

Industrial Pretreatment Workshop

Thank you for this opportunity today!

**Our Main Mission:
KEEP YOUR ANALYTICAL
CASH IN KANSAS!**

Brief History of Pace Analytical

- The Kansas City laboratory operation has been in existence for more than 37 years.
- 1996 we established our Wichita Service Center
- In addition to our Lenexa, KS Laboratory, we presently have: 20 environmental laboratories, 2 life science laboratories and 21 service centers across the country and now includes Puerto Rico
- We currently are working with: several local, state and national government programs

What does all this mean...

Pace is your one stop shop for Waste Water and beyond

- Pace is a full service analytical laboratory.
(waste water, hazardous waste, air, specialty services, and much more)
- Pace is the only Aquatic Toxicity Lab in the State of KS
- We have advanced state of the art instrumentation like our ICP/ICP Mass Spec. which allows us to keep metals and heavy metals in house
- All of this allows for a single point of Contact for all your Wichita testing needs

Local Services in Wichita

Wichita Service Center

- Sampling Services
- Pick up samples at your door step
- Have inventory of supplies on hand for last minute items: coolers, containers, labels, etc.

Electronic Capabilities

Pace Port is our on line system. With this system you can:

- See your samples logged in
- View real time results (Fastest TAT)
- Customize bottle/kit order
- Pre-printed COC and Labels (no error in request)
- Your data is stored in our off site data base. If we have a fire at our Lenexa Laboratory or you have a fire at your office, your data is safe.
- If the local facility is destroyed, then Pace has put in place steps to ensure the safety of your data.

In Summary

- Pace's goal is to make our environment healthier and safer for the next generation and we would love to help you do the same here in Wichita.

Thank You So Much AND
Have a Happy Thanksgiving!
