bottles, and cigarette butts can injure and sometimes kill fish and other wildlife...like me!

DON'T FORGET!

Never pour your household chemicals, cleaners or solvents into the storm drain. It's toxic to aquatic life like me and is also illegal. Please make sure to properly dispose of hazardous substances such as the ones listed below:

- Pesticides, herbicides and garden chemicals
- Paint, aerosols, batteries
- Household cleaners, fluorescent bulbs and propane

These substances may be taken to:

Sedgwick County Household Hazardous Waste Facility
801 Stillwell St. Wichita | (316) 660-7458
sedgwickcounty.org

SO WHERE DO YOU DISPOSE OF AUTOMOTIVE HAZARDOUS WASTE?

Most automotive service centers and automotive parts stores offer free recycling of used automotive fluids, such as oil, antifreeze, solvents and brake fluid. Check to see if your local store offers this free service. Also, free recycling of automotive fluids is available at the Sedgwick County Household Hazardous Waste Facility; see details above!

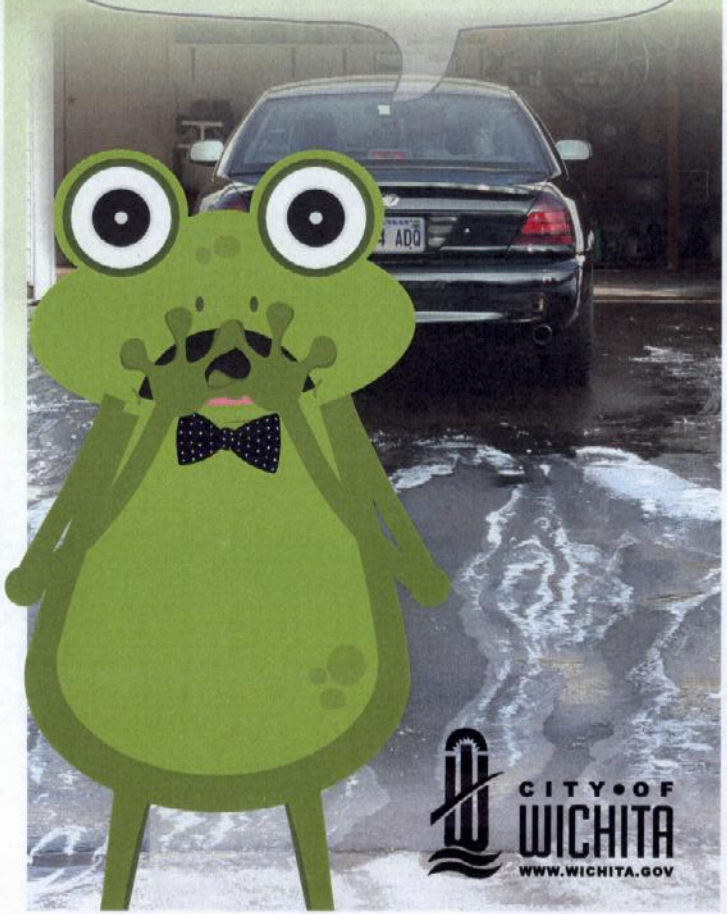
DON'T LET YOUR HOME BECOME HAZARDOUS TO MINE!

Storm drains don't have filters like in-home plumbing systems! Please don't let your mess become my family's problem.



CITY OF WICHITA
WWW.WICHITA.GOV

WHAT IS HOUSEHOLD STORMWATER POLLUTION?

Many products found in homes contain chemicals that can be harmful to the environment. When rain washes those contaminants down surfaces such as driveways, parking lots and roads, they often flow into storm drains and into our local waterways. Please make sure to dispose of these chemicals properly.

KEEP AN EYE OUT!

Some contaminants include:

- Dish soap (washing vehicles)
- Auto grime
- Pet waste
- Cigarette butts

CLEAN UP YOUR MESS!

Many of us choose to perform maintenance on our vehicles at home rather than visit an auto repair service center. While the actual maintenance work is not a problem, the byproducts can send significant amounts of pollutants into storm sewer systems.

DID YOU KNOW?

- Your car alone contains one highly volatile, two corrosive, and six flammable hazardous products, all of which are TOXIC!
- 47% of U.S. waters surveyed are unfit for uses like swimming, fishing or drinking.*
- Stormwater is the leading cause of water pollution, NOT industrial dumping.
- Stormwater is not treated; only sanitary sewer water from toilets, showers and sinks is treated.

*National EPA Study

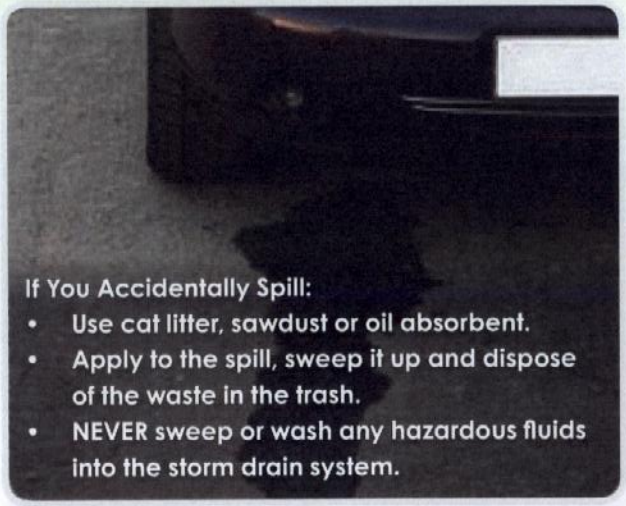
IT'S OK IF YOU SPILL. ACCIDENTS HAPPEN!

LET ME SHOW YOU THE PROPER WAY TO CLEAN UP. HERE ARE TIPS FOR CHANGING YOUR OIL AND OTHER FLUIDS:

- **FUNNELS**
  Use funnels or pumps when handling liquid products or waste to avoid spills.

- **DRIP PAN**
  Capture vehicle fluids in separate drip pan or container.

- **OIL FILTERS**
  Drain and recycle used oil filters. Poke holes in your filter and let it drain into your oil pan for several hours before recycling.



If You Accidentally Spill:

- **Use cat litter, sawdust or oil absorbent.**
- **Apply to the spill, sweep it up and dispose of the waste in the trash.**
- **NEVER sweep or wash any hazardous fluids into the storm drain system.**

ACCIDENTS HAPPEN, BE PREPARED!

- Have a plan & communicate it to employees
- Keep a spill kit and communicate its use and location to employees

SUGGESTED LIST OF SPILL-KIT CONTENTS:

- Sorbent booms
- Kitty litter
- Sorbent pads
- Plastic sheeting (for drain cover)
- Garbage bags and zip ties
- Acid/base neutralizer
- Safety gloves and goggles

LET'S AGREE NOT TO MERGE

Avoiding a merger between your business and my local waterways is in our community's best interest!

TAKING CARE OF YOUR BUSINESS, CAN ALSO HELP TAKE CARE OF MINE!

Please help! Here are a few simple ways you can avoid an unintended hostile takeover of my local waterways.

- **COVER**

Cover outdoor work and storage areas.

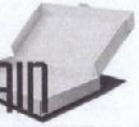
- **CAPTURE**

Capture fluids immediately. You may be surprised at how far and quickly they can travel!

- **CLEAN**

Clean up spills before they reach the drain using absorbents rather than a hose to reduce the risk chemicals running down the drain.

- **CONTAIN**



Use simple methods to safeguard unintended leaks from spreading.

PERFORM A POND FRIENDLY AUDIT

(AND AVOID AN UNINTENDED HOSTILE TAKEOVER OF MY POND!)

DUMPSTERS AND GREASE STORAGE:

- Sweep trash and litter from around the dumpster regularly.
- Place dumpsters on a flat concrete surface that does not slope or drain.
- Keep dumpster and waste container covers closed.
- Install a secondary containment system such as a berm or curb around the dumpster.
- Place clear and visible signs on dumpsters indicating which kind of waste can be accepted.
- Never use bleach or soap to clean your dumpster and grease storage containers unless the wash water is being disposed of properly.
- Repair leaking or damaged dumpsters immediately.

STREET, DRIVEWAY, PARKING LOT & SIDEWALKS:

- Regularly sweep paved areas instead of hosing them down.
- Inspect and clean gutters, drains and catch basins.

LOADING DOCKS AND STORAGE AREAS:

- Limit exposure of materials to rainwater.
- Regularly check loading and unloading equipment for leaks.
- Regularly dry-sweep loading areas.
- Placed stored chemicals and waste materials in a secondary containment to catch any leaks.

STORAGE TANKS AND FUELING AREAS:

- Provide secondary containment around fuel storage and waste tanks.
- Cover fueling areas to prevent exposure to storm water.
- Develop a spill incident response plan.
- Train employees in proper fueling techniques and spill responses.
- Clearly post emergency phone numbers.
- Regularly maintain and inspect tanks and transfer equipment.

MCM 3E	**Storm System Map** The City has already prepared a current and complete storm sewer collection system map in accordance with the KDHE NPDES permit requirements. An updated GIS storm sewer system map is currently being prepared.	Permittee has contracted for the development of a electronic geo-database of the storm sewer collection system. Due to the City's large system, this program will need to be implemented in phases. The system will include specifications identified by the current KDHE NPDES Permit.	By the end of 2012, ~~64,811~~ 67,397 stormwater structures and ~~1,047~~ 1,214 miles of conduit have been collected on a GIS layer. The City has been inventorying since 2007, and is ~~100%~~ complete as of 2012. The project is now continuing to collect new projects and ~~is also being reviewed for~~ reviewing for quality control, and collecting the open channel drainage systems.
MCM 3H	**Training of Businesses and Industries** The City will either provide training for, or work in conjunction with, organizations to ensure businesses and industries are trained in stormwater pollution prevention best management practices and local, state and federal regulations and ordinances.	The City has provided periodic training and BMP discussions to area business regarding stormwater pollution prevention and BMP's. The City will conduct one annual training program for area businesses to ensure compliance with this Program. Results will be reported in the Annual Report.	On Feb 8th, the City hosted Stormwater Manual training at the local ASCE meeting, which drew 51 participants. On Feb. 23rd, The City hosted a Stormwater Pond Management Design, Operations & Maintenance webinar that drew 31 participants. On May 7th and 8th, The City co-hosted the International Erosion Control Association Workshop, which had 50 participants. 7 Brochures SWPPP
MCM 6E	**Stormwater Control Structures** Stormwater control structures will continue to be adequately identified, operated and maintained through a coordinated operations and maintenance program.	Control structures are already maintained in an ongoing maintenance program although not necessarily documented for this SMP. Current programs were documented beginning in the fall of 2008. A summary of the annual maintenance efforts will be provided in the Annual Report.	In 2012, City Stormwater staff: Installed ~~2,410~~ 49 lf of conduit. Repaired ~~100~~ 518 lf of conduit. Repaired ~~1,295~~ 265 storm structures. Installed 0 structures. Replaced ~~45~~ 265 structures. Located 193 structures

Newton, Clean20 June alternative concepts of regional BMP's vs Site Specific BMP's KDHE approval approx 30 attendees

To: Lindebak, Scott
Subject: 2013 NPDES Report Data SWM

The following is a listing of data needed from the Stormwater Management Division. The areas in red are what needs to be updated. Feel free to edit the numbers inside the text box, but I ask that you turn them to black so that I will know they are updated 2013 numbers.

MCM 3B	**Televise Storm Sewer Lines** The City will continue to televise storm sewer pipe to identify illicit connections or discharges.	Each permit year the City will televise 45,000 linear feet of storm sewer pipe in an effort to find illicit connections or discharges. Any illicit discharges found will be investigated with actions documented. The amount of storm sewer televised will be reported in the Annual Report with a summary of results included.	2013 53,364 In ~~2012~~ City staff televised ~~84,504~~ linear feet of storm sewer line, and ~~447,403~~ 745,208 linear feet of line were cleaned. No illicit connections were reported.

MCM 3D	**Storm Inlet Inspection** A City program of systematic inlet inspections and cleaning, including visual observations for illicit discharges will be continued.	Permittee will perform at least 30,000 catch basin cleanings each year. This effort is currently underway and inspection frequency will be reviewed each permit year for planning of the next year's cleaning schedule. In the third quarter of the 3rd year of permit coverage a new plan will be established for years 4 and 5 to take any new factors including new equipment into consideration.	100,689 In 20~~12~~13, City staff cleaned ~~78,052~~ storm structures, and inspected ~~362~~ 2,270 storm structures.

Todd,

Please provide Jim and I an update to the number of medallions remaining in your possession, if any.

How may have you installed in 2013?

Subject: RE: 2013 Inlet Medallions

Jim
I have the following medallions:

1. Drains to River 400 medallions
2. Drains to Stream 424 medallions
3. Drains to Creek 699 Medallions

These are the only Medallions that I am in possession of.
Todd Mitchell would have any others that might not be installed yet. You will need to contact him and get those totals.
He is not here today and Dave would not let me talk to Miguel to see if he could answer as to where they might be.

Can I get an update on 2013 numbers.

- **Drainage and Water Quality 'Hot Spots'** is an ongoing funding mechanism that allows the City to quickly locate, assess, and remedy trouble spots within our system, while avoiding the usual, and lengthy, RFP bidding system. In 2012, this flexibility allowed the City to rapidly make improvements at approximately 5 locations at a total cost of over $650,000.

Subject: 2013 NPDES Construction Site Inpections

TMDL 1 F	**Construction Site Inspections** The City will use the current program of construction site inspections to target construction activities within the four listed watersheds.	Total nitrogen, biochemical oxygen demand pollutants, suspended solids, and bacteria.	Beginning October 2008, the City will identify and target those construction or redevelopment projects having BMPs that are within close proximity to one of the four associated designated streams or rivers. The City will initially inspect within 30 days of the project start date. This effort will continue throughout the permit term.	In 2012, 47 City personnel oversaw BMP implementation on 93 publicly bid City construction projects budgeted at $53 million. The engineers, who have received BMP training, have inspected the projects within 30 days of construction start date. Sites continue to be monitored daily throughout the duration of construction.

Tyler, below is a more specific information request for activities in 2013. The items in red are from the 2012 report, and I'm looking for an update for 2013. Feel free to include any additional type of stormwater pollution messages, e.g. videos, press releases, etc.
Let me know if you have questions,

Jim

BMP ID Number	Brief BMP Description	Measurable Goal(s)	Progress on A
MCM 1A	**Citizen Outreach/Educational Materials**: Video messages and graphics will be developed by the City for use on the City's Cable Channel 7 or other video outlets for community distribution. This activity will take the form of periodic repeating video pre-sentations or graphics informing citizens of the importance of preventing stormwater pollution and individual actions citizens can take to reduce their impact on stormwater.	A new repeating video, obtained in January 2012, designed to inform the public on stormwater pollution prevention will be run at least twice per year on the City's Cable Channel 7, beginning in 2012. Presentations/messages and graphics will be documented along with the media used and its duration.	In 2012, the followir disseminated via C releases. • Press release i educational pro County. • Announcement Round Up. • To date, 4778 s Dumping-Drain purchased, and Installation will • The EPA video produced 'Dog 100 times.

Subject: RE: 2012 NPDES Information Request- City Managers Office

Other projects included Dog Doogity and This is Our City, Help Keep it Pretty an anti-littering psa. These both run hundreds of times and maybe even thousands. I can't give an exact number because they are in our general rotation and play in a continuous loop. There were also some April Burn Ban News Conferences and PSAs that we ran. I'm not sure if that is what you are looking for.

To: Schiffelbein, Tyler
Subject: RE: 2012 NPDES Information Request- City Managers Office

I believe that EPA video is called "Reduce Runoff". Are there other environmental educational messages that were ran? Perhaps, pick up after your pets, or don't litter....those types of messages?
If so, what were they, and how many times did they air?

From: Schiffelbein, Tyler
Sent: Tuesday, January 08, 2013 1:53 PM
To: Hardesty, James
Subject: RE: 2012 NPDES Information Request- City Managers Office

I know we ran a video about stormwater runoff that was given to us by the EPA. It probably ran about 50-70 times. That is the only thing that we ran.

Greetings,

The time has come again to compile information for the City's Annual Stormwater National Pollutant Discharge Elimination System (NPDES) Report. The Stormwater Management Division is responsible for putting together the 2012 report. Therefore, please send all pertinent information regarding your 2012 activities to Jim Hardesty at JHardesty@wichita.gov.

In order to prepare and submit this report by the regulatory deadline, we will need your information on or before January 31, 2013.

In addition, I have listed below important information that will be needed from each department that has historically been involved with the Stormwater NPDES Annual Report and process. The information needed is as follows:

City Manager's Office:

- Any publications, news releases, or responses to the media concerning stormwater inspection, compliance, educational programs, proper use of pesticides and fertilizers, reporting of illicit discharges, and the improper disposal of hazardous materials.
- Any environmental education, stormwater in particular, that was disseminated via City 7.

Please feel free to contact me with any questions, and thank you in advance for your effort,

Jim Hardesty

Greetings,

The time has come again to compile information for the City's Annual Stormwater National Pollutant Discharge Elimination System (NPDES) Report. The Stormwater Management Division is responsible for putting together the 2012 report. Therefore, please send all pertinent information regarding your 2012 activities to Jim Hardesty at JHardesty@wichita.gov.

In order to prepare and submit this report by the regulatory deadline, we will need your information on or before January 31, 2013.

In addition, I have listed below important information that will be needed from each department that has historically been involved with the Stormwater NPDES Annual Report and process. The information needed is as follows:

Environmental Services Division:

Randy Owen – Air Quality Supervisor

- Copies of all 2012 Haz-Mat Incident Reports

Kay Drennen – Environmental Services, Education

- A summary and description of all public education programs conducted concerning stormwater pollution. This should include information regarding: talks or presentations given to schools, civic organizations, churches, trade shows, and displays made and presented at special community events, listing of the various types of educational material/brochures that were use or handed out, the approximate number distributed, and the approximate number of people that were in attendance for each event as well as the date or month the event occurred.
- A report documenting any educational and training efforts for industrial site operators.
- Samples of educational materials/brochures handed out or used during the educational events.
- Documentation of any educational programs undertaken on the proper use of pesticides and fertilizers.
- Documentation of any public education programs for the reporting of illicit discharges and the improper disposal of non-stormwater items in the storm sewer system.

Becky Lewis – Environmental Compliance Manager

A summary of permit and inspection activities for onsite wastewater and sewage systems in the City of Wichita is needed. This should include the following:

- The number of applications for permit of onsite wastewater and sewage systems that were reviewed and approved.
- The number of onsite wastewater and sewage systems inspections that were conducted.
- The number of private onsite wastewater and sewage systems that were evaluated for change of ownership transactions.
- Review of any unsewered areas of the City for possible sanitary sewer connection including those that resulted in an order in or benefit district voluntarily connecting.
- The number of onsite wastewater and sewage systems brought into compliance through complaint investigation and the resulting details.
- A summary of any work to local ordinances in 2012 that have improved or will improve the use onsite wastewater and sewage systems.
- Any other water quality activities that would have an impact on stormwater related issues (e.g., the number of times water quality staff provided technical assistance by phone or other, and etc.)

Laura Quick- Food Program Supervisor

- Restaurant grease interceptor inspections, violations issued, percentage of interceptor pump outs, and variances.

Please feel free to contact me with any questions, and thank you in advance for your effort,

Subject: 2012 NPDES Information Request- Environmental Services

Greetings,

The time has come again to compile information for the City's Annual Stormwater National Pollutant Discharge Elimination System (NPDES) Report. The Stormwater Management Division is responsible for putting together the 2012 report. Therefore, please send all pertinent information regarding your 2012 activities to Jim Hardesty at JHardesty@wichita.gov.

In order to prepare and submit this report by the regulatory deadline, we will need your information on or before January 31, 2013.

In addition, I have listed below important information that will be needed from each department that has historically been involved with the Stormwater NPDES Annual Report and process. The information needed is as follows:

Environmental Services Division:

Randy Owen – Air Quality Supervisor

- Copies of all 2012 Haz-Mat Incident Reports

Kay Drennen – Environmental Services, Education

- A summary and description of all public education programs conducted concerning stormwater pollution. This should include information regarding: talks or presentations given to schools, civic organizations, churches, trade shows, and displays made and presented at special community events, listing of the various types of educational material/brochures that were use or handed out, the approximate number distributed, and the approximate number of people that were in attendance for each event as well as the date or month the event occurred.
- A report documenting any educational and training efforts for industrial site operators.
- Samples of educational materials/brochures handed out or used during the educational events.
- Documentation of any educational programs undertaken on the proper use of pesticides and fertilizers.
- Documentation of any public education programs for the reporting of illicit discharges and the improper disposal of non-stormwater items in the storm sewer system.

Becky Lewis – Environmental Compliance Manager

A summary of permit and inspection activities for onsite wastewater and sewage systems in the City of Wichita is needed. This should include the following:

- The number of applications for permit of onsite wastewater and sewage systems that were reviewed and approved.
- The number of onsite wastewater and sewage systems inspections that were conducted.

- The number of private onsite wastewater and sewage systems that were evaluated for change of ownership transactions.
- Review of any unsewered areas of the City for possible sanitary sewer connection including those that resulted in an order in or benefit district voluntarily connecting.
- The number of onsite wastewater and sewage systems brought into compliance through complaint investigation and the resulting details.
- A summary of any work to local ordinances in 2012 that have improved or will improve the use onsite wastewater and sewage systems.
- Any other water quality activities that would have an impact on stormwater related issues (e.g., the number of times water quality staff provided technical assistance by phone or other, and etc.)

Laura Quick- Food Program Supervisor

- Restaurant grease interceptor inspections, violations issued, percentage of interceptor pump outs, and variances.

Please feel free to contact me with any questions, and thank you in advance for your effort,

Jim Hardesty

Greetings,

The time has come again to compile information for the City's Annual Stormwater National Pollutant Discharge Elimination System (NPDES) Report. The Stormwater Management Division is responsible for putting together the 2012 report. Therefore, please send all pertinent information regarding your 2012 activities to Jim Hardesty at JHardesty@wichita.gov.

In order to prepare and submit this report by the regulatory deadline, we will need your information on or before January 31, 2013.

In addition, I have listed below important information that will be needed from each department that has historically been involved with the Stormwater NPDES Annual Report and process. The information needed is as follows:

Public Works & Utilities:

Maintenance Division:

Aaron Henning P.E. - Maintenance Engineer

- Total miles of streets swept in 2012, and tonnage removed.
- Documentation of any studies that were done concerning alternatives to City standard deicing and sanding methods.
- Documentation of efforts made to cleanup and properly maintain City maintenance yards

Please feel free to contact me with any questions, and thank you in advance for your effort,

CITY OF WICHITA

INTEROFFICE MEMORANDUM

TO: James Hardesty, Water Quality Specialist

FROM: Aaron Henning, Maintenance Engineer

SUBJECT: 2013 NPDES Year-End Report

DATE: February 1, 2014

The following is a summary of Maintenance Division NPDES activities for 2013. The activities included:

Activity	2013 Goal	2013 Actual
Total Lane Miles Swept (Streets Only)	N/A	25,283 lane miles
Residential Street Sweeping	2 rounds	Neighborhoods with dense vegetation and heavy debris: **1.3 rounds** Neighborhoods with moderate vegetation and debris: **2 rounds** New subdivisions with limited vegetation and debris: **1 round**
Arterial Street Sweeping	8 rounds	5.5 rounds
Core Area Sweeping	2 rounds per week	104 rounds
Total Tonnage Removed	N/A	10,025 tons (per Brooks Landfill records)

During 2013, the Maintenance Division continued the following activities, which serve to further enhance the quality of storm water runoff:

- Maintenance facilities (CMF, Northeast Substation, and West Substation) were swept once each month during 2013. A scheduled program is followed to ensure equipment is moved out of the way and all areas are swept with each round.
- Salt storage facilities inspections at the CMF, West Substation, and Northeast Substation continue to be conducted on a regular basis.
- The application of salt brine as pre-treatment on streets and bridges continues to be a standard practice for snow and ice removal. Salt brine is applied to reduce the application rates of dry salt and sand. The brine adheres to the surface instead of running off and serves to prevent the bonding of snow and ice. Consequently, less material is required to treat and prevent them from becoming hazardous.
- The division has continued its practice of pre-wetting material when treating for snow and ice. The treatment serves to mitigate scatter, thereby reducing material application rates, while improving overall effectiveness and efficiency.

Jim:

The City of Wichita de-annexed the Furley property in 2012, so the land area within the city limits actually decreased in 2012 by 441.68 acres (0.69 square miles). I'm still waiting on County GIS to load the last annexation approved in 2012 before I can do a PDF map.

KANSAS DEPARTMENT OF HEALTH AND ENVIRONMENT
WASTEWATER INCIDENT REPORT FORM

Definitions are available at http://www.kdheks.gov/water/tech.html

Collection System Bypass ☒ | In-Plant Diversion ☐ | Upset ☐ | In-Plant Flow Through ☐ | Spill ☐

1. FACILITY NAME: City of Wichita Sewer Maintenance Kansas Permit # M-AR94-IO01
2. Within 24 hours of discovery, notify the KDHE Central Office (email – cseeds@kdheks.gov), (fax 785.296.0086), (telephone 785.296.5517) or your local KDHE district office. Written notification is required within 5 days of discovery. If the incident is not corrected within 5 days, send a written notification to KDHE indicating the status. This form is to be sent to KDHE when the incident ends.

KDHE Person Contacted: John Goetz Date: 1/11/13 Time: 4:23 pm

3. Date Incident Discovered: 1/11/13 Time: 1:30 pm
4. Date Incident Ended: 1/11/13 Time: 2:55 pm
5. Total estimated gallons bypassed, spilled, or routed through failed equipment for all locations on this form: ~100
6. If rainfall induced event, approximate inches of rainfall

If multiple locations listed below due to rain event, check here ☐

7. Incident Location: (check all that apply)
   - ☐ Plant
   - ☐ Lift/Pump Station
   - ☐ Peak Flow Basin
   - ☒ Manhole(s)
   - ☐ City Collection Line (Line Break / Joint)
   - ☐ Private Sewer Line
   - ☐ Basement
   - ☐ Other (specify below)

Identify **All** Incident Locations by Name, Street Address or Manhole Number as appropriate.
Overflow from manhole 5744-570 near 2859 S Davidson.

8. Cause of Incident:
   - ☐ Intentional Bypass for Repair/Construction
   - ☐ Excessive Rainfall, Snow Melt
   - ☐ Unplanned Construction Related Break
   - ☐ City Line Break (Not Construction Related)
   - ☒ City Line Blockage
   - ☐ Private Line Break
   - ☐ Private Line Blockage
   - ☐ Lagoon High Level
   - ☐ Equipment Failure
   - ☐ Control System Failure
   - ☐ Power Related Failure
   - ☐ Operations Related Failure
   - ☐ Maintenance Related Failure
   - ☐ Vandalism
   - ☐ Other

Additional explanation of reason for Incident: (use additional page if necessary)
Blockage in City sewer. Initial cause thought to be of grease and paper.

9. Corrective Action, if any: (use additional page if necessary)
Spill area was cleaned and vacuumed. Opened blockage. Scheduled for additional knifing, cleaning, televising, and correction of defects found.

1. FACILITY NAME: City of Wichita Sewer Maintenance Kansas Permit # M-AR94-IO01
2. Within 24 hours of discovery, notify the KDHE Central Office (email – cseeds@kdheks.gov), (fax 785.296.0086), (telephone 785.296.5517) or your local KDHE district office. Written notification is required within 5 days of discovery. If the incident is not corrected within 5 days, send a written notification to KDHE indicating the status. This form is to be sent to KDHE when the incident ends.

KDHE Person Contacted: John Goetz Date: 2/4/13 Time: 4:00 pm

3. Date Incident Discovered: 2/4/13 Time: 12:30 pm
4. Date Incident Ended: 2/4/13 Time: 1:55 pm
5. Total estimated gallons bypassed, spilled, or routed through failed equipment for all locations on this form: ~45
6. If rainfall induced event, approximate inches of rainfall

If multiple locations listed below due to rain event, check here ☐

7. Incident Location: (check all that apply)
   - ☐ Plant
   - ☐ Lift/Pump Station
   - ☐ Peak Flow Basin
   - ☒ Manhole(s)
   - ☐ City Collection Line (Line Break / Joint)
   - ☐ Private Sewer Line
   - ☐ Basement
   - ☐ Other (specify below)

Identify **All** Incident Locations by Name, Street Address or Manhole Number as appropriate.
Overflow from manhole 5744-345 near 3672 E Cessna.

8. Cause of Incident:
   - ☐ Intentional Bypass for Repair/Construction
   - ☐ Excessive Rainfall, Snow Melt
   - ☐ Unplanned Construction Related Break
   - ☐ City Line Break (Not Construction Related)
   - ☒ City Line Blockage
   - ☐ Private Line Break
   - ☐ Private Line Blockage
   - ☐ Lagoon High Level
   - ☐ Equipment Failure
   - ☐ Control System Failure
   - ☐ Power Related Failure
   - ☐ Operations Related Failure
   - ☐ Maintenance Related Failure
   - ☐ Vandalism
   - ☐ Other

Additional explanation of reason for Incident: (use additional page if necessary)
Blockage in City sewer. Initial cause appears to be a plumber's cable snake accumulating paper and other material.

9. Corrective Action, if any: (use additional page if necessary)
Spill area was cleaned and vacuumed. Opened blockage. Scheduled for additional knifing, cleaning, televising, and correction of defects found.

To: Hardesty, James
Subject: RE: grass clippings

In 2013, city staff sent out or hand delivered 135 notifications regarding grass clippings disposal practices to residents and businesses.

From: Hardesty, James
Sent: Thursday, January 23, 2014 3:39 PM
To: Hall, Mark
Cc: Runyan, Sara
Subject: grass clippings

Can I get this updated, please.

TMDL 1B	Pollution Prevention A "Don't discharge grass clippings or leaves into the street" brochure was developed and is disseminated to individuals when a complaint about grass clippings or leaves in the street has been observed.	Total nitrogen, biochemical oxygen demand pollutants, suspended solids, and bacteria.	Brochures and citations presented to those that violate the ordinance requiring grass clippings and leaves to be kept out of the street and associated storm drains will be documented and reported in the City's Annual Report.	In 2012, City staff sent 21 notifications regarding grass clippings disposal practices to residents and businesses.

Neil,

Please let me know how many bags of hydro mulch were blown in 2013, and covering how many acres.

The information is for the City's annual NPDES report.

Thank you

By the end of 2013, 64,417 stormwater structures and 1,047 miles of conduit have been collected in the field and put on a GIS layer. The City has been inventorying since 2007, and is 100% complete as of 2012. The project is now continuing to collect new projects and is also being reviewed for quality control.

Kelly Fleming | City of Wichita | 316-268-4326 | www.wichita.gov

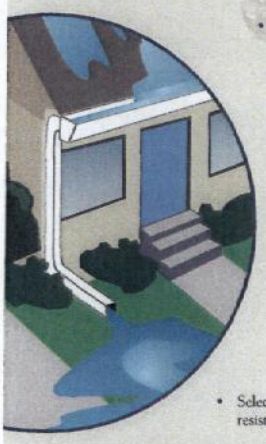
As stormwater flows over driveways, lawns, and sidewalks, it picks up debris, chemicals, dirt, and other pollutants. Stormwater can flow into a storm sewer system or directly to a lake, stream, river, wetland, or coastal water. Anything that enters a storm sewer system is discharged untreated into the waterbodies we use for swimming, fishing, and providing drinking water. Polluted runoff is the nation's greatest threat to clean water.

By practicing healthy household habits, homeowners can keep common pollutants like pesticides, pet waste, grass clippings, and automotive fluids off the ground and out of stormwater. Adopt these healthy household habits and help protect lakes, streams, rivers, wetlands, and coastal waters. Remember to share the habits with your neighbors!

Healthy Household Habits for Clean Water

Vehicle and Garage

- Use a commercial car wash or wash your car on a lawn or other unpaved surface to **minimize** the amount of dirty, soapy water flowing into the storm drain and eventually into your local waterbody.



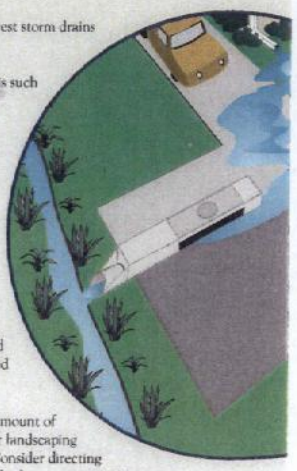
- Check your car, boat, motorcycle, and other machinery and equipment for leaks and spills. Make repairs as soon as possible. Clean up **spilled fluids** with an absorbent material like kitty litter or sand, and don't rinse the spills into a nearby storm drain. Remember to properly dispose of the absorbent material.
- **Recycle** used oil and other automotive fluids at participating service stations. Don't dump these chemicals down the storm drain or dispose of them in your trash.

Lawn and Garden

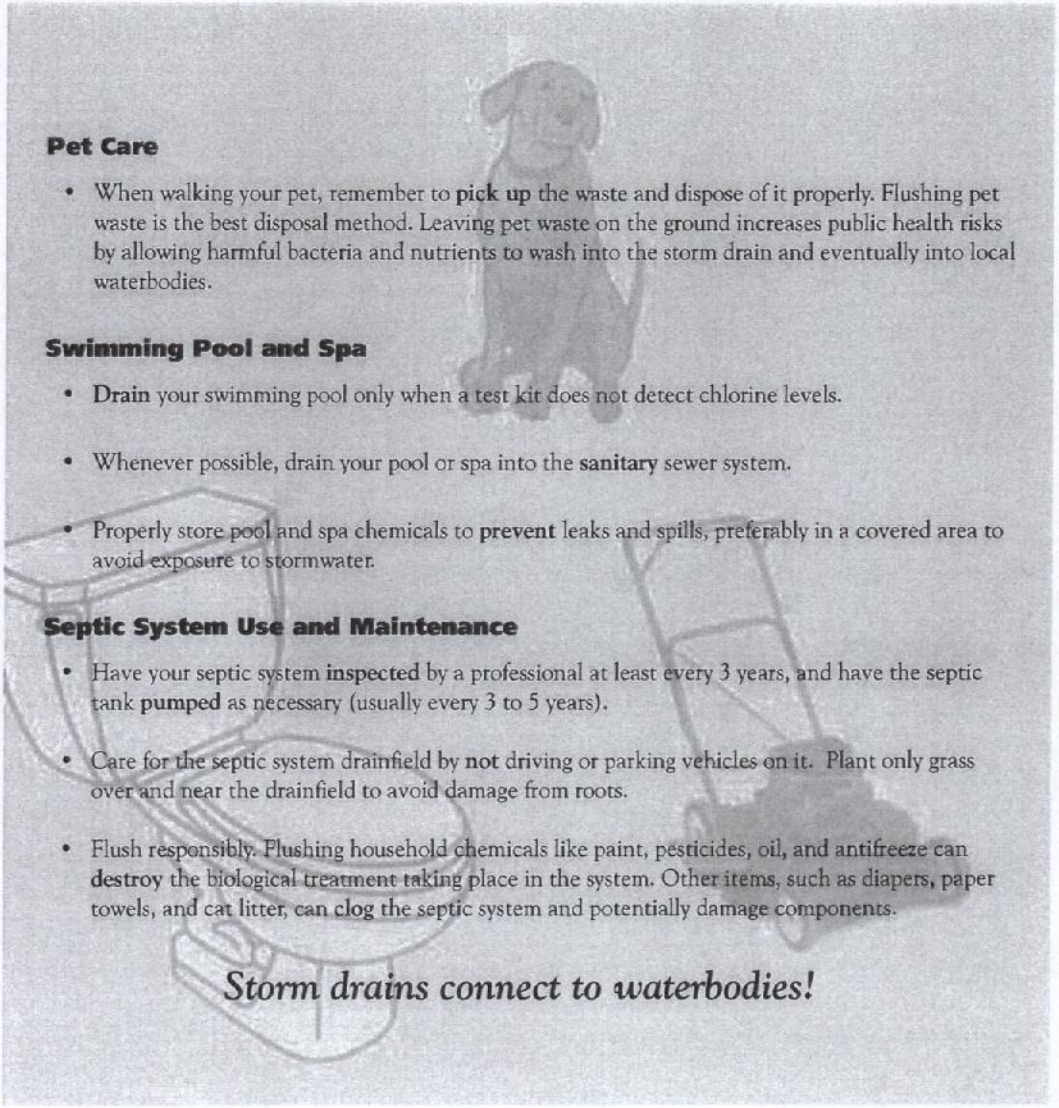
- Use pesticides and fertilizers **sparingly**. When use is necessary, use these chemicals in the recommended amounts. Avoid application if the forecast calls for rain; otherwise, chemicals will be washed into your local stream.
- Select **native** plants and grasses that are drought- and pest-resistant. Native plants require less water, fertilizer, and pesticides.
- **Sweep up** yard debris, rather than hosing down areas. Compost or recycle yard waste when possible.
- Don't overwater your lawn. Water during the **cool** times of the day, and don't let water run off into the storm drain.
- Cover piles of dirt and mulch being used in landscaping projects to prevent these pollutants from blowing or washing off your yard and into local waterbodies. **Vegetate** bare spots in your yard to prevent soil erosion.

Home Repair and Improvement

- Before beginning an outdoor project, locate the nearest storm drains and **protect** them from debris and other materials.
- **Sweep up** and properly dispose of construction debris such as concrete and mortar.
- Use hazardous substances like paints, solvents, and cleaners in the **smallest amounts possible**, and follow the directions on the label. Clean up spills **immediately**, and dispose of the waste safely. Store substances properly to avoid leaks and spills.
- Purchase and use **nontoxic**, **biodegradable**, **recycled**, and **recyclable** products whenever possible.
- **Clean** paint brushes in a sink, not outdoors. Filter and reuse paint thinner when using oil-based paints. Properly dispose of excess paints through a household hazardous waste collection program, or donate unused paint to local organizations.



- **Reduce** the amount of paved area and increase the amount of vegetated area in your yard. Use native plants in your landscaping to reduce the need for watering during dry periods. Consider directing downspouts away from paved surfaces onto lawns and other measures to increase infiltration and reduce polluted runoff.



Pet Care

- When walking your pet, remember to **pick up** the waste and dispose of it properly. Flushing pet waste is the best disposal method. Leaving pet waste on the ground increases public health risks by allowing harmful bacteria and nutrients to wash into the storm drain and eventually into local waterbodies.

Swimming Pool and Spa

- **Drain** your swimming pool only when a test kit does not detect chlorine levels.
- Whenever possible, drain your pool or spa into the **sanitary** sewer system.
- Properly store pool and spa chemicals to **prevent** leaks and spills, preferably in a covered area to avoid exposure to stormwater.

Septic System Use and Maintenance

- Have your septic system **inspected** by a professional at least every 3 years, and have the septic tank **pumped** as necessary (usually every 3 to 5 years).
- Care for the septic system drainfield by **not** driving or parking vehicles on it. Plant only grass over and near the drainfield to avoid damage from roots.
- Flush responsibly. Flushing household chemicals like paint, pesticides, oil, and antifreeze can **destroy** the biological treatment taking place in the system. Other items, such as diapers, paper towels, and cat litter, can **clog** the septic system and potentially damage components.

Storm drains connect to waterbodies!

STORM WATER POLLUTION PREVENTION
ANNUAL INSPECTION FORM
City of Wichita

Industry Name Kansas Truck Center

Address 4006 W. 29th St South

Inspection Date: 12-11-13 **Inspector:** TH **Watershed:** S. Slough

GROUNDS KEEPING:

Are storm drains clear of debris?	(Yes)	No
Is the area free of piles of materials that could wash into the storm sewer?	(Yes)	No
Is the area free of spills or the evidence of spills?	Yes	(No)
Is the area free of open containers/barrels that could overflow?	Yes	(No)
Is there a spill kit or other clean up materials easily accessible?	(Yes)	No

SWP2 STRUCTURES & OTHER EQUIPMENT MAINTENANCE:

Are primary separators or other SWP2 structures clean and operational?	(Yes)	No	N/A
Is equipment or machinery free from contributing contaminants?	Yes	(No)	
Are bermed and sumped areas being maintained properly?	Yes	No	(N/A)

WASTE COLLECTION AREAS:

Are containers closed and the area being properly maintained?	Yes	(No)
Is the area free of any evidence of spills or leaks?	(Yes)	No

OUTSIDE STORAGE OF EQUIPMENT AND MATERIALS:

Is the area free of any evidence of storm water contamination from equipment or materials stored outside?	(Yes)	No

OUTSIDE INDUSTRIAL ACTIVITIES:

Is the area free of any evidence of particular industrial activities contributing contamination to storm water?	(Yes)	No

VEHICLES AND MOBILE EQUIPMENT:

Is the area free of vehicles/equipment leaking contaminants onto ground?	Yes	(No)

MISCELLANEOUS OR OTHER:

Is the area free of evidence of roof runoff contributing contaminants?	(Yes)	No
Is the area free of contractor activities that could cause storm water pollution problems?	(Yes)	No

COMMENTS:

Roll-off dumpster not covered. Evidence of oil/fluids being tracked out of repair area/repair bays.

Okay I am going to brag just a bit. EPA's consultant has seen our fantastic Dog Doogity video and is seeking permission to include it in the National EPA's Nonpoint Pollution Source Toolbox. This is pretty darn awesome. Much of the credit goes to our videographer – First Generation, our stars; Jenny Wood, Diamond W Wranglers, Elizabeth Ablah and Obie! This video not only encourages folks to pick up after their pets, in a very fun way, but also features some of Wichita's best features. It is cool to know that this will be viewed nationally.

Kudos to the RiverCity WRAPS and WIRE for putting this together! And just in case you want to see it again:

I received this request while I was out on vacation last week. I'm not sure if it's legit. Since you work so much with the EPA and it's your project, I'm passing it to you. ☺ Let me know if I need to provide anything.

Cari

Sent: Friday, February 01, 2013 4:58 PM
To: Cari Merrill
Subject: Bag it up, Wichita! video

Cari,

Hi. My name is Liz Hiett. I am trying to contact someone I can touch base with about Bag it up, Wichita! Below is what we are working on and would like to involve this project with our materials. Please let me know if I need to speak to someone else and if you have the contact information, please provide that.

I am writing to ask for your help as we update U.S. EPA's Nonpoint Source Outreach Toolbox (www.epa.gov/nps/toolbox). This is a tool developed by EPA to serve as a resource for local government, watershed groups and other organizations to conduct public outreach on reducing polluted runoff. The Toolbox contains a variety of resources to help develop an effective and targeted outreach campaign: a collection of public service announcements (PSAs), print products, and other outreach materials in digital formats developed by localities, state and regional agencies, watershed groups, and other organizations. Currently, the Toolbox contains a fully searchable catalog with more than 900 outreach products in digital format.

We are adding some new products to the Toolbox, and your organization has one or more products that we are interested in adding. Listed below is the product we would like to add to the Toolbox:

Title	Agency	Website	Year Produced
Bag it up, Wichita!		Bagitupwichita.org	

Please take a few minutes to review the information above and make any necessary changes or fill in missing information. **In addition, please complete a permission form (attached to this email as a form-fillable PDF file) for EACH product, and return the form(s) to me by Friday, February 7. Also, please provide digital copies of the above materials to be added to the toolbox.** If you have additional products you would like EPA to consider adding, please provide digital copies and descriptions of those products, as well as a completed permission form for each product. We will notify you if EPA adds your additional products.

If you have any questions, please contact me at 703.385.6000 x360. Your completed form can be emailed to liz.hiett@tetratech.com. Thank you for your time.

Sincerely,

Liz Hiett (USEPA Contractor)

Subject: Continuation of the NPDES MS4 Permit

Scott;

This follows our conversation earlier today regarding the Wichita permit. I have attached a document which address the continued operation under the present permit. If you have further questions, please do not hesitate to contact me.

Best Regards,

Rance Walker, P.E.
Kansas Department of Health and Environment
1000 SW Jackson Street, Suite 420
Topeka, Kansas 66612-1367

Phone: (785) 296-5537
FAX: (785) 296-0086
E-Mail: rcwalker@kdheks.gov

An explanation of how continued operation under the previously issued permit is addressed within PART IX. STANDARD CONDITONS of your MS4 permit, on page 12, item B.

KDHE is in receipt of the renewal application and considers it acceptable for the City of Wichita to continue to operate under the expired permit until such time as this Department reissues the new permit.

This concept of continuation of an expiring permit is rooted in the federal regulation 40 CFR 122.6(4)(d) which is repeated in part as follows:

> (d) State continuation. (1) An EPA-issued permit does not continue in force beyond its expiration date under Federal law if at that time a State is the permitting authority. States authorized to administer the NPDES program may continue either EPA or State-issued permits until the effective date of the new permits, if State law allows. Otherwise, the facility or activity is operating without a permit from the time of expiration of the old permit to the effective date of the State-issued new permit.

KDHE has been delegated the responsibility of administering the NPDES program in Kansas and this agency abides by the continuation of permit requirements addressed in the federal regulation cited above.

The state law that allows authority to continue permits (K.S.A. 77-155) is repeated in part as follows:

> (d) If a timely and sufficient application has been made for renewal of a license with reference to any activity of a continuing nature, the existing license does not expire until the state agency has taken final action upon the application for renewal or, if the state agency's action is unfavorable, until the last day for seeking judicial review of the state agency's action or a later date fixed by the reviewing court.

Please note a license and a permit are considered equivalent.

Re: August 7, 2013 Fishkill Investigation
St. Elizabeth Ann Seaton Catholic Church
645 North 119th Street West
Wichita, Kansas

Dear Mr. Koon:

On August 7, 2013 KDHE was notified of a fishkill in a stormwater pond located directly southwest of and adjacent to the St. Elizabeth Ann Seaton Catholic Church.

KDHE investigated the fishkill the day the complaint was filed and found that a fishkill had occurred, involving various sizes and species of fish. The fishkill appeared to be isolated to only one (1) of the several stormwater ponds that are located west of the church.

During the investigation, it was noted that any stormwater runoff coming from the church parking lot located on the north side of the church would flow south into stormwater inlets or follow the curbing along Harvest Lane and then discharge into the pond we investigated. (See attached map) The curbing was stained with a black residue. KDHE had been advised by the complainant, that the church had its parking lot recoated within the past week. While conducting the investigation, water samples were collected from three (3) different ponds that included the pond where the fishkill occurred as well as upper and lower gradient ponds.

Staff at St. Elizabeth Ann Seaton Catholic Church was contacted by KDHE, who reaffirmed that the church did have their parking lot repaved from July 29th to August 1, 2013 and that the job was contracted to Cornejo & Sons, Inc. For three (3) days after the completion of the project, August 2 through August 4, 2013, significant rainfall was recorded. Please find attached records from the National Weather Service for Wichita's Mid Continent Airport for the months of July and August.

On October 25, 2013, you were contacted by email to confirm that Cornejo & Sons, Inc. were the repaving contractor for the church and to obtain a Material Safety Data Sheet (MSDS) for the seal coat product used on that job site. It was later confirmed by you that Cornejo & Sons, Inc. was the contractor and an MSDS was sent to KDHE for the product that was used.

The product used, MAC PRO-BLEND, manufactured by McConnell & Associates Corp, is a refined coal tar pitch emulsion. On Page 4 of the MSDS, in Section VII it states "Do not flush into sewers or bodies of water. The material will suffocate the fish until it settles to the bottom."

The purpose of this letter is to advise Cornejo & Sons, Inc. that any future use of this product, MAC PRO-BLEND must only be applied at a time when stormwater runoff would not occur before the product cures. Weather forecasts must first be consulted before application of the product to ensure no reoccurrence of fishkills in this or any other waterbody. Special attention must be given for this product's use where creeks, streams or ponds would be affected by any stormwater runoff contaminated with this product. If use of this product in the future causes additional fishkills, KDHE can take enforcement action and seek restitution per Kansas Statutes.

For your information the State of Minnesota is banning the sale and use of coal tar pavement sealants effective January 1, 2014. I have attached email regarding the actions taken by Minnesota for your reference.

If you have any questions or need assistance, please contact me by e-mail at jgoetz@kdheks.gov or by telephone at 316-337-6058.

Sincerely,

John Paul Goetz, P.E.

Subject: State of Minnesota to Host Webinar on Coal Tar Sealant Phase-Out

As you may know, earlier this year the State of Minnesota passed a law banning the sale and use of coal tar pavement sealants. The new law goes into effect January 1, 2014.

In order to prepare for this transition, the Minnesota Pollution Control Agency (MPCA) is hosting a free webinar to explain the details of the ban and the science that led up to this decision. As described below, registration is required for the hour to hour and a half seminar.

Even if you don't live or work in Minnesota, it will be a good time to learn more about the state of the science, how Minnesota intends to enforce the ban and there will be an opportunity for questions after an hour.

PHASING OUT COAL TAR SEALCOATS UPDATE

Minnesota Pollution Control Agency sent this bulletin at 08/15/2013 12:36 PM CDT

WEBINAR SCHEDULED - The Minnesota Pollution Control Agency (MPCA) and project partners have scheduled a webinar to provide an overview of the issues driving companies and communities away from the use of coal tar-based sealcoat.

Tuesday, October 1, 2013 - - The basic program is 9:30 - 10:30 Central, plus an additional 30 minutes of availability for questions and discussion if desired (until 11:00 Central).

Please register by going to https://mpca.webex.com/mpca/onstage/g.php?d=255793259&t=a and clicking on Register in the upper left under Event Status.

PROVIDERS OF SAFER ALTERNATIVES - Go to the Great Lakes Coal Tar Sealcoat PAH Reduction Project web page at http://www.pca.state.mn.us/h8udqd6 and click Interactive map of companies (http://www.pca.state.mn.us/uu4yx6y) to see applicators and suppliers in several states who have pledged not to provide coal tar sealcoat.

Help spread the word to companies in your area that we can list and map any company in the Great Lakes area if they are willing to sign the Pledge/Certification Form on the Great Lakes web page. This will support residents and businesses in your area who are ready take action by purchasing safer alternatives to coal tar sealcoat.

Thanks!

Al Innes, MPCA - - alister.innes@state.mn.us

PRESERVATION, ENERGY & SUSTAINABILITY CONFERENCE

Burns & McDonnell
SINCE 1898

January 25th, 2013
AGENDA

Century II Convention Center - Convention Hall - Wichita, KS

8:00am - 9:00am : Registration and Continental Breakfast (Vendors Open)

9:00am - 9:10am : Mayor's welcome and introduction of officials

9:10am - 10:15am : **Wichita State University Case Studies : Two City of Wichita Energy Efficiency Projects and Discussion of Possible Future Transportation Improvements** - Dr. Bill Wentz, Professor of Aerospace Engineering and Mohammad Amin Esmaeli, PhD candidate in Industrial and Manufacturing Engineering

10:15am - 10:30am : Break

10:30am - 11:30am : **Environ Corp. : The Straight Dope on Sustainability and Energy Management** - Andrew Sheaffer, PE, CEM

11:30am - 1:00pm : Luncheon Buffet and Keynote Speaker - **Walmart Sustainability: Collaborating with our Suppliers to Build a Sustainable Consumer Goods Industry** - Jeff Rice, Senior Director, Sustainability

1:00pm - 1:30pm : Break

Energy and Environmental (Convention Hall)

Session A

1:30pm - 2:15pm : **KC Regional Clean Cities Coalition : Alternative and Federal Programs for local and regional vehicle transportation** - Kelly Gilbert, Transportation Director of KCRCCC

2:15pm - 3:00pm : **Via Christi Health : Successful energy efficiency program** - Anas Sadkhi, Energy Engineer Manager

3:00pm - 3:15pm : Break

3:15pm - 4:00pm : **Ozone Advance Panel : Spirit AeroSystems, Westar Energy, KDHE, MARC, EPA** - Collaborative effort to Meet Ozone Attainment in the Wichita Area

Building Preservation (Room 101 A-B)

Session B

1:30pm - 2:15pm : **Burns & McDonnell : LEEDv4 Regional Credit Priorities** - Stephanie Graham, Sustainability Manager for the Aviation & Federal Division

2:15pm - 3:00pm : **USGBC : Historic Green - an Eye on Equity** - Ryan Evans and Jeremy Knoll, founders of Historic Green

3:00pm - 3:15pm : Break

3:15pm - 3:45pm : **Downtown Preservation, Past and Present : Wichita Downtown Development Corp.**

4:00pm - 5:30pm : Mixer Vendor Area *(Convention Hall)*

*Speakers and times subject to change

Subject: FW: Sand Sweeping

Can you mention this in your list as media engagement for Storm water promotion?

From: Henning, Aaron
Sent: Tuesday, January 08, 2013 5:20 PM
To: Williams, Van; Locke, Lauragail; King, Alan
Cc: Pajor, Joseph; Nelson, Ben; Schultze, Matthew; Nicholas, Terry; Lindebak, Scott; Davidson, Tim
Subject: RE: Sand Sweeping

Van, Lauragail,

I just completed an interview with KWCH's Pilar Pedraza regarding the City's efforts to sweep sand from streets following recent snow/ice response efforts. (For a story to air at 9:00 and 10:00 PM, I gather.) Essentially, I conveyed that:

1. We're doing so for the following reasons:
    a. To prevent sand/sediment from entering the river
    b. To eliminate the potential hazards associated with the sand (slipping/sliding)
    c. Aesthetics
2. We typically have 5 sweepers on 1st shift, and 2 sweepers on each of 2nd and 3rd shifts, addressing the emergency routes that were treated during the last snow event
3. It will take us approximately 4-6 weeks to complete the sweeping of all emergency routes, which constitute over 1,200 lane miles of arterial streets
4. After some prodding…that, yes, we would like to sweep as much as possible in advance of tomorrow's forecasted rain event, in order to minimize the amount that might enter the river
5. That "Kansas sand" in a "Kansas river" is a concern because of the EPA's NPDES (National Pollutant Discharge Elimination System) regulations limiting the introduction of sediment in waterways

When asked why the EPA limits sediments, I answered in general that the sediment is believed to damage aquatic wildlife. When asked how, I didn't have a great answer to give, so we contacted Storm Water staff for some help. Tim did a great job of explaining concerns related to potentially trapped road pollutants (oil, etc.) in the sand, via telephone. Pilar and I did some additional investigating on the internet and found a good explanation as to why any (even unpolluted) sediment is considered harmful – primarily revolving around the fact that additional sediment tends to limit the penetration of light (resulting in temperature change, impeded photosynthesis, etc.).

We also arranged for her to film a street sweeper in action, in the vicinity of Pawnee & McLean; and seemed comfortable with the information provided when she left.

If you have any questions/concerns, please let me know.

Thank you,

Aaron

Aaron, could you call Pilar about our sweeping routes? They'd like a few shots of our crews and to talk about why we're sweeping up the sand. Thanks a lot.

Mr. Nelson,

Van Williams suggested I contact you. We at KWCH understand city crews are out sweeping up the sand put down during winter weather in an effort to get it off the streets before it rains. We would love to catch up with a crew, talk to them about what they're doing and why, get a bit of video, etc.

You can reach me at 573-9639.

Thanks so much for your help.

Sincerely,

Pilar Pedraza

I am double checking with our Storm Sewer inspectors regarding this discharge and if it has been sampled ----
In the meantime – Kenneth Kopp with DWR found the permit information for me – see attached email.

If the discharge has not been sampled – we will look to have this done and then appropriate steps should be determined.
Will keep all informed.
Thanks
Doris

Subject: RE: Via Christi Sump Pump

I checked with Kyle Parker in SCD office and he did not think this facility is in a hot area of groundwater contamination but he would not be surprised if a sample of the discharge from the sump pump detected low levels of contamination. **SCD recommends that either Via Christi or the city sample this discharge so that we can determine if a NPDES permit is required.**

Doris do you have any detailed information on exactly which area or building this sump pump is located? Any information you could provide might help us remember if our office dealt with this issue in the past.

When Via Christi says they send an annual report to the state I assume they mean to Division of Water Resources (DWR).

Subject: RE: Via Christi Sump Pump

I don't have any info on this. I will check with the Wichita District Office. Is it in a groundwater contaminated area?

If the facility is discharging uncontaminated groundwater, this Department would not have any reason to have a permit for it. The reports referred to may be amounts of pumped water for water right to the Dept. of Ag., - Division of Water Resources.

If it is in a contaminated groundwater area, they would need to obtain an NPDES permit for the discharge even if it discharges into the City storm sewer system.

The City of Wichita Municipal Separate Storm Sewer (MS4) permit requires the City to investigate all dry weather discharges into their storm sewer system. I do not know this person or in which department they work in but if they are not in the stormwater Department maybe this City Department could also help them. Joe

Joe,
Doris Leslie of the City of Wichita sent me the email below regarding the Via Christi/former St. Francis Hospital in Wichita, KS. The facility has a sump pump that discharges to the city storm sewer. The City is requesting any additional information the State may have on the discharge and sampling of it. Do you have any information for this facility? The facility address is 929 N. St. Francis, Wichita, KS.

Doris:

The following information has been provided to me in response to your question:

According to the report prepared by AEC in 1999, it discharges to the storm sewer. We send an annual report to the state. Based on data from facilities, 10.8 million gallons of water was released in 2012.

The following information was collected:
Subject:
Kansas Residence and Pollution of Natural Waters

Message:
I live at the Kellogg and Maize area on the Cowskin Creek. I have a neighbor across the other side of the creek who continuously dumps trash and polluted items into this creek. This is harmful to the environment and we can never restore what was lost plus whatever pollutants make it down stream.

Lately there have been several dead fish floating to the surface of the creek. Several of these fish at a time. I am not sure if it is from the neighbor or something that may be in the water. This week I was out looking at the creek and there was a lot of trashing floating on the water. It looked as if trash can were dumped. If you stand on the south side of the creek, you can see where trash has been dumped into the creek.

In the summer time this individual dumps his riding mower clippings into the creek and you can see several spots along the creek where his clippings and trash did not make it all the way into the creek. I write to see if someone could look into this and put a stop to this careless act that has been going on. If you need more information I will leave you my personal information. Thank you for any help you can be of.

Greenwichita Conference Returns to CII

Preservation, energy and sustainability conference includes Walmart

The fifth annual Greenwichita Conference returns on Friday, Jan. 25 to Century II Convention Center. The conference, which features energy and sustainability initiatives for regional businesses, will feature the latest projects that agency and business leaders are incorporating to preserve the environment and historical buildings while saving operating and capital costs.

The luncheon will feature Jeff Rice, the Senior Sustainability Director for Walmart. He will discuss collaborating with suppliers to build a sustainable goods industry. Wichita State University officials will present on facility-energy efficiency and a cost-savings case studies. Environ, a national environmental consulting firm, will present on energy management and sustainability initiatives. Afternoon break-out sessions will feature two panel discussions on:

- The City of Wichita's Ozone Advance Program, with local experts discussing the collaborative efforts taken by the Environmental Protection Agency, states, local governments, and local businesses to encourage emission reductions in ozone attainment areas;
- The Wichita Downtown Development Corp.'s historical preservation projects, featuring the Lux, The Ambassador and the Drury Inn.

The conference is sponsored by Burns and McDonnell, Environ and Rusty Eck Ford in conjunction with the City of Wichita and Regan Productions. To register for the conference, please visit www.greenwichita.org or contact Regan Productions at 316.771.7345 or kregpro@cox.net.

More than 100 tires fished out of Arkansas River banks

By Deb Gruver
The Wichita Eagle

A crew from Wichita's flood control department fished more than 100 tires out of the banks of the Arkansas River near the 47th Street Bridge recently.

Sedgwick County Commission Chairman Jim Skelton said he had received complaints from board members of the Oaklawn Improvement District about tires that had been dumped near the river on either side of the bridge. He alerted the county's public works director, David Spears, who contacted the city.

Crews removed the tires in June.

"It is so unfortunate that people have such disrespect ... for our environment," Skelton said in an e-mail.

Subject: RE: Messages On Hold

Tyler, below is the message Stormwater Management would like to put into the 'messages on hold' rotation. We will update this message periodically as the seasons change. Thanks!

Stormwater runoff pollution affects us all, and can pollute our rivers and streams. Stormwater drains directly to nearby waterways in each of our neighborhoods. You can help keep our waters clean by picking up after your pet, and by following label directions on all products that you use outside of your home. For more information, please visit our website at www.wichita.gov .

Wichita Employees' Retirement Board Candidate Submission Extended

The attached information was included in the February 19, 2013 *City Hall Insider* (followed by paper distribution to department directors or representatives) to inform participants in the Wichita Employees' Retirement System of one impending vacancy on the Retirement Board. Please note that the candidate deadline for the Wichita Employees' Retirement Election initially set for 5 p.m., Friday, March 1 has been **extended until 5 p.m., Friday, March 15. No further reminders will be issued.**

Dog Doogity Video

Public Works & Utilities staff worked with community partners to develop an very successful publicity approach to reducing waste pollution. The centerpiece is a "Dog Doogity" video that has recently been recognized by the National Environmental Protection Agency (EPA). The EPA wants to include it in its toolbox of pollution control. The video was filmed by First Generation and stars some local City of Wichita partners. It encourages people to pick up after their pets and showcases some of Wichita's best landmarks.

The video can be viewed at the following location: http://youtu.be/0BmRFDwUp2U

Excellence Award Deadline is March 13

Nominations close for the Excellence in Public Service Award at 5 p.m. on March 13.

Nomination forms are available in the City Manager's Office, the County Communications Office and USD 259's Marketing and Communications Office. Nomination forms also are available at www.wichita.gov and may be submitted online using the following link: Nomination form for excellence in public service

Wichita and Sedgwick County residents are encouraged to nominate public employees for the annual Excellence in Public Service Award. The award recognizes City of Wichita, Sedgwick County and Wichita Public School employees who exhibit the highest standard of service.

Each honoree will receive $2,500. The Excellence in Public Service Award is designed to highlight public sector employees who go beyond the call of duty. Nominees should demonstrate the following attributes:

- Exemplary performance that has contributed to the public interest
- Innovative problem-solving skills that have improved service delivery
- Adherence to high ethical standards in carrying out job responsibilities and
- A record of community involvement through participation in civic organizations.

Okay I am going to brag just a bit. EPA's consultant has seen our fantastic Dog Doogity video and is seeking permission to include it in the National EPA's Nonpoint Pollution Source Toolbox. This is pretty darn awesome. Much of the credit goes to our videographer – First Generation, our stars; Jenny Wood, Diamond W Wranglers, Elizabeth Ablah and Obie! This video not only encourages folks to pick up after their pets, in a very fun way, but also features some of Wichita's best features. It is cool to know that this will be viewed nationally.

Kudos to the RiverCity WRAPS and WIRE for putting this together! And just in case you want to see it again:

Sent: Friday, February 01, 2013 4:58 PM
To: Cari Merrill
Subject: Bag it up, Wichita! video

Cari,

Hi. My name is Liz Hiett. I am trying to contact someone I can touch base with about Bag it up, Wichita! Below is what we are working on and would like to involve this project with our materials. Please let me know if I need to speak to someone else and if you have the contact information, please provide that.

I am writing to ask for your help as we update U.S. EPA's Nonpoint Source Outreach Toolbox (www.epa.gov/nps/toolbox). This is a tool developed by EPA to serve as a resource for local government, watershed groups and other organizations to conduct public outreach on reducing polluted runoff. The Toolbox contains a variety of resources to help develop an effective and targeted outreach campaign: a collection of public service announcements (PSAs), print products, and other outreach materials in digital formats developed by localities, state and regional agencies, watershed groups, and other organizations. Currently, the Toolbox contains a fully searchable catalog with more than 900 outreach products in digital format.

We are adding some new products to the Toolbox, and your organization has one or more products that we are interested in adding. Listed below is the product we would like to add to the Toolbox:

Title	Agency	Website	Year Produced
Bag it up, Wichita!		Bagitupwichita.org	

Please take a few minutes to review the information above and make any necessary changes or fill in missing information. **In addition, please complete a permission form (attached to this email as a form-fillable PDF file) for EACH product, and return the form(s) to me by Friday, February 7. Also, please provide digital copies of the above materials to be added to the toolbox.** If you have additional products you would like EPA to consider adding, please provide digital copies and descriptions of those products, as well as a completed permission form for each product. We will notify you if EPA adds your additional products.

If you have any questions, please contact me at 703.385.6000 x360. Your completed form can be emailed to liz.hiett@tetratech.com. Thank you for your time.

Sincerely,

Liz Hiett (USEPA Contractor)

Re: Drainageway Mowing

Greetings Residents:

The City of Wichita is undertaking an experimental "No Mow Zone" grass buffer strip project on selected streams in Wichita. Please see the attached pictures recently taken of a "No Mow Zone" in your area. The intent of using a "No Mow Zone" that results in a mowed buffer area adjacent to the stream channel is to:

- Reduce stream bank erosion
- Reduce damage to stream banks caused by tractor mower tire rutting
- Increase the natural appearance of a stream system
- And to reduce pollutants going from the stream bank into the water
- Buffer strips do not have any effect on flooding potential

The areas mowed and trimmed adjacent to the stream are on the City's standard 30-day mowing rotation, and the entire stream channel will be mowed down in winter, when ground conditions are suitably dry.

The City is seeking input from you and your neighbors to gather feedback on this effort, and to help direct future policy regarding "No Mow Zones". Please take a few minutes to answer a short survey.

Your input will help shape future efforts, and the electronic survey can be found at:

https://www.surveymonkey.com/s/nomowzone

If you do not have internet access, or have problems accessing the survey site, please call 268-4498 to answer the survey questions. It is not necessary to provide your name, address, or any other personal information. Responses will be collected through Sunday, October 6th.

Thank you in advance for your input, and we look forward to hearing from you and your neighbors. Results of survey will be available at the same website listed above after October 7th.

Respectfully,

Jim Hardesty

Please feel free to add comments:

The zone is adjacent to my backyard. I now have a yard full of your dandelions, bind weed, and snakes. There is no way I can let this continue. It is an eyesore. Over the las 20 years that ditch behind my house has filled in with mow clippings, silt, sand, an Juno. It is now shallow and a flood risk. It needs dredged and deepened.

It looks natural, aids in errosion control, and the wildlife enjoy the habitat. Keep it.

I think it is a great idea to save money!

After working with flooding issues most of my adult life, you can't tell me that changing the ground surface to high grass and trees doesn't change mannings "n" values and surface water elevation during a high frequency storm

GET SOME ONE TO MOW IT THE WATER CAN'T RUN LIKE IT SHOULD WITH ALL THE WEEDS & GRASSES IN THERE.

I have notices more insects and my two daughters 3yr and 5yrs have been getting bit by flys and mosquitos more than ever. the letter says that it is to help with erosion the stream is trashed already the stream needs to be plowed and filled in to a proper "V" shape ditch so it drains correct. the stream doesnt drain right and has standing water everywhere. if the city wants to save money and not mow thats fine just fix the drainage first. also, I mow the lawn behind my fence and just dont have long enough trimmer to cut over stream. and I would cut but the field mice and bacteria in the water is to dangerous and to deep to step. the letter says it will not affect the draining it will and it does but like I said it doesnt drain right in first place. If city dont want to fix it, drop a plow tracker for a few days and myself and others will fix it right. Thank you for your time

concern about mosquitos and west nile virus

What are the exact locations of the three pictures included in the survey??? It doesn't look like what we see. More area in our "buffer zone" look a lot less mowed/trimmed and has trash on the banks. Contact Scott C. Lindebak PE, CFM for our entire conversation.
